Knowledge for Tomorrow

Outline

1. TerraSAR-X mission
 - a. TSX/TDX introduction
 - b. System monitoring
 - c. Radiometric stability
2. TanDEM-X mission
 - a. Global DEM quality
 - b. Change DEM
3. Future missions
 - a. Tandem-L
 - b. HRWS

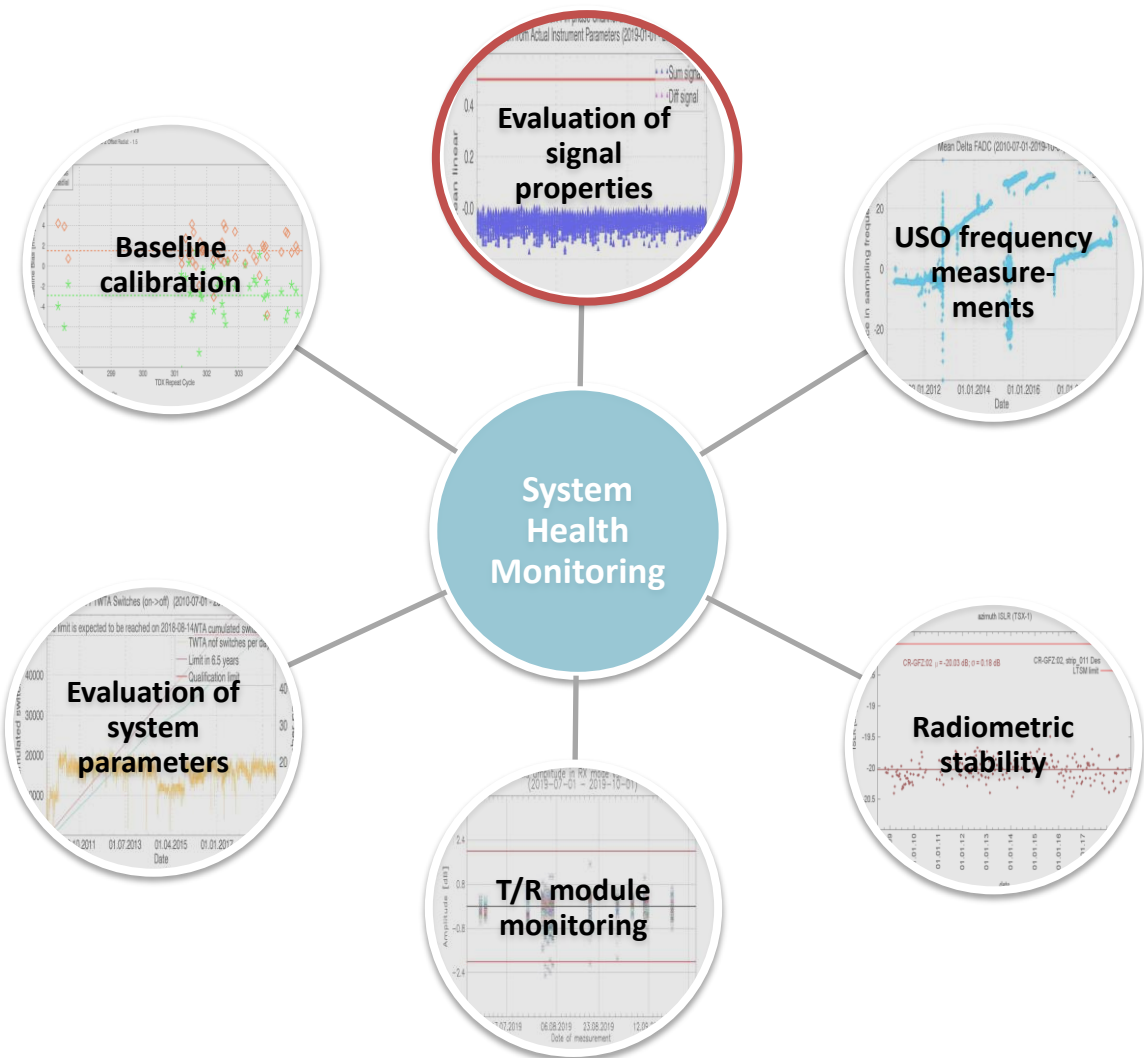

TerraSAR-X Mission

- Mono-static imaging of the Earth's surface
- Multi-mode highly flexible operation (Stripmap, ScanSAR, Spotlight)
- Various applications (ATI, DInSAR, PolInSAR)

