TAKING THE PULSE
OF OUR PLANET FROM SPACE

The Copernicus Hyperspectral Imaging Mission For The Environment (CHIME)

Marco Celesti, Michael Rast, Jennifer Adams, Ferran Gascon,
Jens Nieke

26/05/2022

Jens Nieke, Marco Celesti, Michael Rast*, Jennifer Adams, Gianluigi di Cosimo,
Antonio Gabriele, Claudia Isola, Heidrun Weber, Helene Strese, Ferran Gascon,
Valentina Boccia, Claudia Wildner (and many others)**
European Space Agency

Ivan Konaktchiev, Peter Strobl, Cristina Ananasso***
European Commission

**Andrew Skidmore, Heike Bach, Eyal Ben-Dor, Sabine Chabrillat, Cindy Ong,
Claudia Giardino, Giovanni Rum, Jean-Baptiste Feret, Luis Guanter, Martin Schlerf,
Martin Schodlok, Matthew Williams, Michael Schaepman, Robert O. Green, Roberto
Colombo, Stuart Marsh, Tobias Storch**
Members of the CHIME MAG

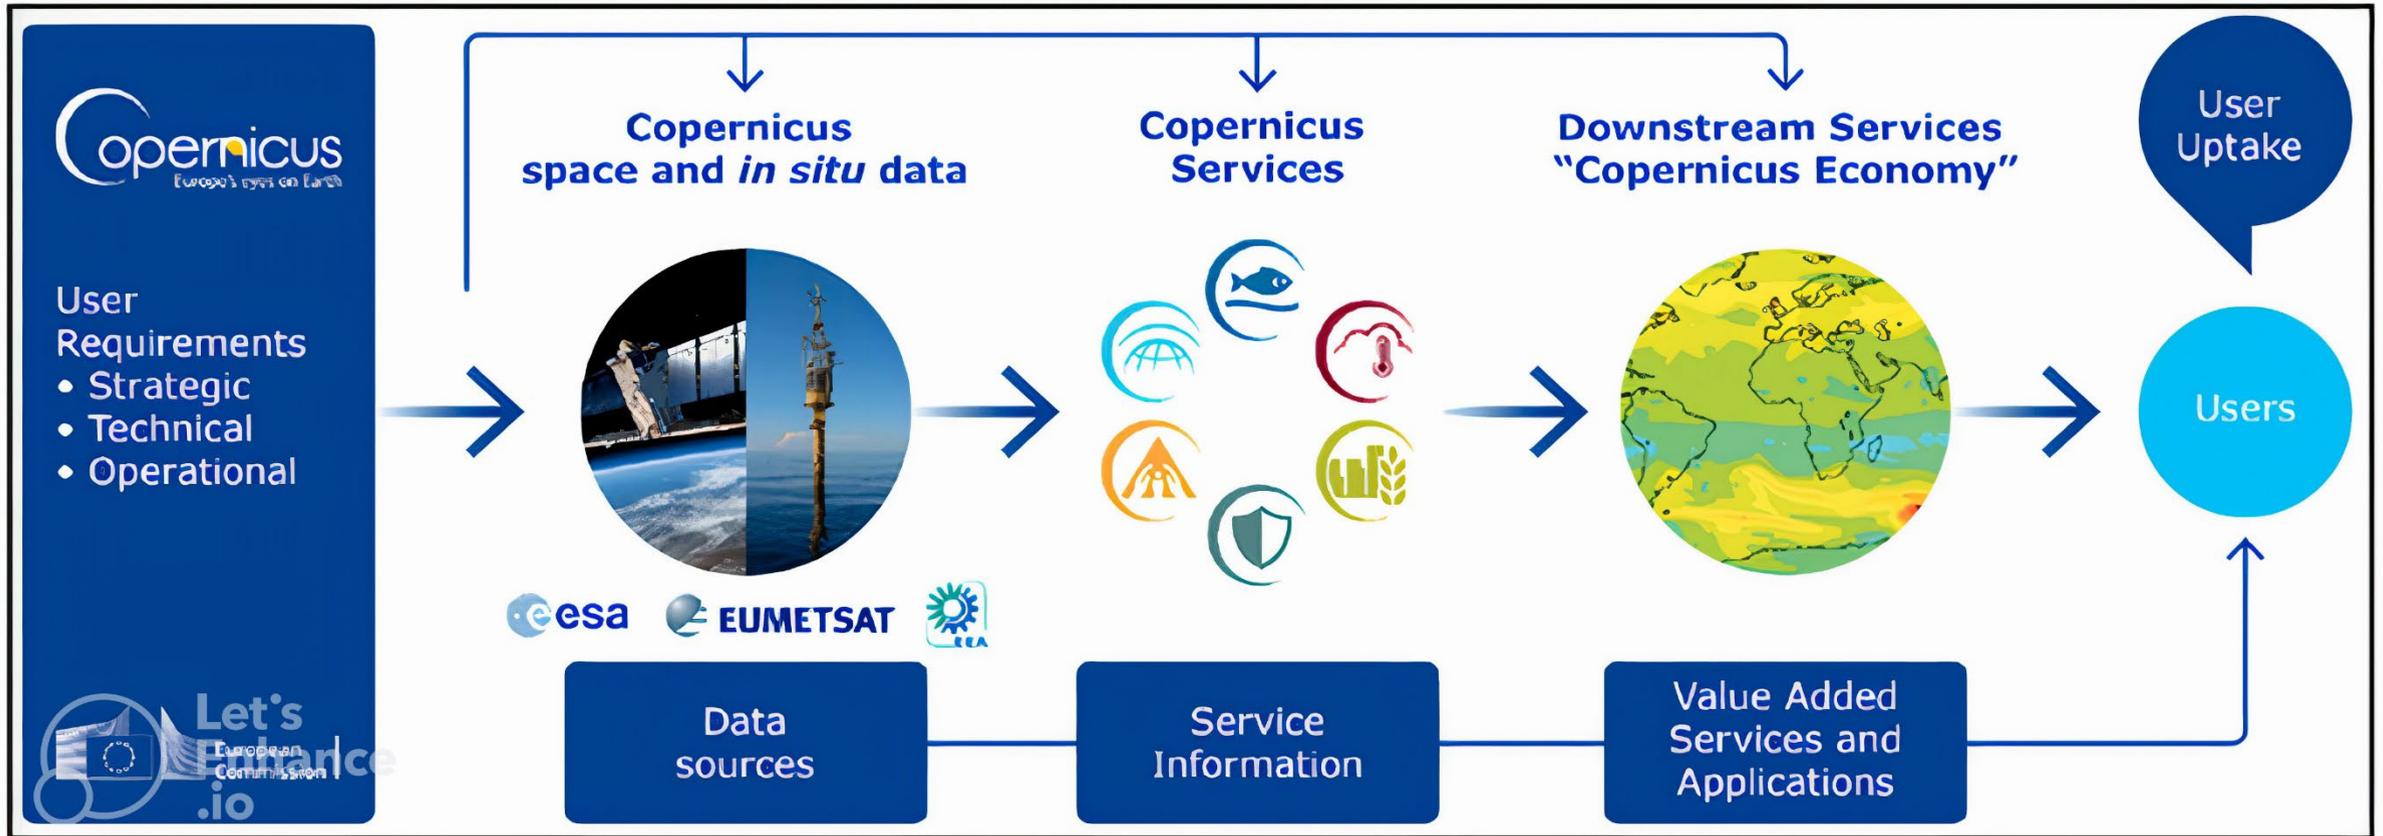

CHIME
Copernicus Hyperspectral Imaging
Mission for the Environment

* now at ISSI Bern

