PROBA-V CLOUD DETECTION:
VALIDATION OF 1KM FROM C3S
DATASET

Scope

- C3S processed new cloud algorithm (code and network was shared)
- All PROBA-V segment data was processed for single year (=2015)
- Quick validation was performed by VITO's Validation team to answer action A11.4

- Objective: Check for temporal/seasonal anomalies

Results = No anomalies
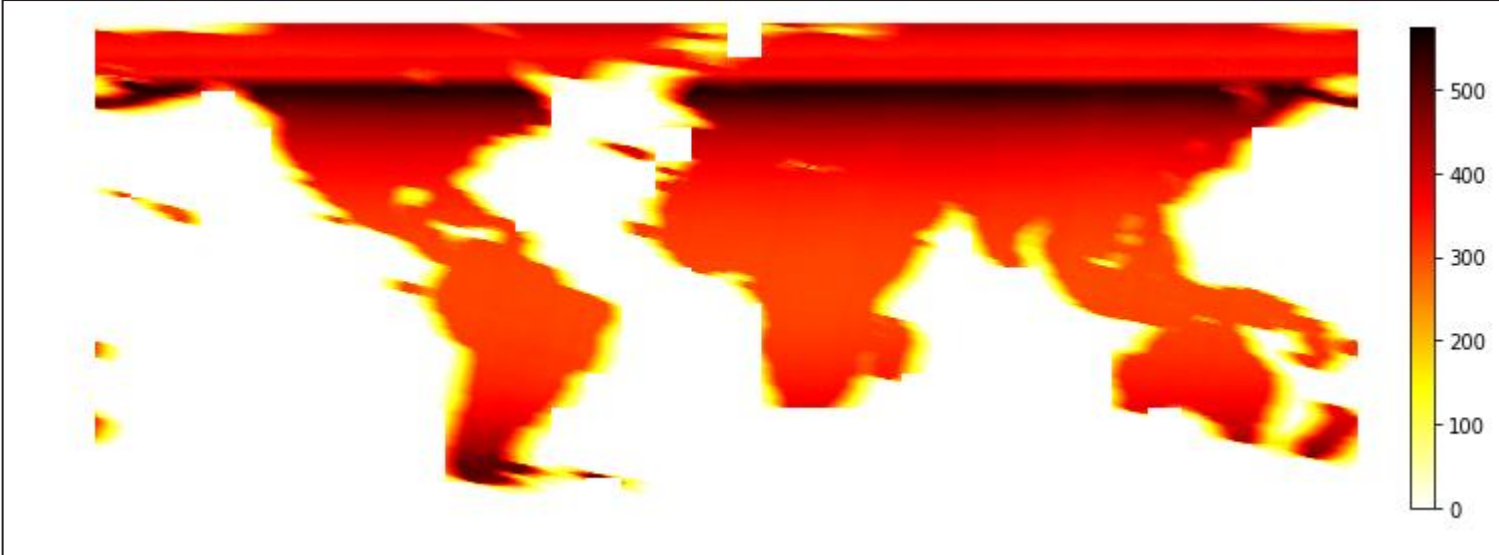

Count of observations

% of 'good' observations

Results = No anomalies

Count of observations

% of 'cloud' observations