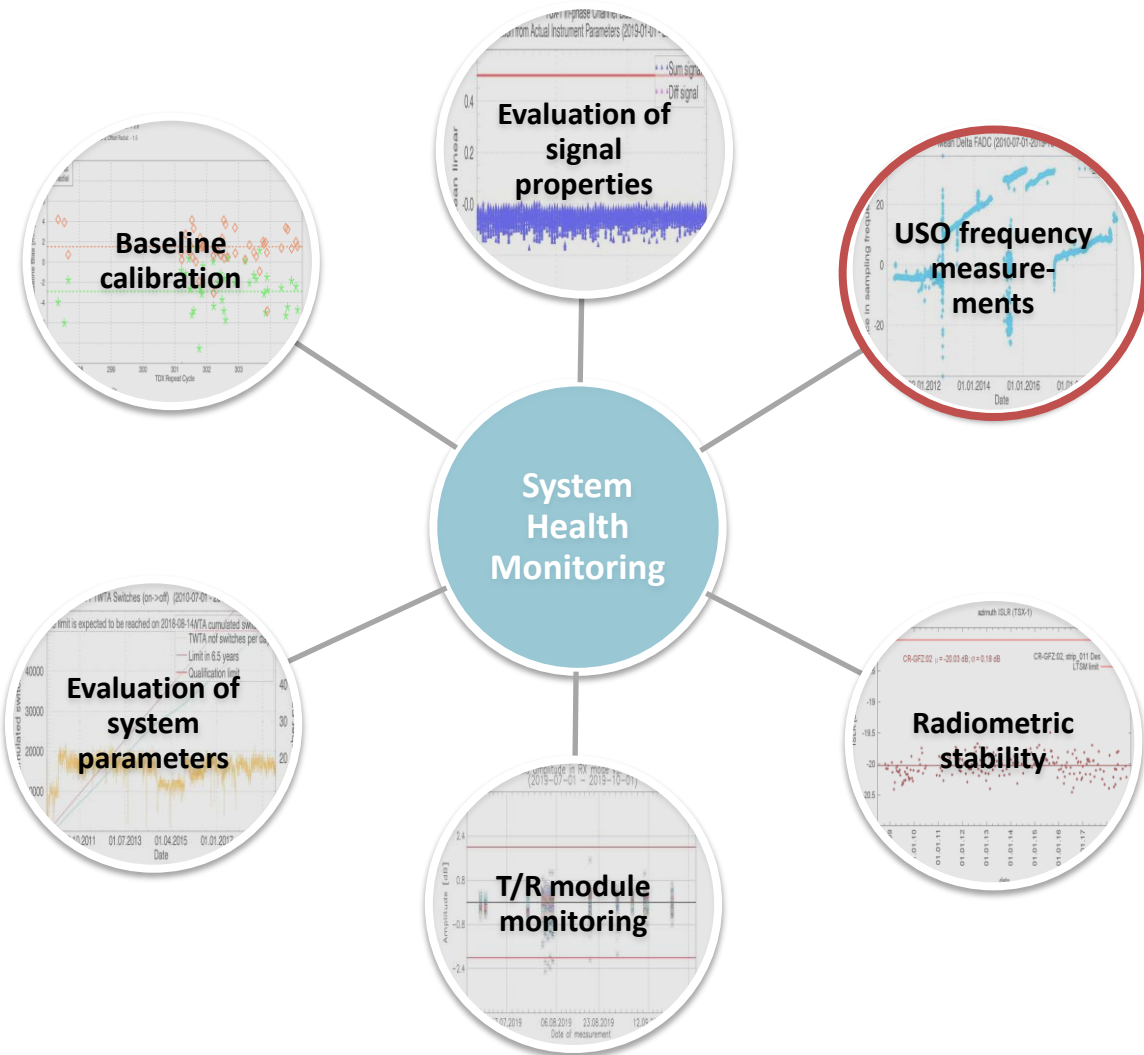

System Health Monitoring

In-phase/quadrature bias

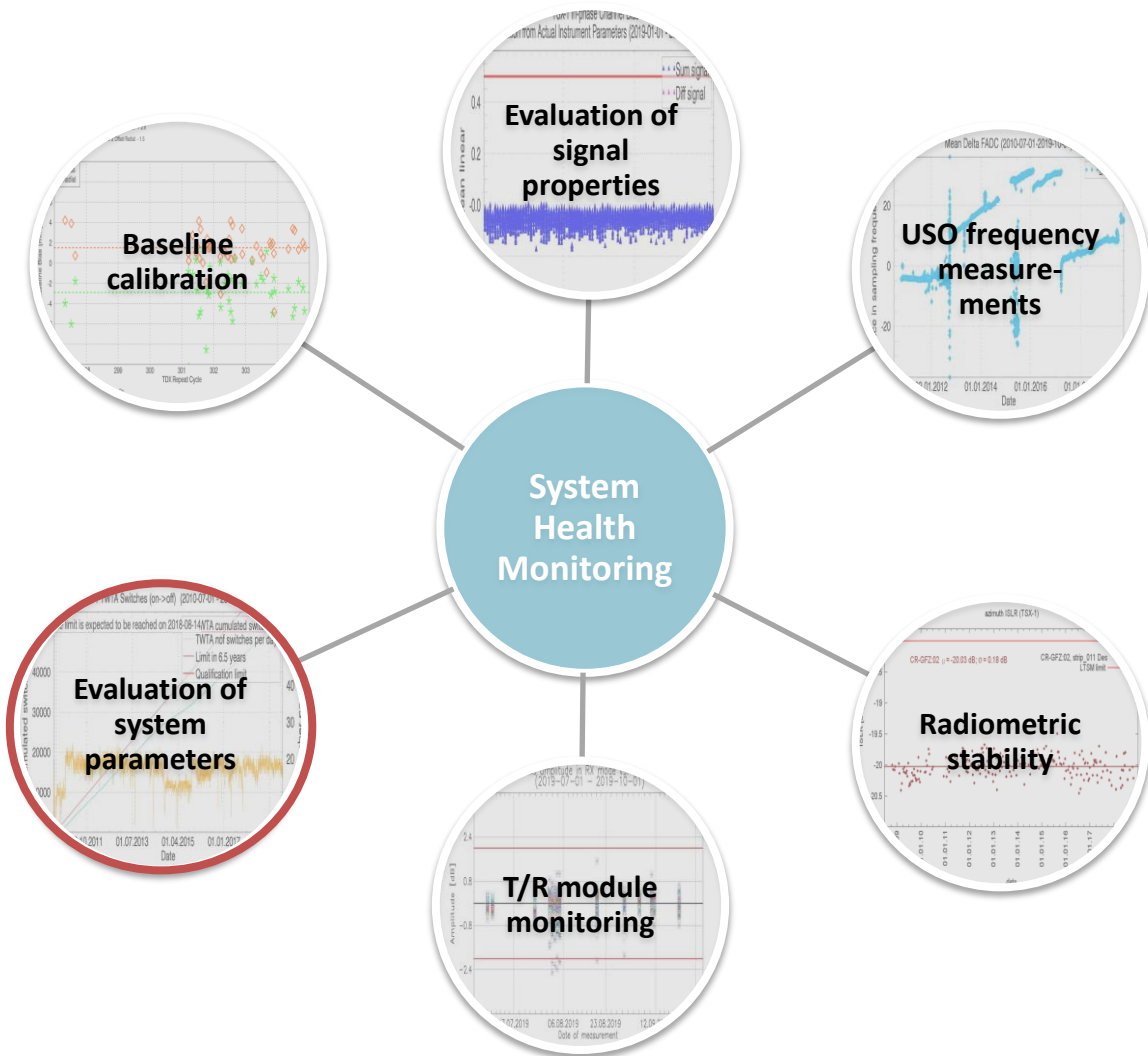

System Health Monitoring

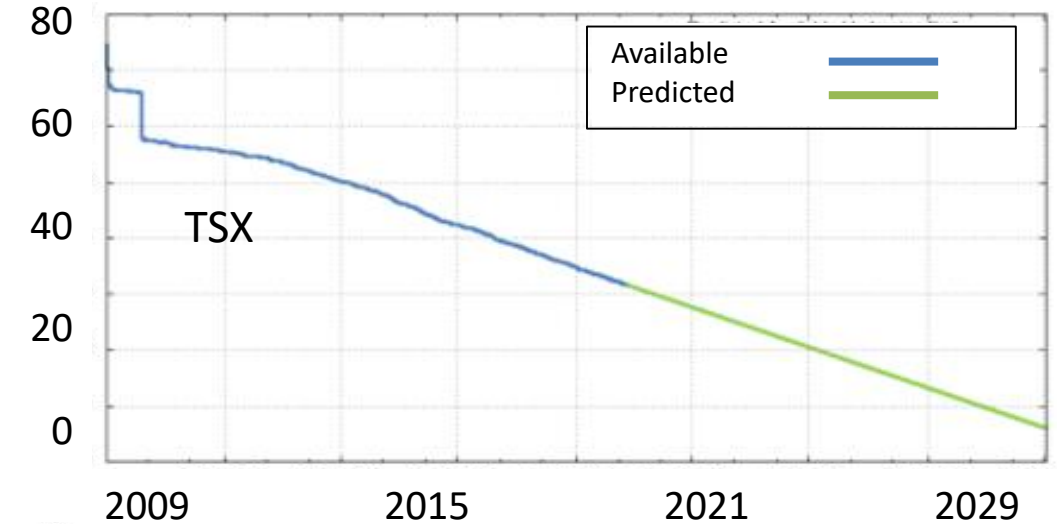

ADC Sampling Frequency - Absolute and relative Measurements

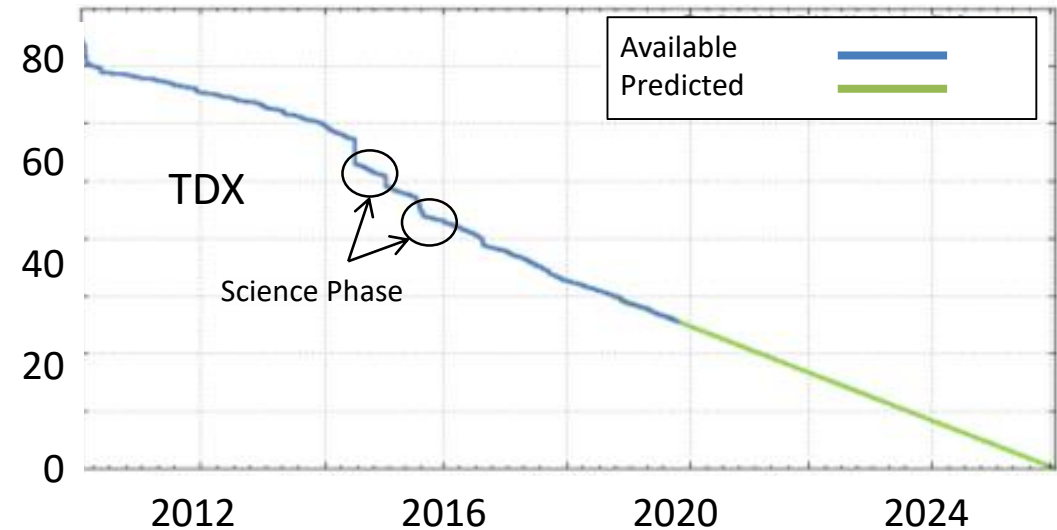

System Health Monitoring

Hydrazine mass [kg]

Hydrazine mass [kg]

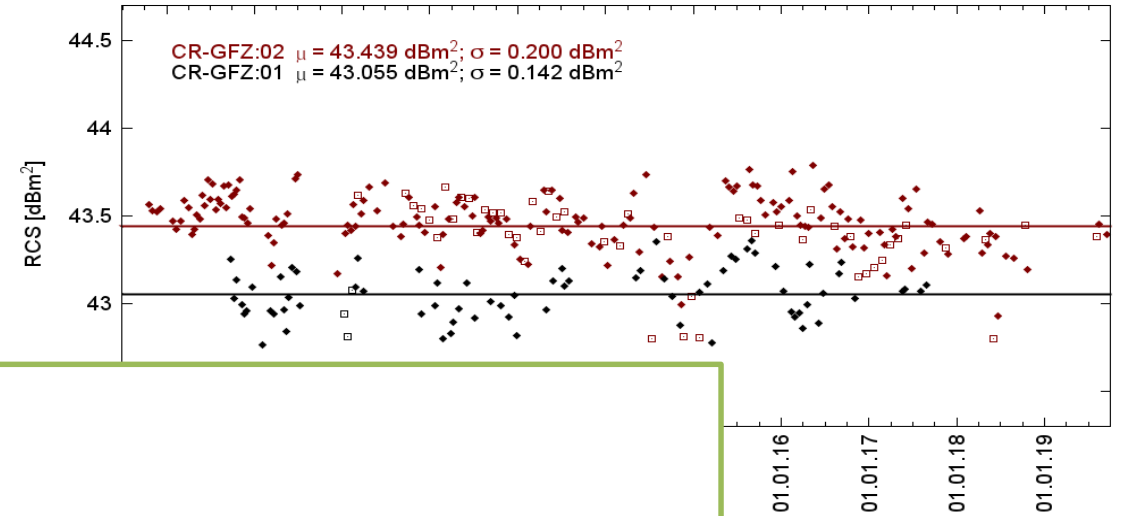