** now at University of Zurich

*** now at ECMWF

Sentinels: a key element in Copernicus

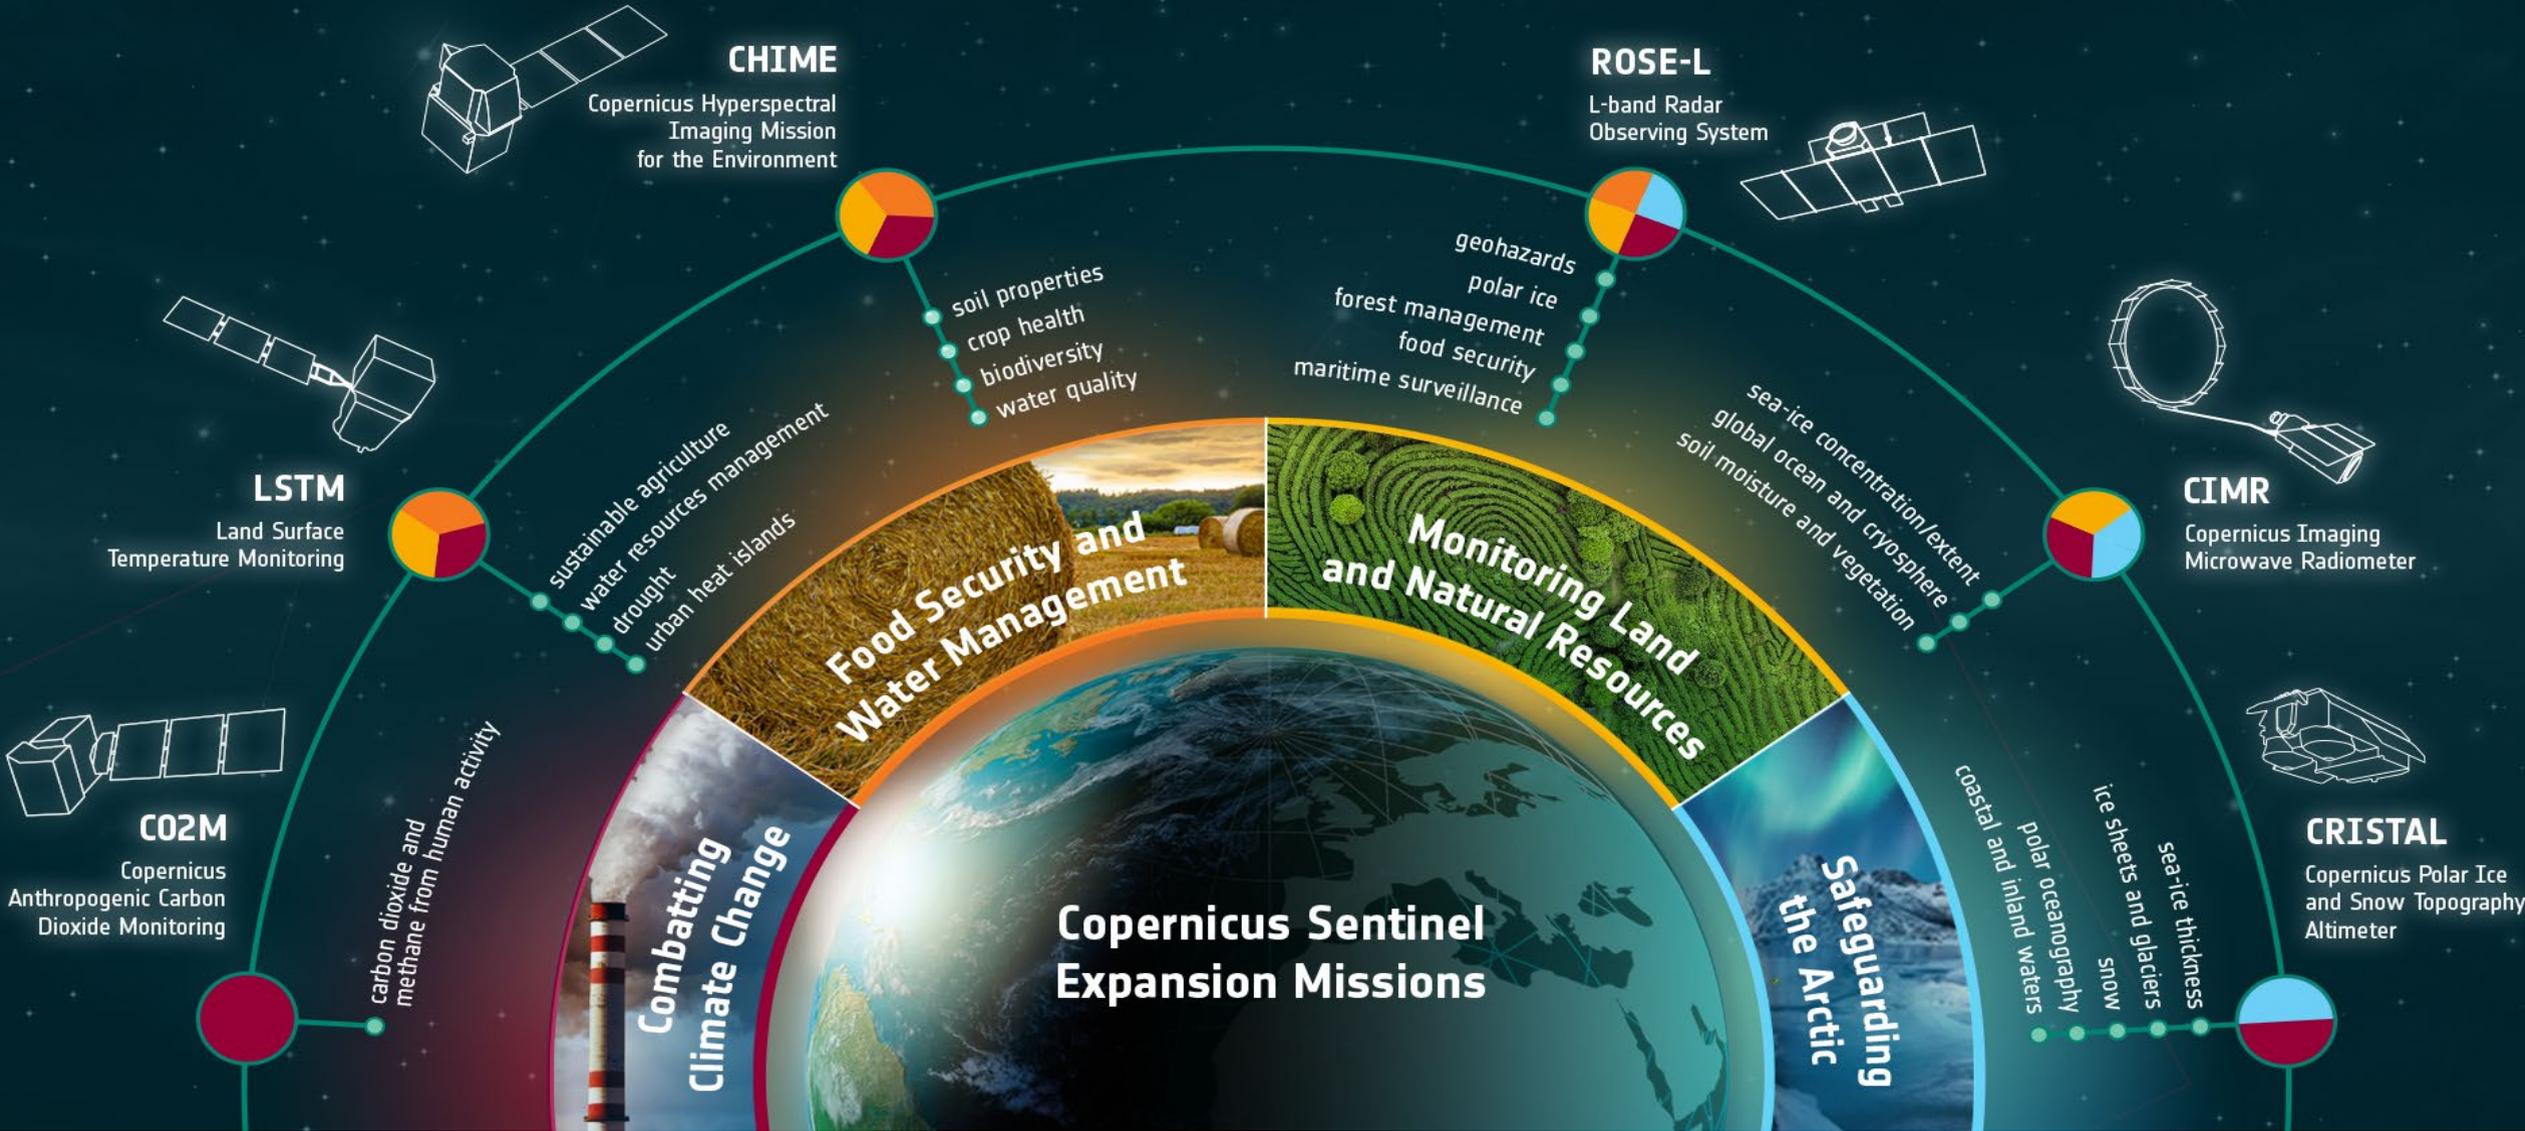

Copernicus Users Uptake Strategy

PROGRAMME OF THE EUROPEAN UNION

co-funded with

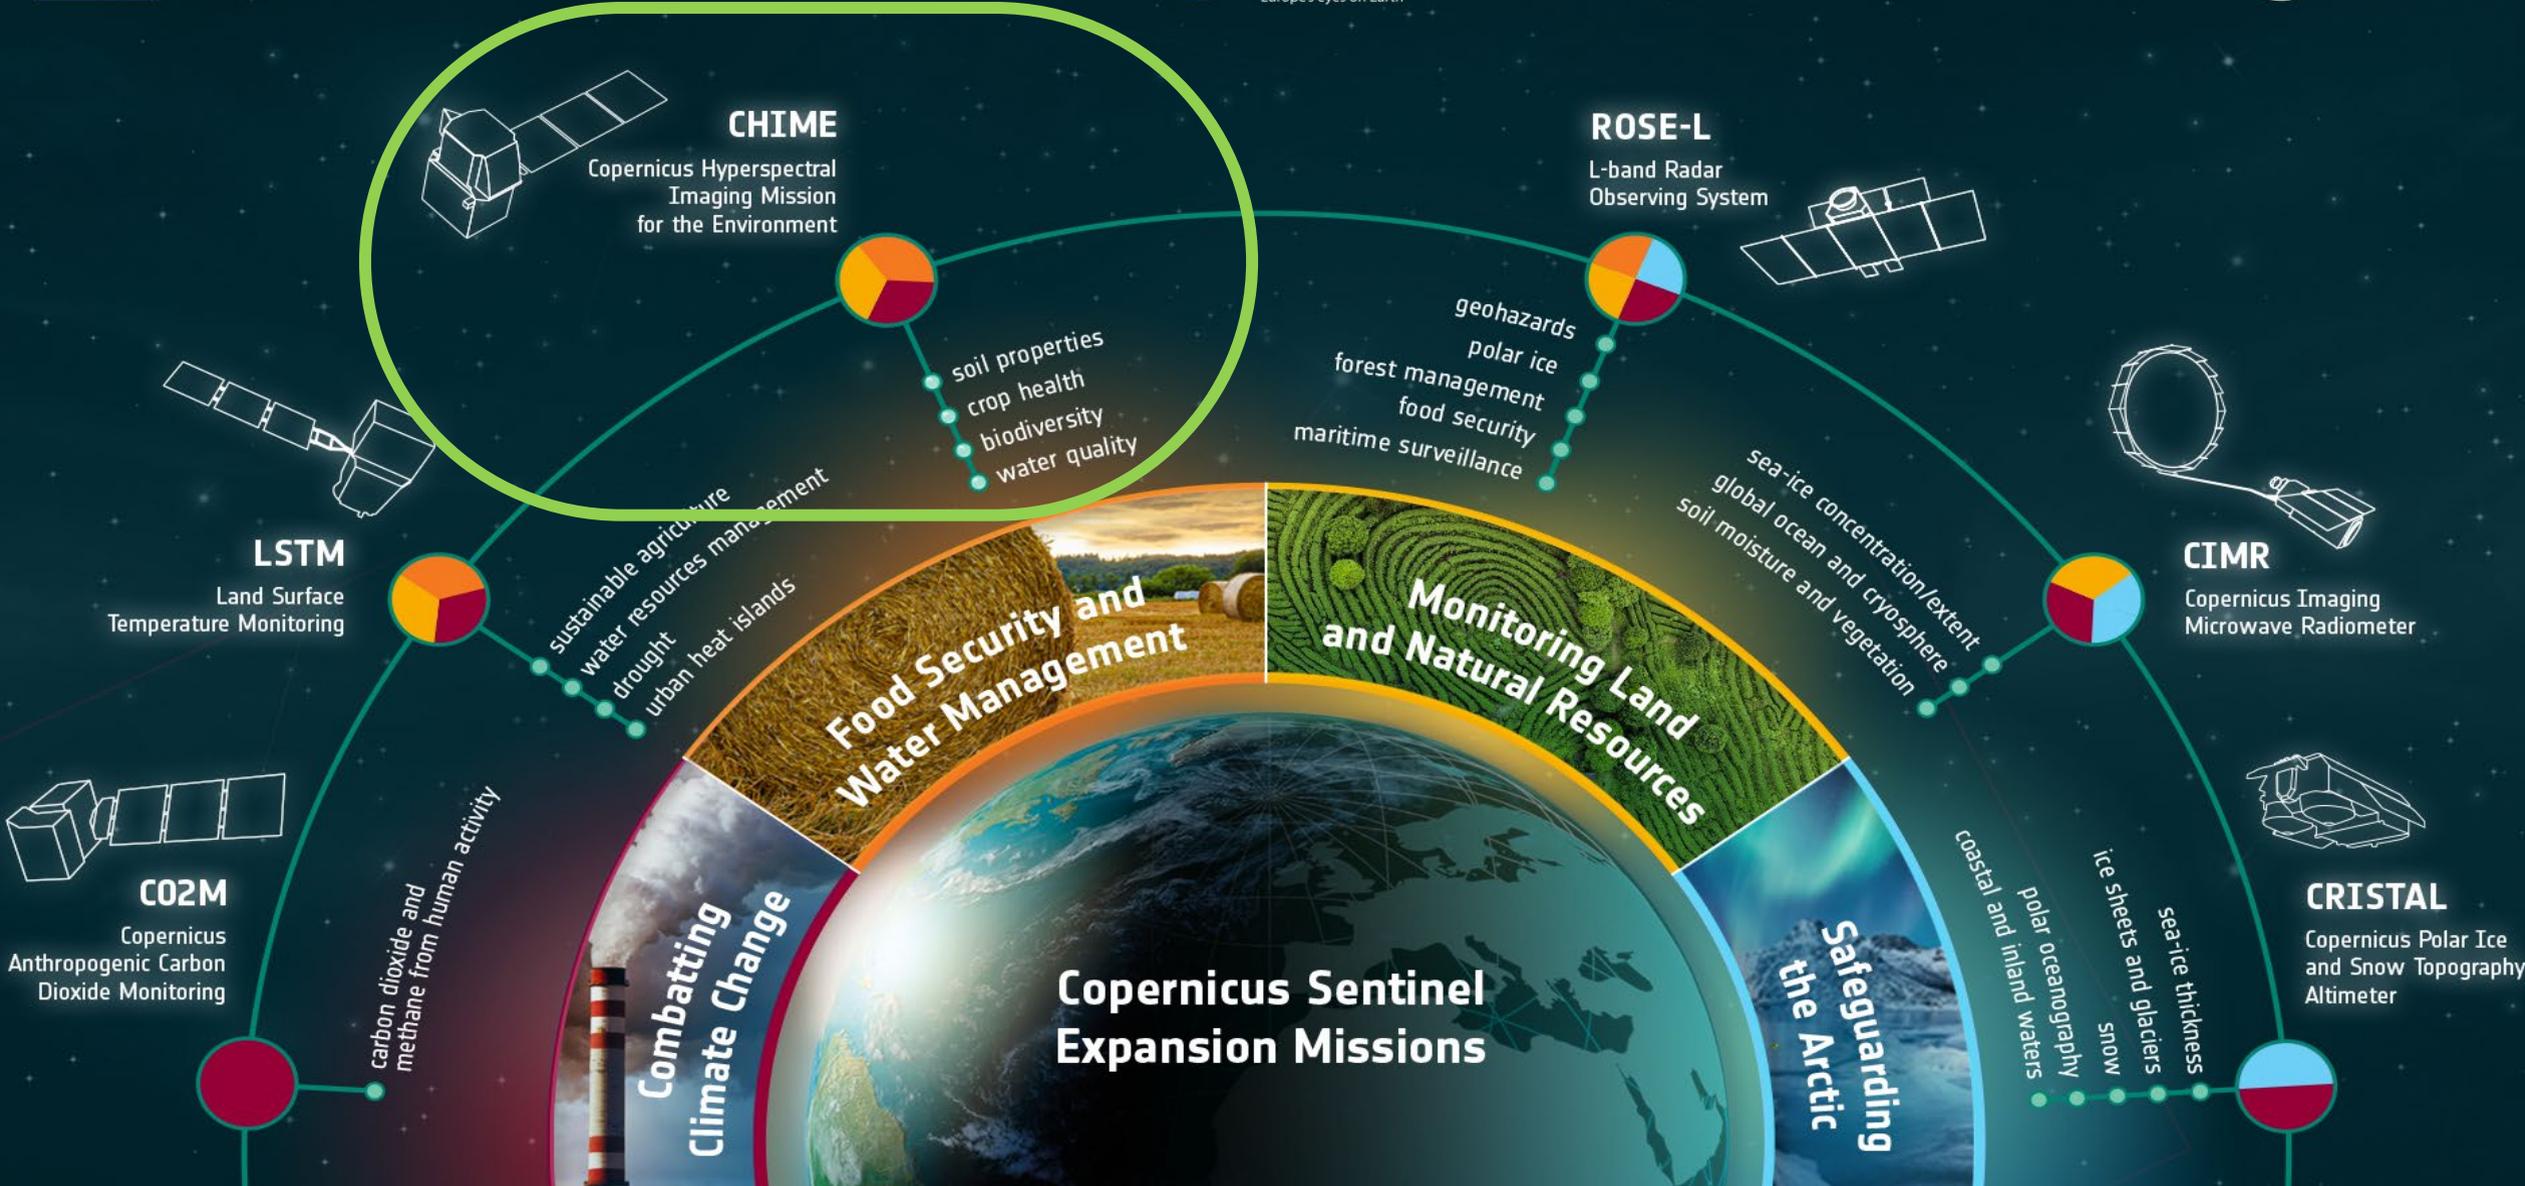

→ THE EUROPEAN SPACE AGENCY

PROGRAMME OF THE EUROPEAN UNION

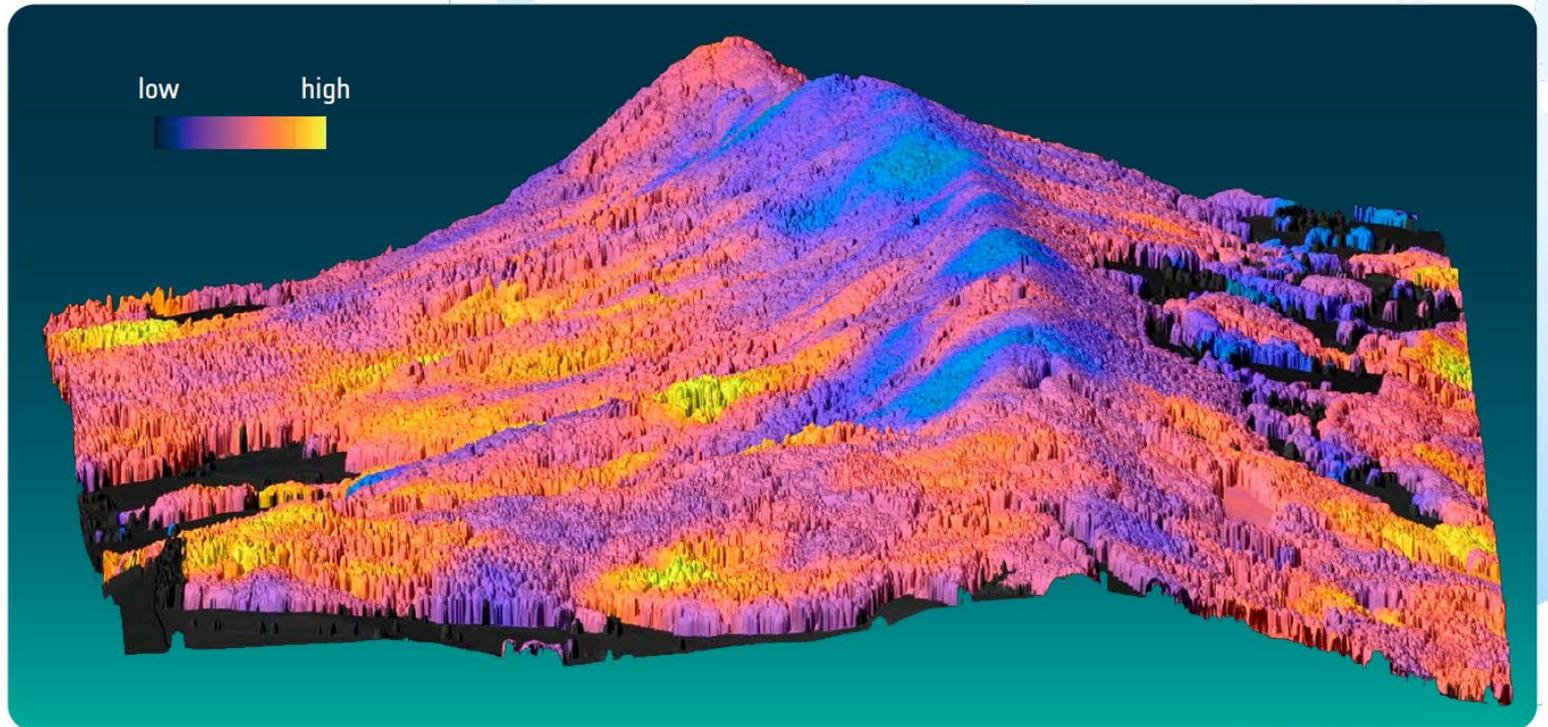

