The New EU Forest Strategy for 2030 and the Urban Green

The EU has issued the “New EU Forest Strategy for 2030”, to protect forest ecosystems and ensuring healthy, biodiverse and resilient forests across Europe and the world with an associated roadmap, which is also addressing urban/peri-urban areas and ecological corridors,

Courtesy: European Forest Institute

The Biodiversity Strategy 2030 calls upon cities with over 20.000 inhabitants to create **Urban Greening Plans** by the end of 2021 to **bring nature back into cities** and support biodiversity and mitigate climate change.

Panelists:

Marcello Maranesi [GMATICS](#)

Stefano Ferretti [European Space Agency](#)

Robert Mavsar [European Forest Institute](#)