System Health Monitoring

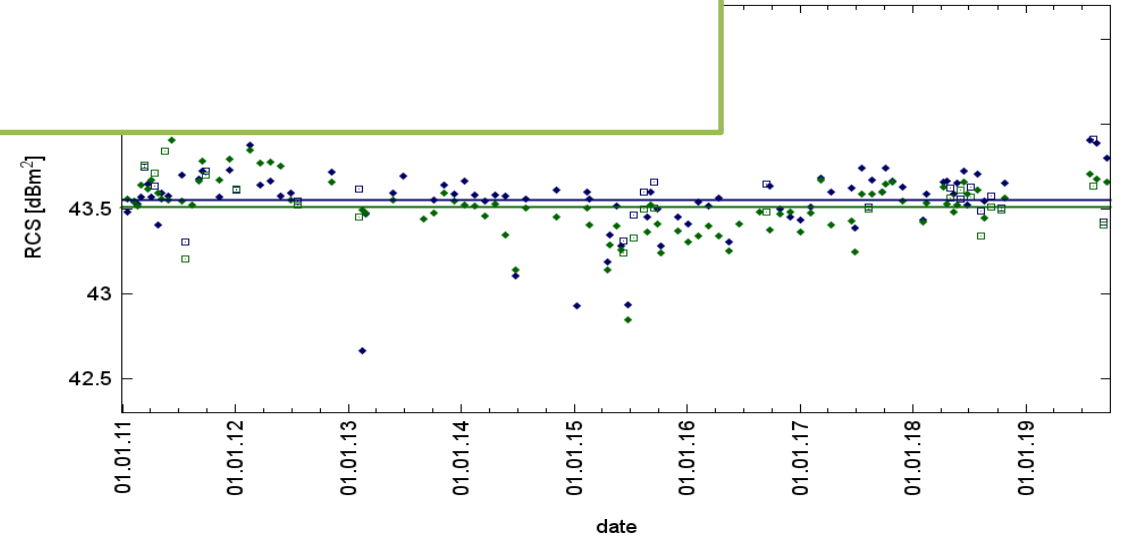

Stable SAR product quality since launch

Radar cross section (TSX)

(TDX)

TanDEM-X Mission

- Formation flight → bi-static acquisitions
- Generation of Digital Elevation Models

Global DEM

1st Global Coverage

- Small baseline (~280 m)
- HoA* ~ 50 m

2nd Global Coverage

- Increased baseline (~350 m)
- HoA* ~ 35 m

Combination:

