Scientific Committee

R. Bamler, DLR German Aerospace Center (Germany)
P. Briole, Ecole Normale Supérieure (France)
M. Crosetto, IG Institut de Geomatica (Spain)
M. Eineder, DLR German Aerospace Center (Germany)
E. Fielding, JPL-Caltech/Jet Propulsion Laboratory (United States)
Y. Fukushima, Kyoto University (Japan)
M. Furuya, Hokkaido University (Japan)
R. Hanssen, Delft University of Technology (Netherlands)
S. Jonsson, KAUST (Saudi Arabia)
R. Lanari, IREA-CNR (Italy)
C. Lasserre, Ecole Normale Supérieure (France)
P. Lundgren, Jet Propulsion Laboratory (United States)
J. Mallorqui, Universitat Politècnica de Catalunya (Spain)
A. Monti Guarnieri, POLIMI - Politecnico di Milano (Italy)
A. Moreira, DLR German Aerospace Center (Germany)
B. Parsons, University of Oxford (United Kingdom)
P. Pasquali, Sarmap s.a. (Switzerland)
G. Peltzer, Jet Propulsion Laboratory (United States)
D. Perissin, Chinese University of Hong Kong (China)
G. Puglisi, INGV (Italy)
E. Rignot, Jet Propulsion Laboratory (United States)
F. Rocca, POLIMI - Politecnico di Milano (Italy)
J. Sun, China Seismological Bureau (China)
H. Rott, ENVEO, Environmental Earth Observation OEG (Austria)
A. Shepherd, University of Leeds (United Kingdom)
J. Sun, China Seismological Bureau (China)
D. Small, University of Zurich (Switzerland)
J.C. Souyris, CNES (France)
T. Tebaldini, POLIMI - Politecnico di Milano (Italy)
U. Wegmüller, Gamma Remote Sensing AG (Germany)
T. Wright, University of Leeds (United Kingdom)

ESA Organising Committee

M. Engdahl, Y.-L. Desnos, P. Potin, N. Miranda, B. Rommen, B. Rosich & F.M. Seifert, ESA-ESRIN

<i>Publication</i>	Proc. of 'Fringe 2011 Workshop', Frascati, Italy (ESA SP-696, January 2012)
<i>Edited by</i>	L. Ouwehand ESA Communications
<i>Published and distributed by</i>	ESA Communications ESTEC, Noordwijk, The Netherlands

Contents

InSAR Methods

Chair: M. Eineder & F. Rocca

Generation and Calibration of High Resolution DEM from Single Baseline Spaceborne Interferometry:
The ‘Split-Swath’ Approach

D. Giudici, A. Monti Guarnieri, D. Mapelli & F. Rocca

Interferometric Multi-Chromatic Analysis of High Resolution X-Band Data

F. Bovenga, V. M. Giacobazzo, A. Refice et al.

Multi-Pass ERS-Envisat Cross-Interferometry Methods and Results

U. Wegmüller, C. Werner, O. Frey et al.

Design of a Geosynchronous SAR System for Water-Vapour Maps and Deformation Estimation

A. Monti Guarnieri, L. Perletta, F. Rocca et al.

Earthquakes & Tectonics

Chair: Y. Fukushima & M. Furuya

Postseismic Deformation Following the 2010 Haiti Earthquake: Time-Dependent Surface
Subsidence Induced by Groundwater Flow in Response to a Sudden Uplift

S. Wdowinski & S.-H. Hong

Coseismic Deformations of the 2011 Tohoku, Japan, Earthquake and Triggered Events Derived
from ALOS/PALSAR

M. Hashimoto, Y. Fukushima, Y. Takada et al.

Wide Area Deformation Map Generation with TerraSAR-X Data: The Tohoku-Oki
Earthquake 2011 Case

N. Yague-Martinez, M. Eineder, C. Minet & B. Schättler

PollnSAR & Tomography

Chair: S. Tebaldini & C. López-Martinez

Polarimetric SAR Tomography with TerraSAR-X by Means of Distributed Compressed Sensing

