

**SP-655**  
April 2008

*Proceedings of  
the 2008 Dragon Symposium*

# **Dragon 1 Programme Final Results 2004 – 2007**

21–25 April 2008  
Beijing, P.R. China

**European Space Agency  
Agence spatiale européenne**

*Dragon Programme Coordinators*

Yves-Louis Desnos

Head of R&D Section and senior advisor,

EO Science and Applications Department

Directorate of EO Programmes

ESA/ESRIN, via Galileo Galilei, I-00044, Frascati, Italy

Li Zengyuan

Deputy Director of Institute of Forest Resources Information Techniques

The Chinese Academy of Forestry

Wan Shou Shan Hou, Haidan District,

100091 Beijing, P.R. China

*Cover product and imagery examples – clockwise from the top left:*

*Oceanography – Mean annual SST using AATSR, red colours warm waters and blue colours cold waters;*

*Atmosphere – Mean annual NO<sub>2</sub> from SCIAMACHY, red areas high concentration, and blue areas low concentration;*

*Land – Multi-temporal composite of MERIS imagery, green areas high-density vegetation, brown areas no vegetation;*

*Elevation – Model produced merging bathymetry with Altimetry Corrected Elevation (ACE).*

<i>Publication</i>	Proc. Dragon 1 Programme Final Results 2004–2007, Beijing, P.R. China 21– 25 April 2008 (ESA SP-655, April 2008)

# CONTENTS

## **Foreword (English)**

*S. Briggs & G. Zhang*

## **Foreword (Chinese)**

*S. Briggs & G. Zhang*

Overview of the Dragon Programme Achievements and Results 2004 to 2007

*Y.-L. Desnos, A. Zmuda, Z. Li & Z. Gao*

# OCEANOGRAPHY

## **Coupling Climate and Ocean Systems (id. 2615)**

Dragon in Support to Harmonizing European and Chinese Marine Monitoring  
for Environment and Security

*J.A. Johannessen, M.-X. HE, with support from the remaining DRAGONESS project team*

Monitoring of the South- and East China Seas with Envisat ASAR

*K.-F. Dagestad, J.A. Johannessen, M. He et al.*

## **Oceanography from Space (id. 2566)**

### ***Internal and Gravity Waves***

A New Internal Wave Activity Sea Area Discovered in the Yellow Sea near Qingdao

*M. He, H. Chen, B. Wang et al.*

Observations of Atmospheric Gravity Waves over the Chinese Seas by Spaceborne Synthetic Aperture Radar  
*W. Alpers, W. Huang & G. Xilin*

### ***Ocean Colour and Constituents***

Detection of Red Tides Using MERIS 681 nm and 709 nm Bands in the East China Sea: A Case Study  
*M. He, Y. Wang, L. Hu et al.*

Neural Network Model for Chlorophyll-A Concentration Retrieval in the Bohai Sea  
*T. Cui, J. Zhang, Y. Ma et al.*

An Semi-Analytic MERIS Ocean Color Remote Sensing Model of Bohai Sea and its Retrieval Ability Analysis  
*Y. Ma, J. Zhang, T. Cui et al.*

### ***Bottom Topography and Depth***

Review of the Study on the Underwater Topography Detection with SAR Imagery in Sino-European Dragon Cooperation Programme  
*J. Yang, J. Zhang & J. Meng*

Depth and Optical Properties of Water Column Retrieved from MERIS Data around the Dongsha Atoll  
*M. He, L. Hu, Y. Wang et al.*

### ***Others***

Two Coastline Detection Methods Based on Improved Level Set Algorithm in Synthetic Aperture Radar Images  
*J. Chong, Y. Ouyang & M. Zhu*

## **ATMOSPHERE**

### **Air Quality Monitoring and Forecasting (id. 2580)**

Monitoring of Atmospheric Trace Gases over China Using GOME and Sciamachy Data  
*B. Mijling, R.J. van der A, I. De Smedt et al.*

The Trend, Spatial & Temporal Distribution and Sources of Tropospheric No<sub>2</sub> over China Based on Satellite Measurement during 1997 to 2006  
*X. Zhang, P. Zhang, Y. Zhang et al.*

## **Chemistry of Climate Change in the Atmosphere (id. 2579)**

Ozone Layer above China as Seen by Satellites  
*E. Kyrölä, S. Hassinen, J. Tamminen & H. Qiu*

Comparison of Envisat GOMOS and MIPAS Ozone Profiles with Balloon Sonde Measurements from Beijing  
*Y. Liu, Z. Cai & E. Kyrola*

Satellite Observation of 2003-2004 Stratospheric Sudden Warming from MIPAS Measurement  
*Y. Liu, H. Wang & Z. Cai*

## **FLOODING AND WATER RESOURCES**

### **Drought Monitoring in China (id. 2608)**

Drought Monitoring and Prediction over China  
*Z. Su, Y. Chen, M. Menenti et al.*

Satellite Based Regional-Scale Evapotranspiration in the Hebei Plain, Northeastern China  
*W. Lin, R. van de Velde & Z. Su*

Inversion Model Research of Soil Surface Roughness by Using Microwave Remote Sensing  
*S. Li, L.M. Wang, H. Deng et al.*

Regional Evapotranspiration over the Arid Inland Heihe River Basin in Northwest China  
*X. Shan, R. van de Velde, J. Wen et al.*

On the Usage of Satellite Observations for Drought Monitoring and Forecasting  
*R. van der Velde, M.D. van Helvoirt, H.A. van Aken & Z. Su*

### **Flood Plain Disaster Rapid Mapping and Monitoring (id. 2551)**

Near Real Time Exploitation of Envisat for Flood Monitoring in P.R. China during the 2005, 2006 and 2007 Raining and Typhoons Seasons  
*J. Li, H. Yesou, R. Malosti et al.*