- Dual Baseline Phase Unwrapping
- Improved Height Accuracy

3rd- 4th Year Acquisitions

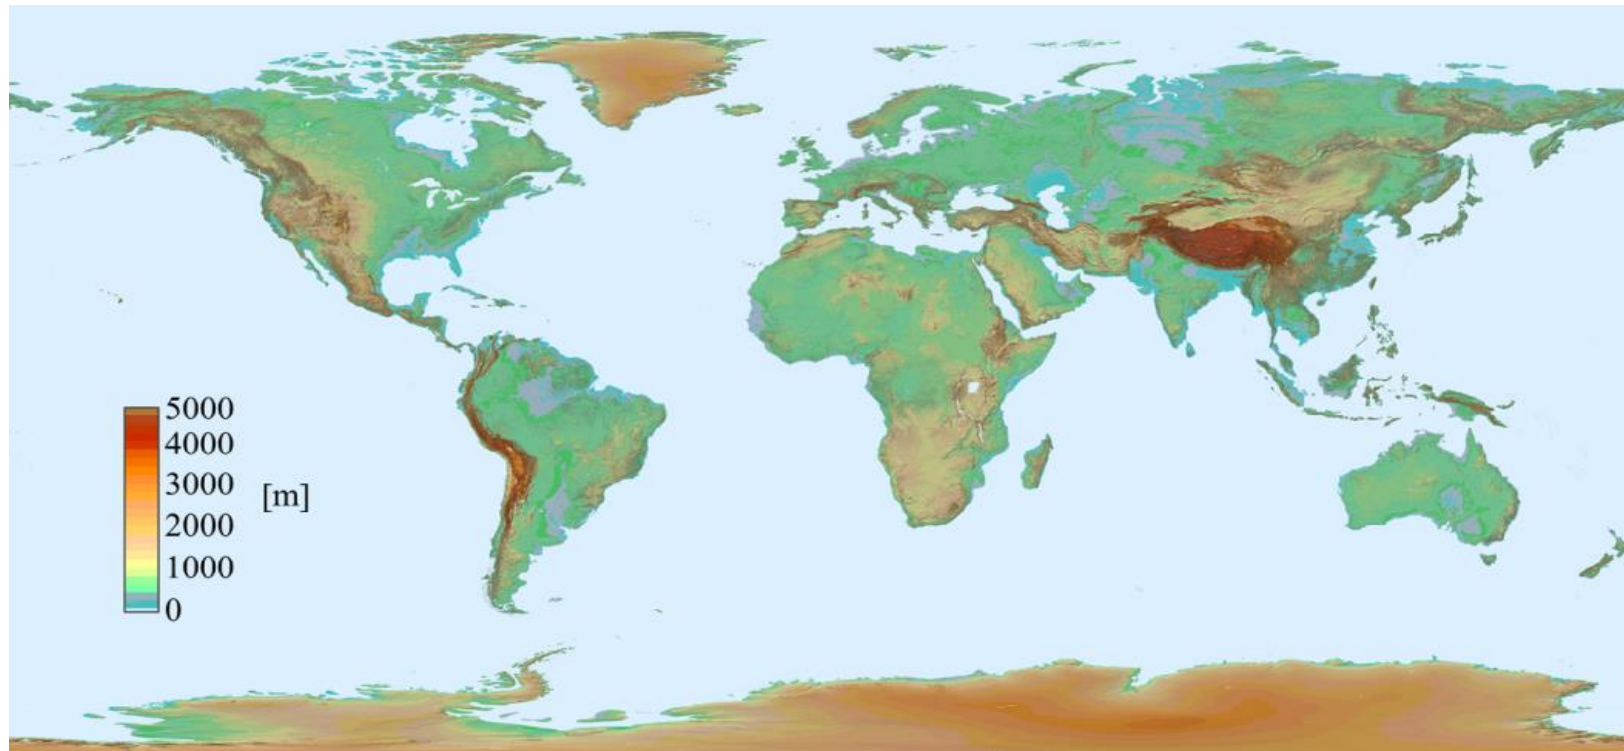

- Antarctica in left looking
- Difficult terrain to account for shadow & layover
=> Deserts, mountains
=> Different viewing geometry