E. Aguilera, M. Nannini, A. Antonello et al.

3D SAR Tomography of the Paracou Forest: Methods and Results

M. Mariotti d’Alessandro & S. Tebaldini

Underlying Topography Estimation and Separation of Scattering Contributions over Forests
Based on PollnSAR Data

C. López-Martínez, A. Alonso, X. Fàbregas & K.P. Papathannassiou

Ice and Snow

Chair: J. Mouginot & N. Gourmelen

Detecting Ice Motion in Grove Mountains, East Antarctica with ALOS/PALSAR and Envisat/ASAR data

X. Tian, M. Liao, C. Zhou & Y. Zhou

Ice Velocity Observations of Greenland's Jacobshavn Glacier Using ERS-2 3-Day Repeat Campaigning Data

A.V. Sundal, A. Sheperd, N. Gourmelen & J. Park

Atmosphere

Chair: R. Hanssen & F. Rocca

Validation of Centimeter-Level SAR Geolocation Accuracy after Correction for Atmospheric Delay Using ECMWF Weather Data

X. Cong, M. Eineder, R. Brcic et al.

Terrain Subsidence & Landslides

Chair: M. Crosetto & P. Pasquali

Surface Deformation of the Whole Netherlands after PSI Analysis

M. Caro Cuenca, R. Hanssen, A. Hooper & M. Arikan

Subsidence Mapping in Jakarta - PSI Processing of L-Band ALOS PALSAR Data

R. Holley, R. Burren & H.Z. Abidin

TSX InSAR Assessment for Slope Instabilities Monitoring in Alpine Periglacial Environment (Western Swiss Alps, Switzerland)

C. Barboux, R. Delaloye, T. Strozzi et al.

Long Term Analysis of Strong Non-Linear Deformations Induced by Coal Mining Using the SBAS Technique

K. Goel, N. Adam & C. Minet

Quantification of Subsidence Rates Associated with Groundwater Flow Using SAR Interferometry

J. Catalao, G. Nico, V. Conde & J.M. Miranda

Methods – Unwrapping

Chair: M. Crosetto & M. Costantini

New Improvements of the EMCF Phase Unwrapping Algorithm for Surface Deformation Analysis at Full Spatial Resolution Scale

A. Pepe, M. Manunta, L. Euillades et al.

Methods – DInSAR/PSI

Chairs: J. Mallorqui & R. Hanssen

Wide Area Persistent Scatterer Interferometry: Algorithms and Examples

N. Adam, F. Rodriguez Gonzalez, A. Parizzi & W. Liebhart

TOPS Differential SAR Interferometry with TerraSAR-X

L. Marotti, P. Prats, R. Scheiber et al.

Combination of X-Band High Resolution SAR Data from Different Sensors to Produce Ground Deformation Maps

J. Duro, M. Gaset, F.N. Koudogbo & A. Arnaud

Deformation Estimation in Non-Urban Areas Exploiting High Resolution SAR Data

K. Goel & N. Adam

Deformation Rate Estimation on Changing Landscapes Using Temporarily Coherent Point InSAR

L. Zhang, X. Ding & Z. Lu

Detecting Regular Patterns in Urban PS Sets

A. Schunert & U. Soergel

Compact Active Transponders for SAR Interferometry: Experimental Validation

P. Mahapatra, R. Hansen, S. Samiei-Esfahany et al.

Volcanoes

Chair: Y. Fukushima & G. Puglisi

Subsidence of the Collapsed Caldera of Miyakajima, Japan, 2006-2011

Y. Aoki & E.K. Montgomery-Brown

High Resolution Monitoring of Campi Flegrei (Naples, Italy) by Exploiting TerraSAR-X Data: An Application to Solfatara Crater

C. Minet, K. Goel, I. Aquino et al.

Methods – General

Chair: U. Wegmüller & A. Monti-Guarnieri

On the Effect of Reference Frame Motion on InSAR Deformation Estimates

H. Bähr, S. Samiei-Esfahany & R.F. Hanssen

Revising Vegetation Scattering Theories: Adding a Rotated Dihedral Double Bounce Scattering to Explain Cross-Polarimetric SAR Observations over Wetlands

