# Make better sourcing and investment decisions

Achieve sustainable agricultural production reducing deforestation, biodiversity loss and ghg emissions.

Track progress towards sustainable and equitable supply chains, demonstrate compliance with sustainable sourcing regulations using EO data + ML

Coffee Palm Oil Cocoa Soy Leather & Beef Sugar Cane Rubber Pulp & Paper Forest

SATELLIGENCE

Selected clients

Partners

Large scale operational solution for supply chain traceability and transparency using huge flow of data

ESA eOrigins to combine EO with blockchain/DLT for more efficient, immutable, auditable supply chains

EC Landgriffon to support verification of European commodity imports at scale, with Vizzuality, SEI/Trase

SATELLIGENCE

How we verify sustainable sourcing

We scan each 10m2 of earth every day

Our global Palm Oil supply chain geodatabase contains:

65689 plantations
[Geolocation and ownership]

2089 mills
[Geolocation and ownership]

173 refineries
[Geolocation and ownership]

494 ports and terminals
[Geolocation and ownership]