*HoA: Height of Ambiguity $\leftrightarrow 2\pi$ Interferometric Phase

Global DEM

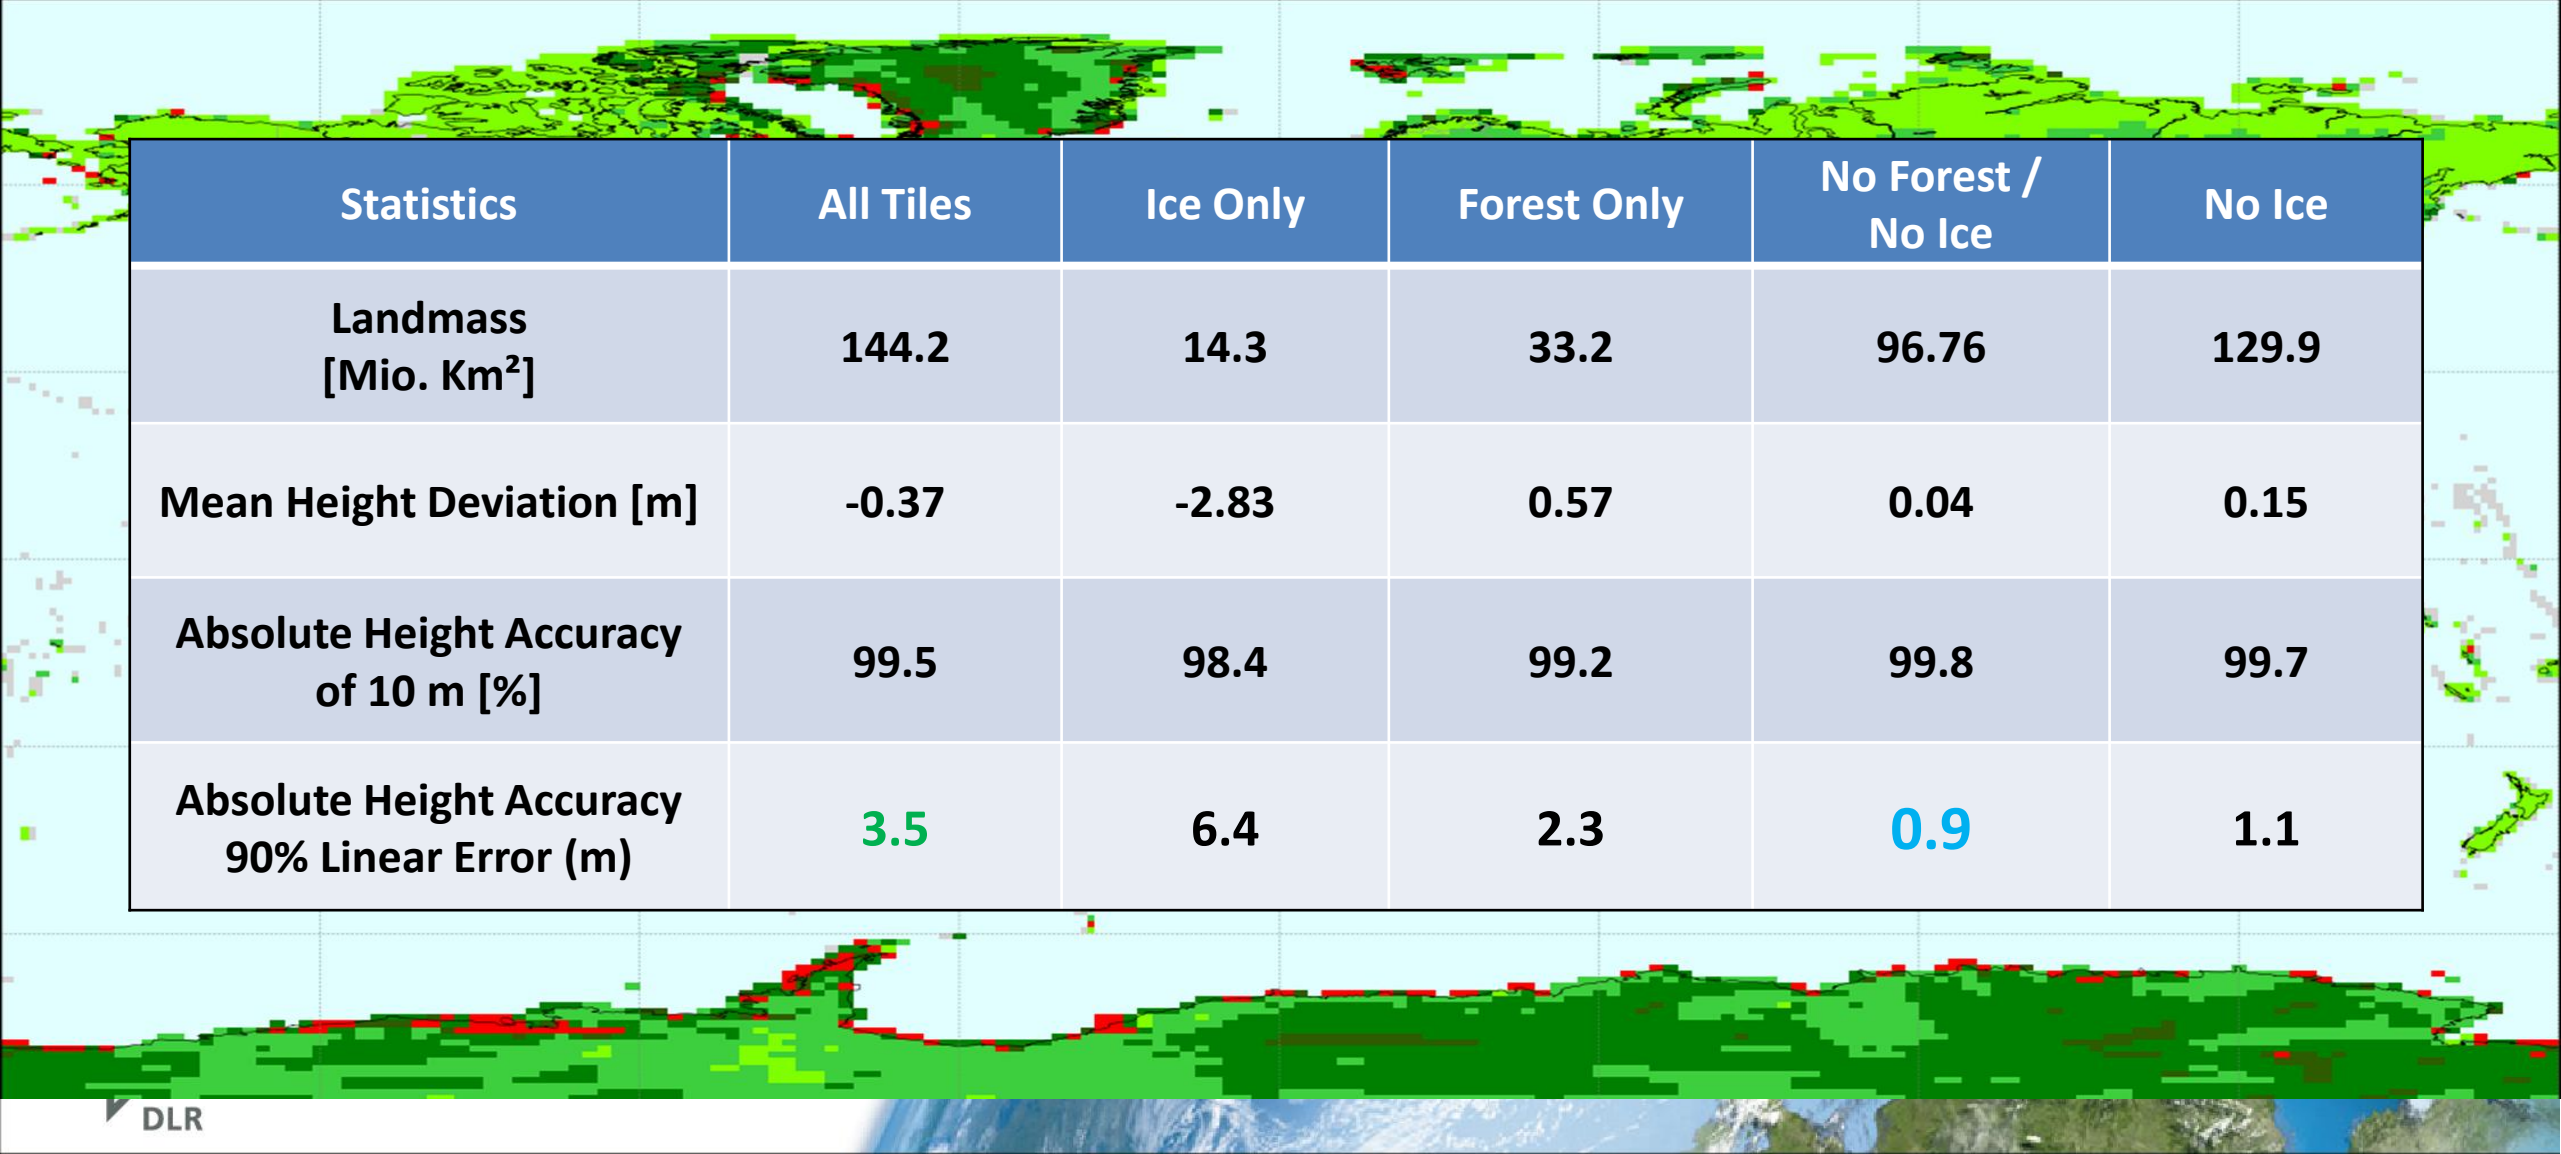

September 2016 completion of the final global DEM product
→ ~ 20,000 tiles (1° x 1°) with 12 m posting at equator
tandemx-science.dlr.de

September 2018 release of a free of charge version with 90 m posting
→ 3 million tiles downloaded
geoservice.dlr.de