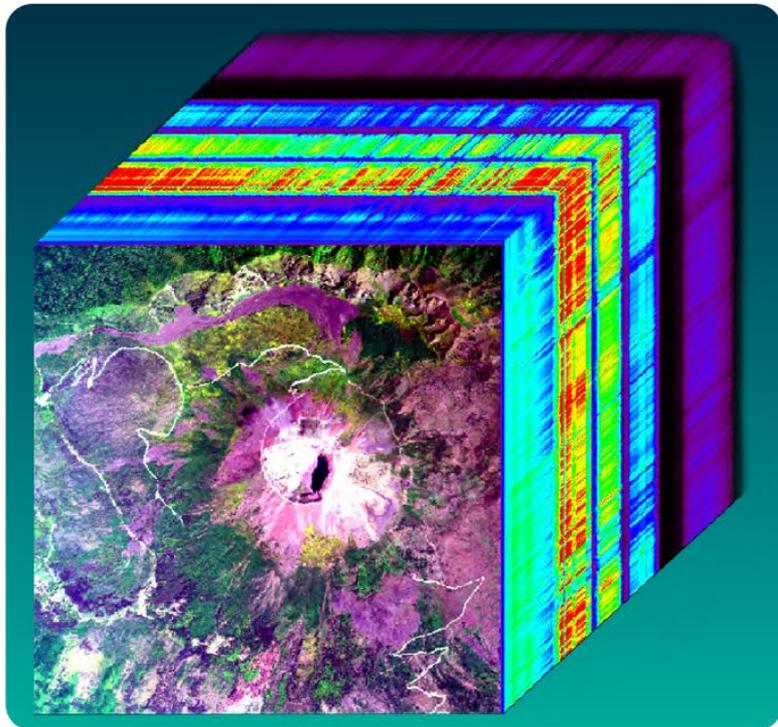

co-funded with

→ THE EUROPEAN SPACE AGENCY

CHIME Mission Objectives

- Provide routine hyperspectral measurements in support of EU- and related policies for the management of natural resources & assets
- Support food security, agriculture and raw materials, soil properties
- Secondary Applications: biodiversity and ecosystem sustainability, forestry management, environmental degradation, lake/coastal ecosystems and water quality, snow grain size/albedo, snow impurities]

Physiological diversity of a temperate forest (Airborne imaging spectroscopy APEX data - Schaepman, Jehle et al. 2015)