Assessment of the Change Detection Procedure Dedicated to Flood Monitoring Using Envisat Wide Swath Mode Data  
*R. Andreoli & H. Yesou*

Three Years of Poyang Hu (Jiangxi, P.R. China) Monitoring Using Envisat Low and Medium Resolution Data Time Series: Application to the 2004-2006 Period  
*R. Andreoli, J. Li, H. Yésou et al.*

### **Satellite Tools for Water Resources Assessment (id. 2584)**

Water Resources Assessment in the Huai River Basin: Hydrological Modelling and Remote Sensing  
*C. Baubion, G. de Marsily, E. Ledoux et al.*

## FORESTRY

### **Deriving Forest Information from PolInSAR Data (id. 2556)**

Comparison of Methods to Derive Forest Height from Polarimetric SAR Interferometry  
*E. X. Chen, Z. Y. Li, S. R. Cloude et al.*

On Multibaseline Polarimetric Interferometric Techniques for Natural Media  
*M. Neumann, L. Ferro-Famil, E. Pottier & E. Chen*

Forest Structure Estimation Using Space Borne Polarimetric Radar: An ALOS-PALSAR Case Study  
*S. Cloude, E. Chen, Z. Li et al.*

### **Forest Map of China (id. 2583)**

Creation of Large Area Forest Biomass Maps for Northeast China Using ERS-1/2  
Tandem Coherence  
*O. Cartus, M. Santoro, C. Schmullius et al.*

Large-Scale Forest Mapping in Northeast China and Map Updating by Using ERS-1/2  
Tandem and Envisat ASAR Data  
*X. Tian, Z. Li, E. Chen et al.*

### **Forest Fire Monitoring (id. 2531)**

Monitoring of Forest Fires in China through the Envisat-AATSR Sensor  
*J.L. Casanova, A. Calle, J. Sanz et al.*

Fuel Moisture Content Estimation Using Satellite Data  
*X. Qin, Z. Li, H. Yi et al.*

## AGRICULTURE

### **Rice Monitoring (id. 2562)**

Rice Mapping and Monitoring Using Envisat ASAR Data  
*B. Li, S. Yang, T. Le Toan et al.*

### **Agricultural Monitoring in Fujian Province (id. 2563)**

Backscatter Change Index of Envisat ASAR Data for Rice Field Mapping in Fuzhou,  
Fujian Province  
*X. Wang, Q. Wang, F. Ling et al.*

Urban Dynamic Change Detection Using Interferometric SAR in Southeast China  
*H. Chi, F. Ling, Q. Wang et al.*

# ELEVATION MODELS AND TERRAIN MOTION

## **Landslides, Terrain Motion and Mapping (id. 2558)**

Exploitation of SAR and Optical Imagery for Monitoring the Environmental Impacts of the Three Gorges Dam  
*J.-P. Muller, Q. Zeng, Z. Li et al.*

Ps InSAR Monitoring of Land Subsidence in Suzhou  
*Y. Luo, J. Zhang, Q. Zeng et al.*

ScanSAR Interferometry Application in Dangxiong, Tibet  
*J. Jia, Q. Zeng & J. Jiao*

Detection of Artificial Corner Reflector on SAR Images  
*L. Gong, J. Zhang, Q. Zeng et al.*

Application of Permanent Scatterers Technique on Movement Monitoring of Damxiong Active Fault  
*W. Jiang, J. Zhang, L. Gong & Y. Luo*

Monitoring the Deformation of Pre-Landslide on Yemaomian in Three Gorges Area in China by Differential SAR Interferometry  
*X. Cui, Q. Zeng, Y. Li & J. Jian*

Precision Estimation and Geomorphological Analysis of DEM of Damxung-Yangbajain Tibet Acquired by InSAR  
*Y. Dai, J. Ren, X. Shen et al.*

Establishment of Zigui GPS-CR Landslide Monitoring Network in the Three Gorges Reservoir Area  
*H. Xue, G. Liu Genyou, Q.-M Zeng et al.*

## **Monitoring Seismic Activity (id. 2577)**

Present-Day Deformation across the Haiyuan Fault (Gansu, China), Measured by SAR Interferometry  
*O. Cavalié, C. Lasserre, M.-P Doin et al.*

## **Terrain Measurement (id. 2567)**

DEM Retrieval and Landslide Monitoring in Badong, Three Gorges, China by Means of InSAR Partially Coherent Targets  
*D. Perissin, F. Rocca & T. Wang*

Reproduction of InSAR Atmospheric Signal Using GPS Data Based on Topography-Dependent and Turbulent Mixing Model  
*X. Song, D. Li & M. Liao*

A New Method of Identification of Stable Pointwise Target in Small SAR Dataset  
*L. Lu, M. Liao, C. Wang et al.*

Coherent Target Analysis for Long-Term Deformation Monitoring  
*X. Tian, L. Lu, M. Liao et al.*

Coherence Decomposition Analysis, a Case Study in Three Gorges Area, China  
*T. Wang, M. Liao, D. Perissin & F. Rocca*

## **EO AND SPORT EVENTS**

### **Case Study Athens (id. 3362)**

Use of Satellite and Ground Data for the Assessment of the Effect of the 2004 Olympic Games to the Urban Environment of Athens

*C. Cartalis, M. Stathopoulou, S. Iacovides et al.*

### **Case Study Beijing and Qingdao (id. 3362)**

Coastal Wind Analysis Based on Active Radar in Qingdao for Olympic Sailing Event

*X.-M. Li & S. Lehner*