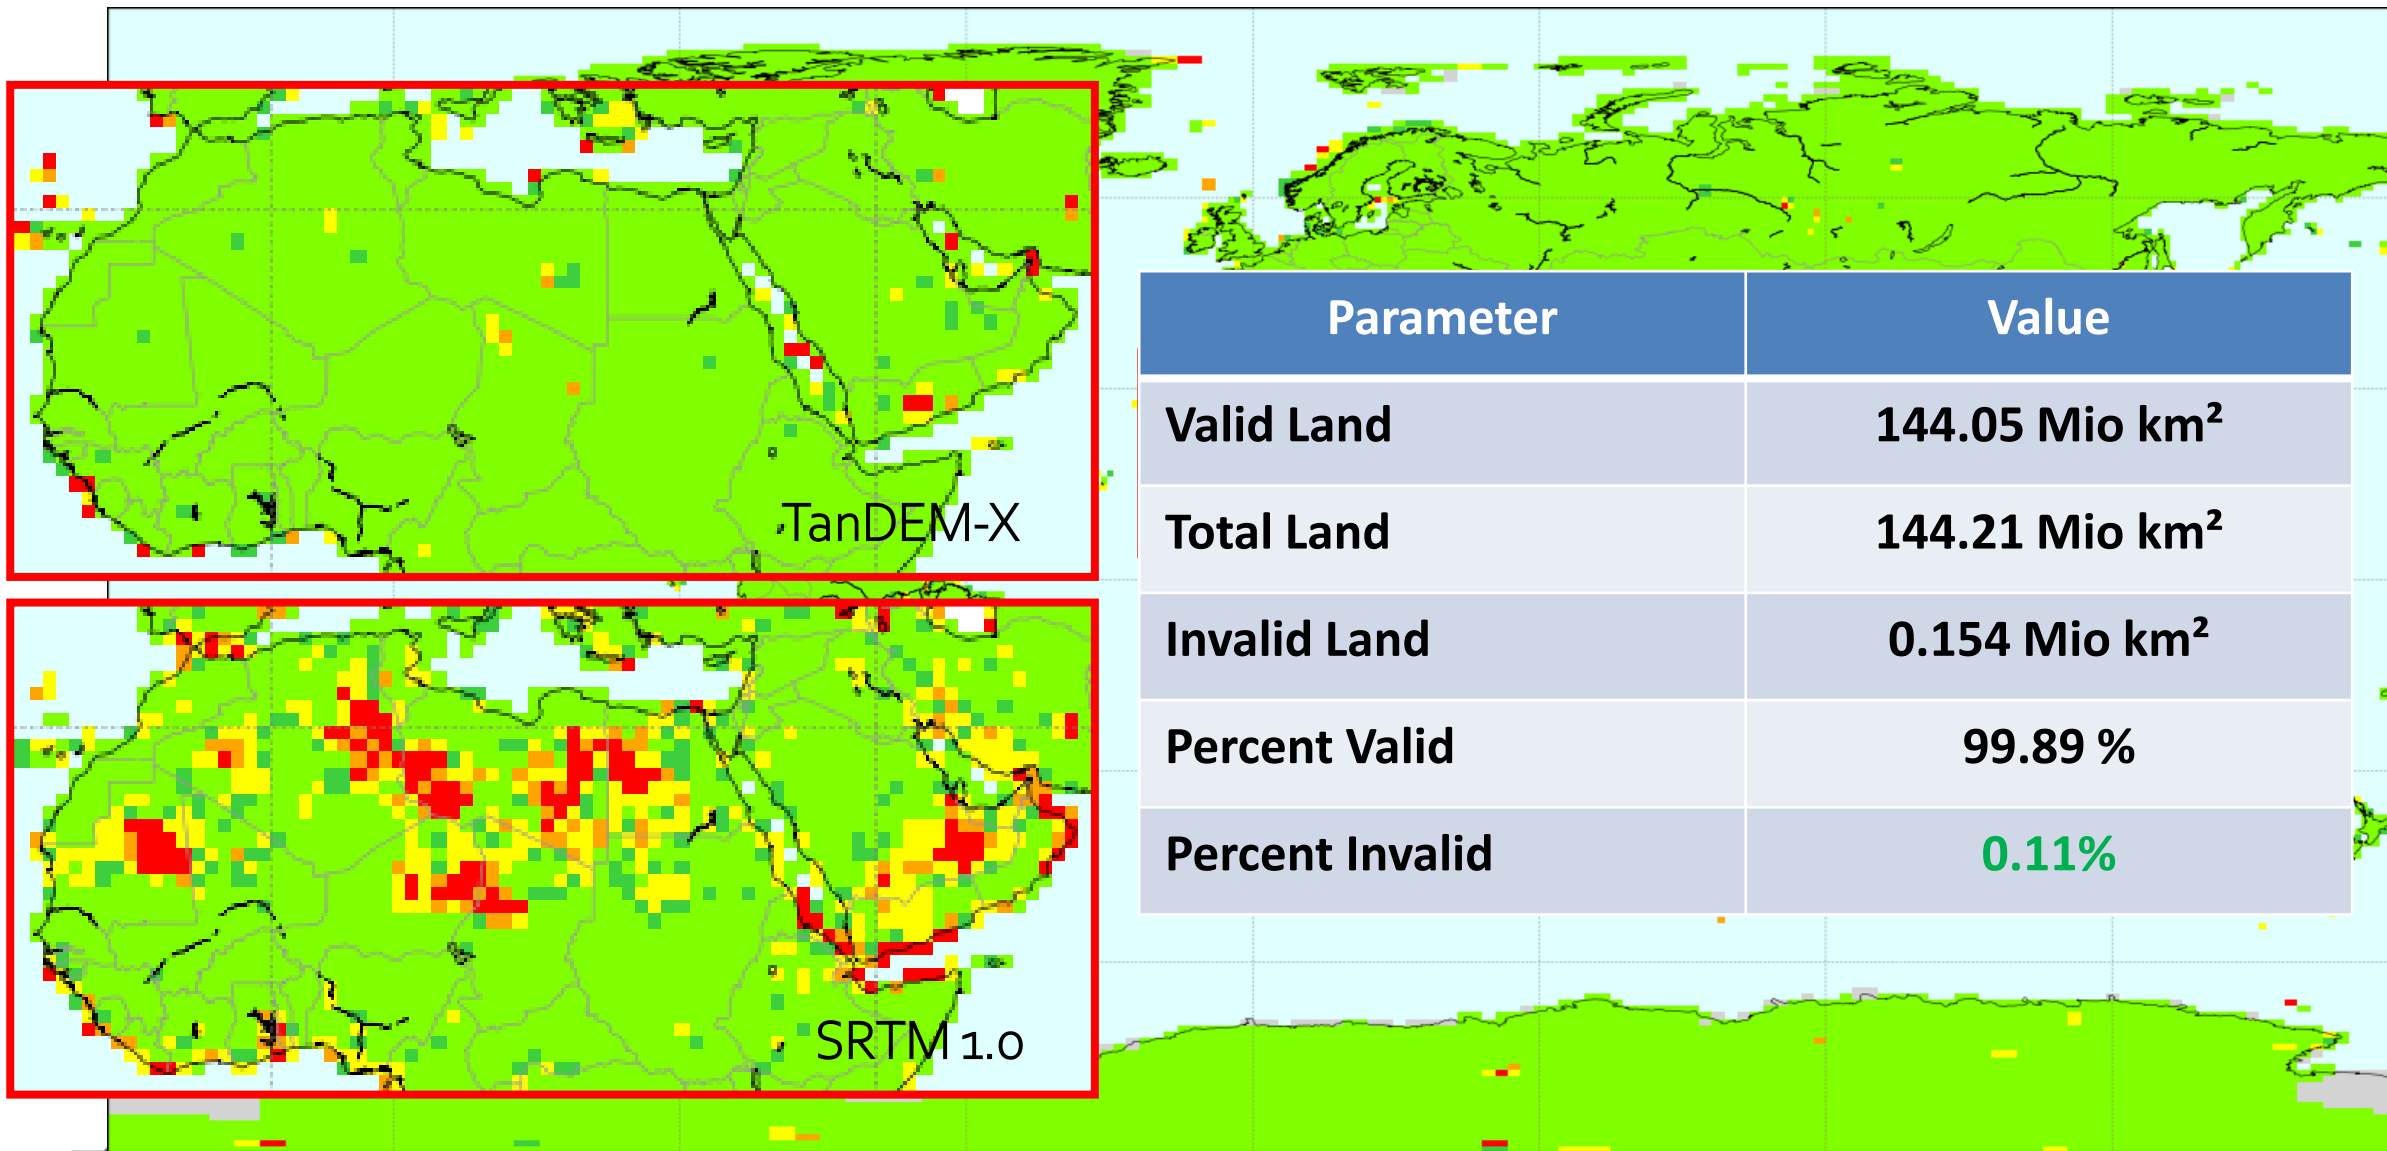

Absolute Height Accuracy

TanDEM-X DEM – ICESat (specification: < 10 m global, 90% confidence level)