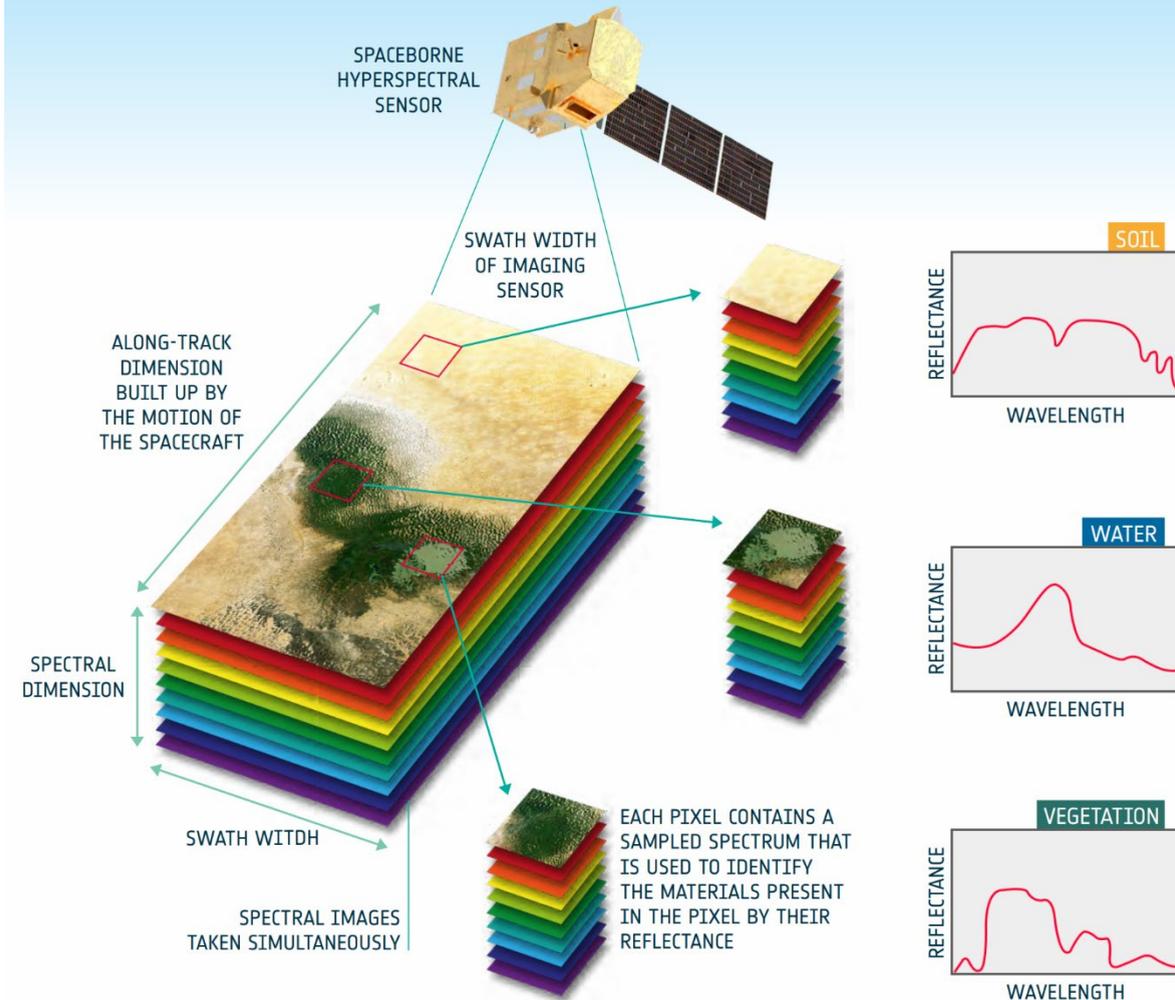

CHIME Key Mission Requirements

- Operational hyperspectral observations of land and coastal areas
- Spectral range: 400 – 2500 nm
- Spectral bandwidth and SSI $\leq 10\text{nm}$
- Ground Resolution: 30 m
- Revisit 12.5 days (2 satellites)
- High radiometric accuracy, low spectral/spatial mis-registration
- High SNR

→ Matching performance of parallel IS missions (e.g. EnMAP, PRISMA, SBG)

Core data products:

- L1-B Top-of-atmosphere (TOA) radiance
- L1-C Ortho-rectified TOA reflectance
- **L2-A Ortho-rectified bottom-of-atmosphere (surface) reflectance**

CHIME High Priority Prototype L2-B Products

DOMAIN	THEMATIC AREA	VARIABLES CHPPP	CHIME Candidate Algorithms
AGRICULTURE / FOOD SECURITY	 <p>Assessment of biophysical and biochemical variables related to the crops and of agronomic interest</p>	Leaf/Canopy Pigment Content	<p>Semi-empirical modelling based on narrow-band vegetation indices; Hybrid methods based on ANN/LUT or other machine learning algorithms applied to vegetation canopy radiative transfer models outputs (e.g. PROSAIL).</p> <p>Narrow-band vegetation indices; Hybrid methods based on ANN/LUT or other machine learning algorithms e.g. GPR methods applied to vegetation canopy reflectance models (e.g. PROSAIL).</p>
		Leaf/Canopy Nitrogen Content	
		LAI	
		Canopy Water Content	
		Leaf/Canopy Pigment Content	
	Leaf Mass/Area		
	 <p>Topsoil properties</p>	Soil organic carbon content	<p>Chemometrics modelling (e.g. PLSR); Spectral analysis; Spectral indices; Machine learning (e.g. Random Forest)</p>
		Soil texture (clay, silt, sand)	
GEOLOGY & MINERALS	 <p>Raw material detection</p>	Mineral identification / classification (Kaolinite, Smectite, Jarosite, Dolomite)	<p>Sub-pixel linear unmixing Tetracorder type (EnGeoMap/PRISM)</p>
		Hematite – Goethite distribution	
		Ferric oxide content	
		Kaolin Crystallinity

CHIME “Hypersense” Campaigns

2018 – Ground / Airborne

2020 – Ground / ~~Airborne~~ / Spaceborne

2021 – Ground / Airborne / Spaceborne

- 17 fully successful sites (+1) across Europe
- Exceptional coordination between all teams (including PRISMA and DESIS)
- Concurrent Ground / Airborne / Spaceborne acquisitions over 8 sites
- **Direct input to RCS, E2E and L2 studies**
- Open data policy fostering community exploitation