S.-H. Hong & S. Wdowski

Recent Advances on InSAR Temporal Decorrelation: Theory and Observations Using UAVSAR

M. Lavallo, S. Hensley & M. Simard

Mining Very High Resolution InSAR Data Based on Complex-GMRF Cues and Relevance Feedback

J. Singh, A. Popescu, M. Soccorsi & M. Datcu

Poster Sessions

Ground-Based InSAR

MODE TInSAR: An ESA Incubation Project Dedicated to the Terrestrial SAR Interferometry

P. Mazzanti, A. Brunetti & G. Scarascia Mugnozza

Design of the Ground Based Array for the TropiScat Experiment

Ho Tong Minh Dinh, S. Tebaldini & F. Rocca

Terrestrial SAR Interferometry Monitoring of a Civil Building in the City of Rome

P. Mazzanti & I. Cipriani

2D Atmospheric Artifact Compensation with Multiple Regression Model in Ground-Based SAR over Mountainous Areas
X. Fabregas, R. Iglesias, A. Aguasca & J. Gili

Earthquakes and Tectonics

Co-Seismic Deformation Due to the Tohoku-Oki Earthquake Measured by Envisat-ASAR Data and GPS
F. Bovenga, D.O. Nitti, A. Ganas & K. Chousianitis

Haiti 2010 Earthquake: A 3D Deformation Analysis
G. Suresh, C. Minet, M. Eineder et al.

Co-Seismic Displacement of 24-March-2011 $M_w=6.8$ Mong Hpayak (Tar Lay) Earthquake, Myanmar
I. Trisirisatayawong, A. Hooper & A. Aobpaet

Polarimetric Interferometry, Tomography and other Advanced Topics

Three Dimensional SAR Tomography in Shanghai Using High Resolution Space-Borne SAR Data
L. Wei, T. Balz, K. Liu & M. Liao

An Improved Crosstalk Estimation Algorithm of Polarimetric and Interferometric SAR Calibration
H. Zhang, W. Lu, F. Wu et al.

Interferometric Processing of PALSAR Wide-Beam ScanSAR Data
C. Werner, U. Wegmüller, O. Frey & M. Santoro

Evolutions of Diff-Tomo for Sensing Subcanopy Deformations and Height-Varying Temporal Coherence
F. Lombardini & F. Cai

Urban 3D Reconstruction Using COSMO-SkyMed High-Resolution Data
F. Baselice, A. Budillon, G. Ferraioli et al.

Different Approaches for PSI Target Characterization for Monitoring Urban Infrastructure
P. Dheenathayalan, M. Caro Cuenca & R. Hanssen

A Modified Model Based SAR Target Decomposition Method for Polarimetric Data
Z. Shan, H. Zhang, C. Wang et al.

Statistical Edge Detection in Urban Areas Exploiting X-Band SAR Data
F. Baselice, G. Ferraioli & V. Pascazio

Surface Deformation of Alpine Terrain Derived by PS-InSAR Technique on the Siachen Glacier
J. Shi & L. Chang

Estimation of Ice Flow Velocity of Calving Glaciers Using SAR Interferometry and Feature Tracking
C. Zhou, Y. Zhou, E. Dongchen et al.

Terrain Subsidence and Landslides

Sinking Cities in Indonesia: Space-Geodetic Evidence of the Rates and Spatial Distribution of Land Subsidence
E. Chaussard, F. Amelung & H.Z. Abidin

Long Term, Operational Monitoring of Enhanced Oil Recovery in Harsh Environments with InSAR
S. Sato & M.D. Henschel

InSAR Study of Landslides in the Region of Lake Sevan-Armenia
A. Lazarov & D. Minchev

InSAR Assessment of Pipeline Stability Using Compact Active Transponders

J.K. Hole, R.J. Holley, G. Giunta et al.

Land Subsidence Monitoring in the Southern Spanish Coast Using Satellite Radar Interferometry

A.M. Ruiz, M. Caro, J.J. Sousa et al.