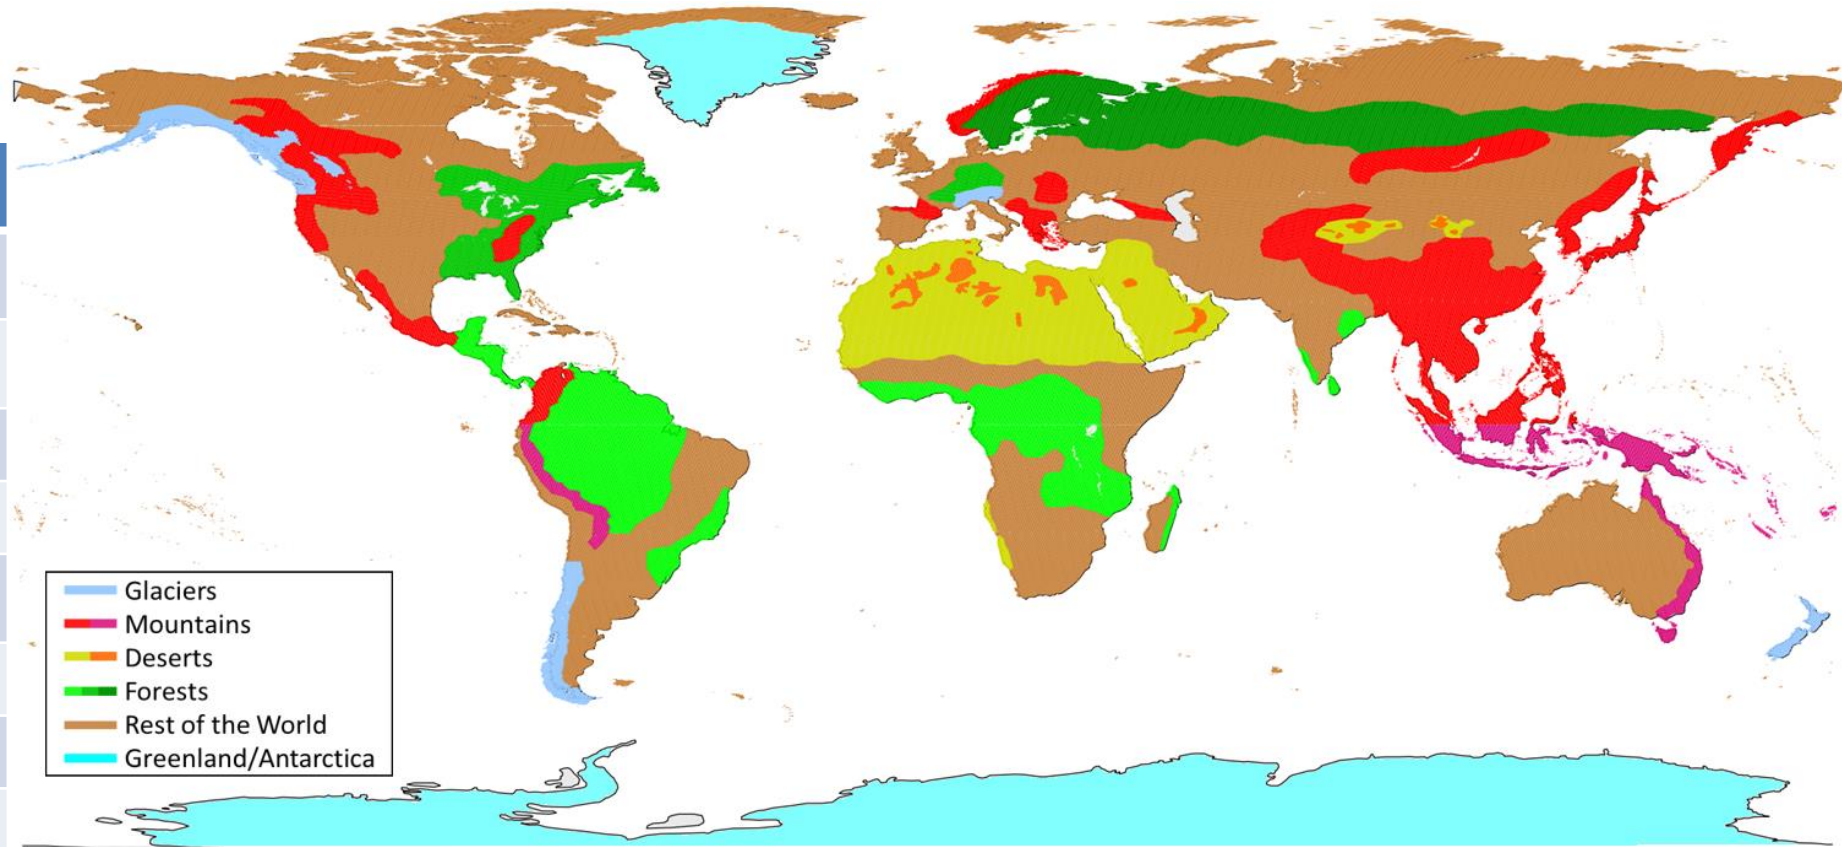

Statistics	All Tiles	Ice Only	Forest Only	No Forest / No Ice	No Ice
Landmass [Mio. Km ²]	144.2	14.3	33.2	96.76	129.9
Mean Height Deviation [m]	-0.37	-2.83	0.57	0.04	0.15
Absolute Height Accuracy of 10 m [%]	99.5	98.4	99.2	99.8	99.7
Absolute Height Accuracy 90% Linear Error (m)	3.5	6.4	2.3	0.9	1.1

TanDEM-X Data Coverage – Global Voids Performance

Change DEM

Region	Coverages	Season	Height of Ambiguity	Inc. Angle Range
Mountains with Forest	2	Local summer	55 - 75 m (1 st) 45 - 53 m (2 nd)	27 - 49 deg
Glaciers	2	Local winter	55 - 75 m (1 st) 45 - 53 m (2 nd)	29 - 47 deg
Tropical forest	1	Year round	50 - 60 m	27 - 49 deg
Temperate & boreal forest	1	Local summer	50 - 55 m	27 - 49 deg
Deserts with Mountains	2	Year round	55 - 75 m (1 st) 45 - 55 m (2 nd)	27 - 49 deg
Deserts	1	Year round	23 - 45 m	14 - 38 deg
Permafrost area	1	Local winter	35 - 45 m	29 - 47 deg
Rest of the world	1	Year round	35 - 45 m	27 - 49 deg

