DLR Environment, Energy & Health Challenge

DLR is looking for innovative solutions that use Earth observation data to support sustainable management of our limited natural resources and foster human well-being.

Prize: EUR 5,000 Cash Prize

DLR Environment, Energy & Health Challenge

- Environmental Management: Identifying environmental issues and managing natural resources
- Sustainable Resource Management: Monitoring and improving the use of natural resources, as well as generation, distribution, or consumption of energy
- Health Promotion: Identifying, monitoring and / or providing solutions to foster human health or mitigating epidemic impacts.