Uplift at Lesina Marina (Southern Italy) Revealed by PSI Techniques

A. Refice, F. Bovenga, G. Pasquariello et al.

The SBAS-DInSAR Approach for the Spatial and Temporal Analysis of Sinkhole Phenomena

F. Calò, G. Fornaro, M. Parise & G. Zeni

InSAR Time Series Analysis of Coal Mining in Zonguldak City, Northwestern Turkey

S. Abdikan, A. Hooper, M. Arikan et al.

Factors that have an Influence on Time Series

D. Notti C. Meisina, F. Zucca et al.

Monitoring the Stability of Levees with Time-Series Envisat ASAR Images

Y. Pei, M. Liao, T. Wang & L. Zhang

PSI Helps to Map Relative Susceptibility to Ground and Slope Instabilities in the Lanzhou

Loess Area of Gansu Province, China

J. Wasowski, F. Bovenga, D.O. Nitti et al.

DORIS FP7-EU Project: Exploitation of 20 Years DInSAR Data Archive for Landslide Monitoring

M. Manunta, F. Calò, L. Paglia et al.

Modeling of Small Scale Surface Deformation Based on DInSAR Result

R. Furuta

DInSAR Analysis of Aquifer Compaction Due to Ground Water Extraction in the Segura River Basin

P.J. González, J. Fernández, R. Tomás et al.

Non-Linear Land Subsidence in Morelia, Mexico, Imaged through Synthetic Aperture

Radar Interferometry

F. Cigna, B. Osmanoglu, E. Cabral-Cano et al.

Operational Validation of the Accuracy of InSAR Measurements over an Enhanced Oil Recovery Field

M.D. Henschel & B. Lehbass

Atmosphere

Atmospheric Effects Detection by Short Baseline Processing in RADARSAT Time Series over

Manaus City, Amazon Region

F.L.G. Ramos & G. Nico

On the Mitigation of Atmospheric Phase Delay Artefacts in Interferometric SAR Time Series

P. Mateus, G. Nico, R. Tomé et al.

Monitoring Urban Infrastructure with an Adaptive Multilooking InSAR Technique

J. Eppler & B. Rabus

Atmospheric Phase Delay Estimation from Multiple SAR Interferometry Measurements

Y. Fukushima

Atmospheric Water Vapor Determination by the Integration of InSAR and GNSS Observations

F. Alshawaf, T. Fuhrmann, B. Heck et al.

Separating Non-Linear Deformation and Atmospheric Phase Screen (APS) for InSAR Time Series Analysis Using Least-Squares Collocation
S. Liu, R.F. Hanssen, S. Samiei-Esfahany et al.

Methods - General

Landslides Forecasting Analysis by Displacement Time Series Derived from Satellite InSAR Data: Preliminary Results
P. Mazzanti, A. Rocca, F. Bozzano et al.

Monitoring Ground Deformation on Carbon Sequestration Reservoirs in North America
W. Zhao, F. Amelung & T. Dixon

SAR Interferometry with Seasonally Changing Snow Cover
A. Wickramanayake, S. Hobbs, M. Henschel et al.

Interferometric Crossing Orbit Experiment Using TerraSAR-X and TanDEM-X
S. Wollstadt, P. López-Dekker, P. Prats et al.

DEM-Based SAR Pixel Area Estimation for Enhanced Geocoding Refinement and Radiometric Normalization
O. Frey, M. Santoro, C.L. Werner & U. Wegmüller

Multiple Aperture InSAR (MAI) With C-Band and L-Band Data: Noise and Precision
N. Bechor Ben-Dov & T.A. Herring

Coregistration between SAR Image Subsets Using Pointwise Targets
T. Wang, S. Jónsson & R. Hanssen

PSI & DInSAR Validation

A Kalman Filter Based MTInSAR Methodology for Deriving 3D Surface Displacement Evolutions
J. Hu, X.L. Ding, Z.W. Li et al.

