

OPEN COSMOS

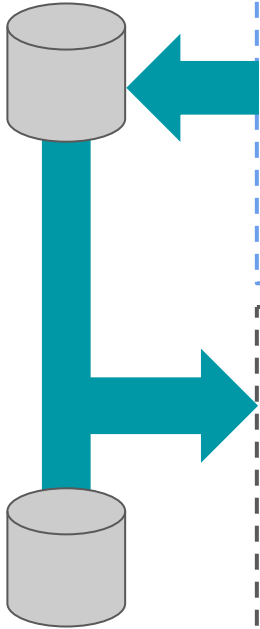

Opening the cosmos to everyone

Open Cosmos designs, manufactures and operates satellites that provide actionable information to address global challenges.

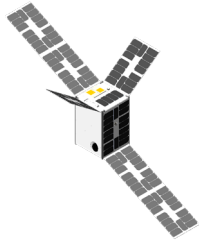

MANTIS data set tailored to end-user needs

Other data sets (E.g. ESA Copernicus programme)

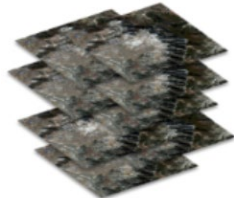

OPEN COSMOS

SATLANTIS

GSD @ 500km:	Down to 2.5m (post-processed)
Spectral bands:	4 (RGB and NIR)
Digital resolution:	12 bits
Swath width:	13 km