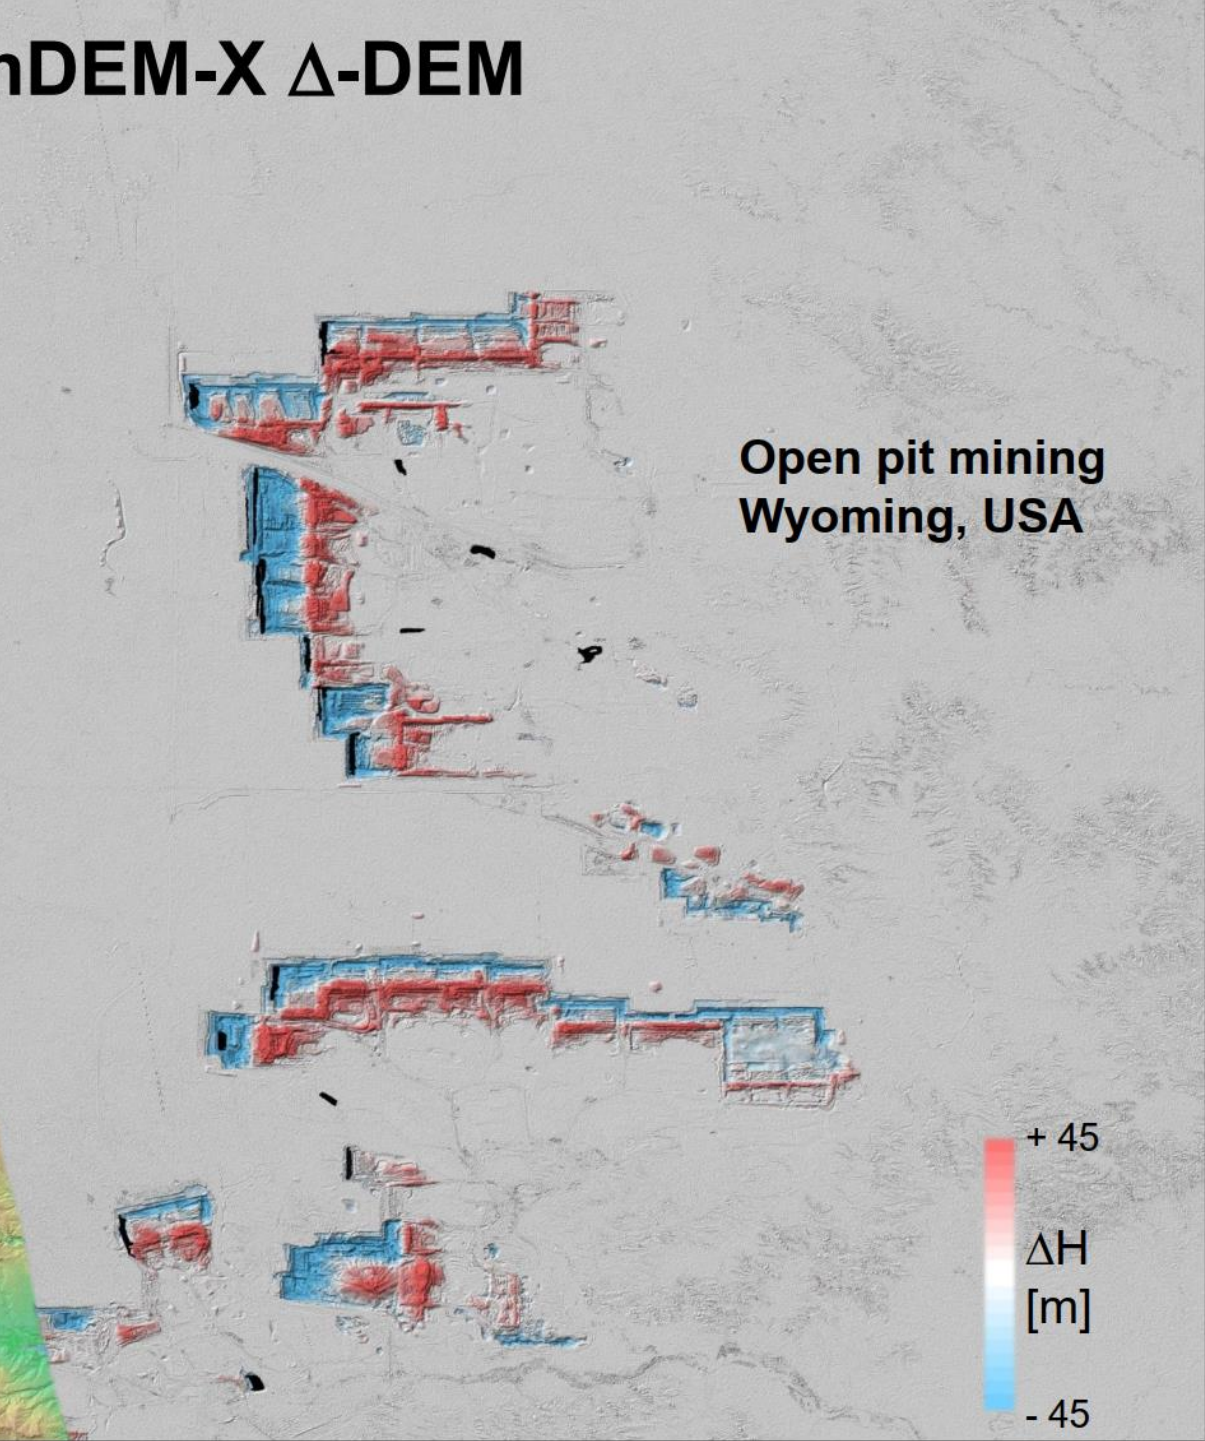

- Division of landmasses according to terrain type
- Acquisition plan adapted to seasonal and baseline requirements
- Improved processing methods → global DEM accuracy with fewer acquisitions

TanDEM-X global DEM

TanDEM-X Δ -DEM

Open pit mining
Wyoming, USA

Tandem-L

Environmental and Climate Mission
Monitoring Earth System Dynamics

Imaging capabilities

TerraSAR-X/TanDEM-X

1 global coverage / year

Tandem-L

2 global coverages / 8 days

1

Days

- 3-D forest structure
- Forest height and biomass
- Tomography

- Earthquakes
- Volcanoes and tectonics
- Subsidence

- Soil moisture
- Flooding
- Ocean currents

- Permafrost
- Sea ice extent
- Glaciers and ice cap dynamics

HRWS – High Resolution Wide Swath

Mono-static applications:

- High resolution infrastructure monitoring
- Large area maritime surveillance
- Target recognition
- Improved NRT capabilities

	Resolution [m ²] (Rg x Az)	Scene Size [km ²] (W x L)	Polarization
Staring SL „Theatre“	0.25 x 0.25	10 x 10	Single
Sliding SL	0.25 x 0.25	20 x 20	Single
Sliding SL	0.25 x 0.25	15 x 15	Quad
Sliding SL	0.5 x 0.5	30 x 30	Single
Strip-Map	1 x 1	50	Single
Strip-Map	2 x 2	30	Quad
Strip-Map	3 x 3	80	Single
Scan-SAR	2 x 8	120	Quad
Scan-SAR	2 x 16	540	Single

HRWS – High Resolution Wide Swath

Mono-static applications :

- High resolution infrastructure monitoring
- Large area maritime surveillance
- Target recognition
- Improved NRT capabilities

Multi-static applications :

- On-demand regional DEMs
- 3D reconstruction using SAR Tomography
- 3D/4D change detection
- Sea ice topography
- Ground Moving Target Indication (GMTI)