Salt Mining Induced Subsidence Mapping of Lueneburg (Germany) Using PSI and SBAS Techniques Exploiting ERS and TerraSAR-X Data
K. Goel, A. Parizzi & N. Adam

Volcanoes

SAR Interferometric Analysis of Ground Deformation at Santorini Volcano (Greece)
E. Papageorgiou, M. Fomelis & I. Parcharidis

Cross Interferometry

ERS-Envisat Cross-Interferometry Results over the Jangtsekiang Delta in China
U. Wegmüller, M. Santoro & A. Wiesmann

ERS-Envisat Cross-Interferometry Signatures over Deserts
U. Wegmüller, M. Santoro & C. Mätzler

ERS – Envisat Cross-Interferometry over the Athens Metropolitan Area
I. Papoutsis, C. Kontoes & D. Paradissis

Thematic Mapping and DEM

Inter-Tidal Flats Segmentation of SAR Images Using a Waterfall Hierarchical Algorithm
F. Soares, J. Catalão & G. Nico

High Resolution Digital Surface Model for Production of Airport Obstruction Charts
Using Spaceborne SAR Sensors
H. Oliveira, M. Rodrigues & A. Radius

APS Removal and Void Filling for DEM Reconstruction from High-Resolution InSAR Data
M. Liao, H. Jiang, T. Wang & L. Zhang

InSAR DEM Reconstruction with ICESat GLAS Data on the Grove Mountains Area
Y. Zhou, C. Zhou, E. Dongchen et al.

Enhancing Building Reconstruction by Adaptive Filtering of Interferometric Phases
C. Dubois, A. Thiele, E. Cadario & S. Hinz

DInSAR & PSI

Models to Predict Persistent Scatterers Data Distribution and their Capacity to Register Movement
Along the Slope
D. Notti, C. Meisina, F. Zucca & A. Colombo

PS and SBAS Interferometry over the Broader Area of Thessaloniki, Greece, Using the 20-Year Archive
of ERS and Envisat Data
A. Mouratidis & F. Costantini

Detection of Ground Deformation in the Oporto Metropolitan Area with Multi-Temporal
Interferometry (MTI)
J.J. Sousa, L.C. Bastos, A.M. Ruiz et al.

InSAR for Early Warning of Possible Highway Instability over Undermined Area of Ostrava
M. Lazecký, M. Kačmařík & P. Rapant

Near Real-Time Deformation Monitoring Based on Persistent Scatterer Interferometry
L. Chang & R.F. Hanssen

Testing with Real Data a Weighted Least-Squares Method for PSI
F. Vicente-Guijalba & J.M. Lopez-Sanchez

Experiences about the COSMO-SkyMed Stripmap Image Data Processing – First Results of
COSMO-SkyMed AO Research Project
A. Losurdo V. Sarli & A. Guariglia

PS-Analysis of COSMO SAR Data Stacks through a Fast and Simple Technique
D. Riva, D. D'Aria, D. Giudici et al.

Presentation of the Small Baseline NSBAS Processing Chain on a Case Example: The Etna
Deformation Monitoring from 2003 to 2010 Using Envisat Data
M.-P. Doin, F. Lodge, S. Guillaso et al.

High Resolution Ground Deformations Monitoring by COSMO-SkyMed PSP SAR Interferometry:
Accuracy Analysis and Validation
M. Costantini, T. Chen, Y. Xu et al.

Estimation of the Persistent Scatterer Density Using Optical Remote Sensing Data and Land Cover Data
S. Plank, J. Singer & K. Thuro

Comparative Analyses of Multi-Frequency PSI Ground Deformation Measurements
J. Duro, J.R. Sabater, D. Albiol et al.

A New Approach in DinSAR Pixel Selection with a Combined Multi Resolution Selection Method
G. Centolanza, R. Iglesias, D. Monells & J.J. Mallerqui

Retrieve Ground Parameters from Quasi-Coherent Targets for SAR Interferometry
L. Tao, H. Zhang, C. Wang et al.

Time-Series InSAR: An Integer Least-Squares Approach for Distributed Scatterers
S. Samiei Esfahany & R.F. Hanssen

DInSAR Pixel Selection Based on Spectral Correlation along Time between Sublooks
R. Iglesias, D. Monells, G. Centolanza et al.

An Effective Approach to Select the Interferometric SAR Data Pairs Based on Simulated Annealing
Y. Yang, A. Pepe, M. Manzo & R. Lanari