Terrabotics
Space to Earth Analytics

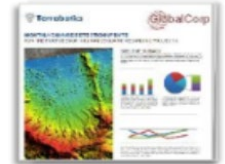

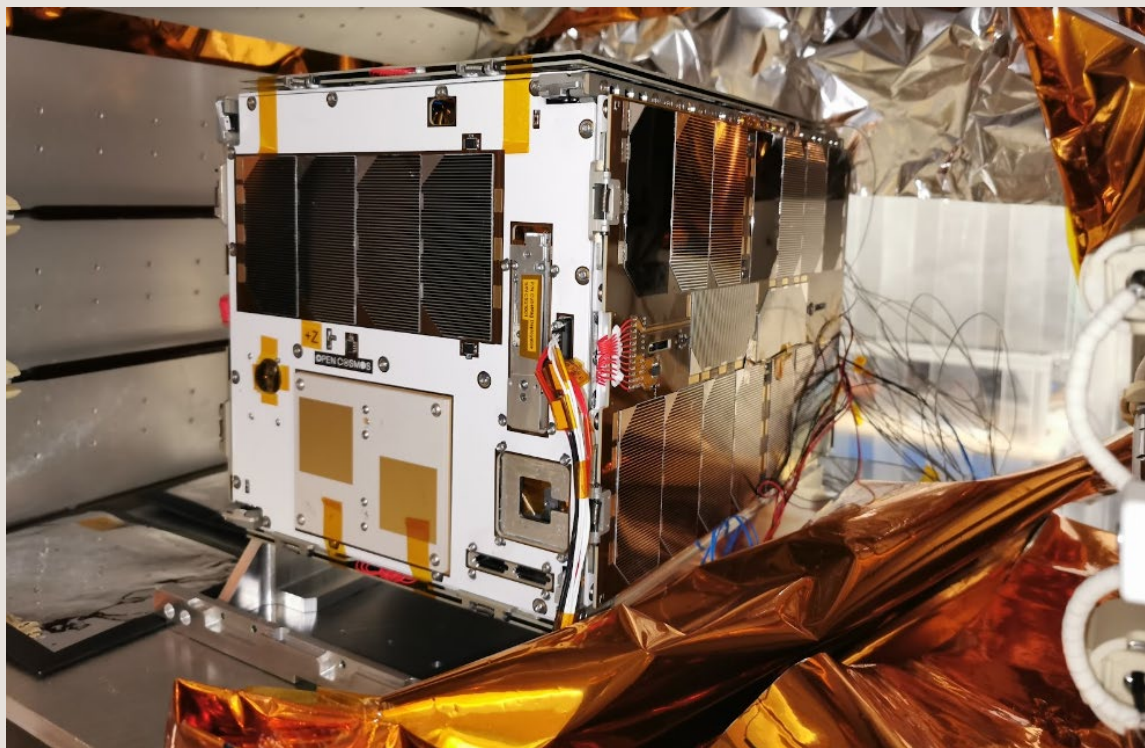

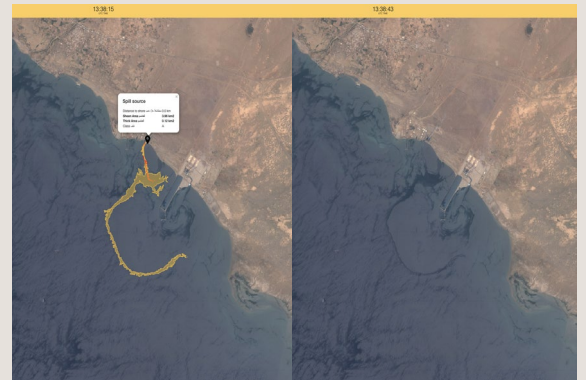

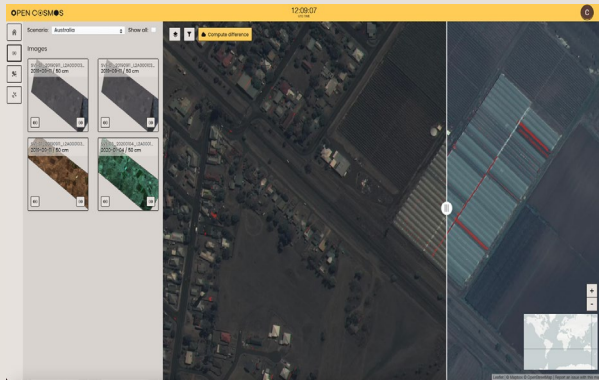

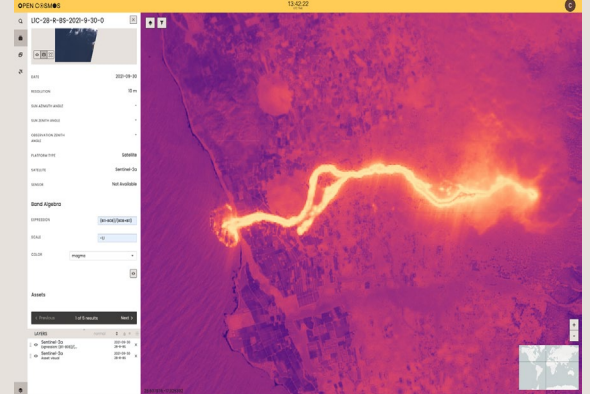

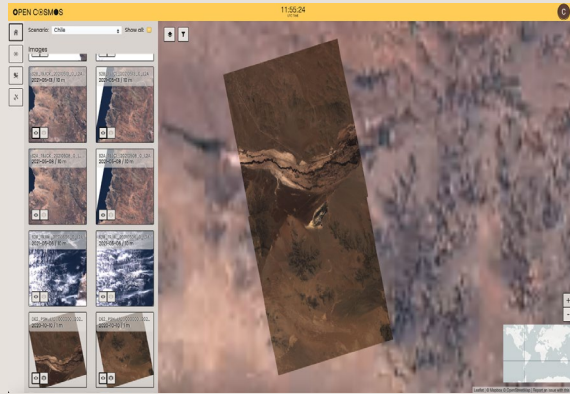

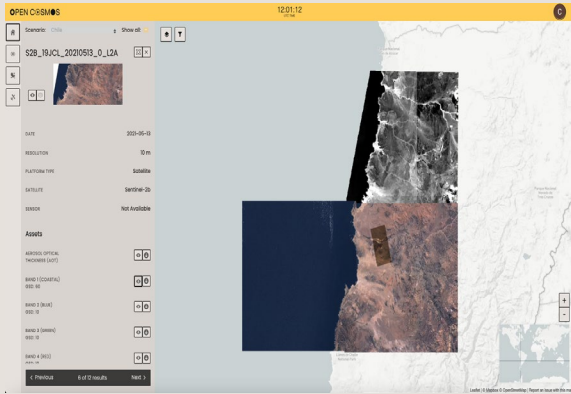

Image conditioning and post-processing

Object recognition and change detection

Actionable intelligence and analytics solutions