AVIRIS-NG Surface Reflectance (RGB)
22nd June 2021 - Jolanda di Savoia (IT)

University of Zurich
UZH

European Space Agency

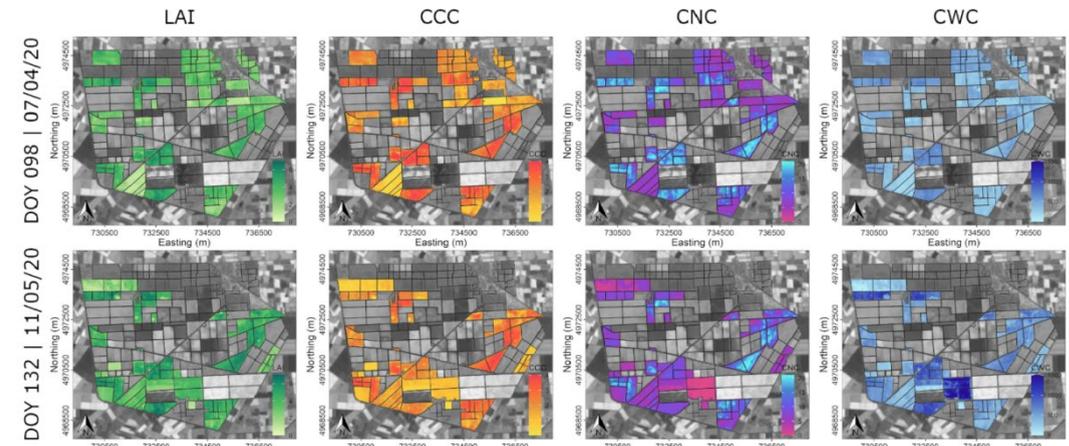

Agenzia Spaziale Italiana

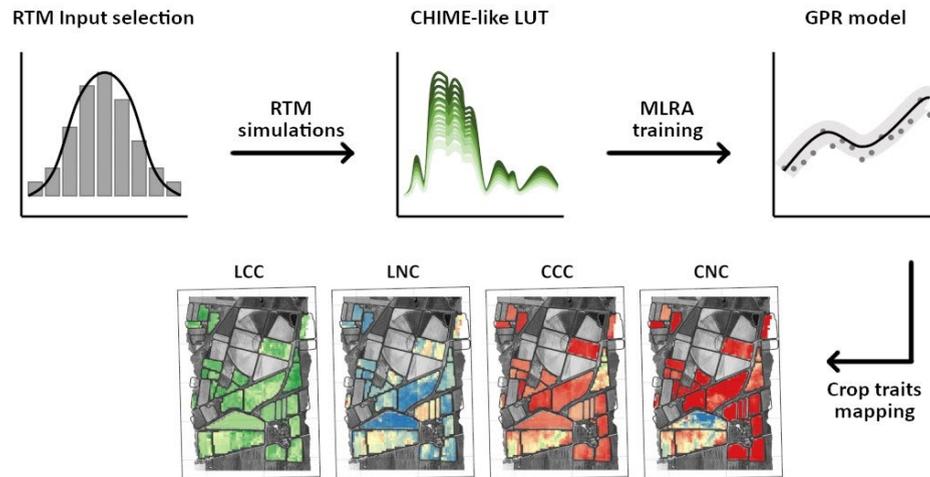

[ESA - Going hyperspectral for CHIME](#)

Retrieval of Leaf and Canopy Nitrogen Content

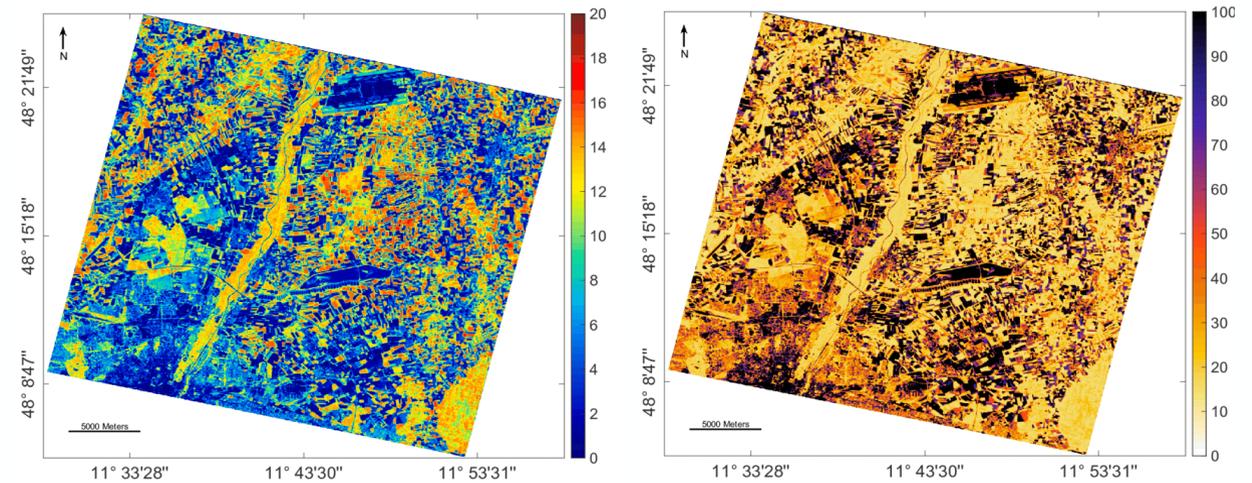

- **Nitrogen (N)** is one of the most important plant macro-nutrients
 - a proper management of N is a key factor for effective agricultural practices
- CHIME will provide Leaf and Canopy N Content maps to support precision farming

CHIME Space Segment

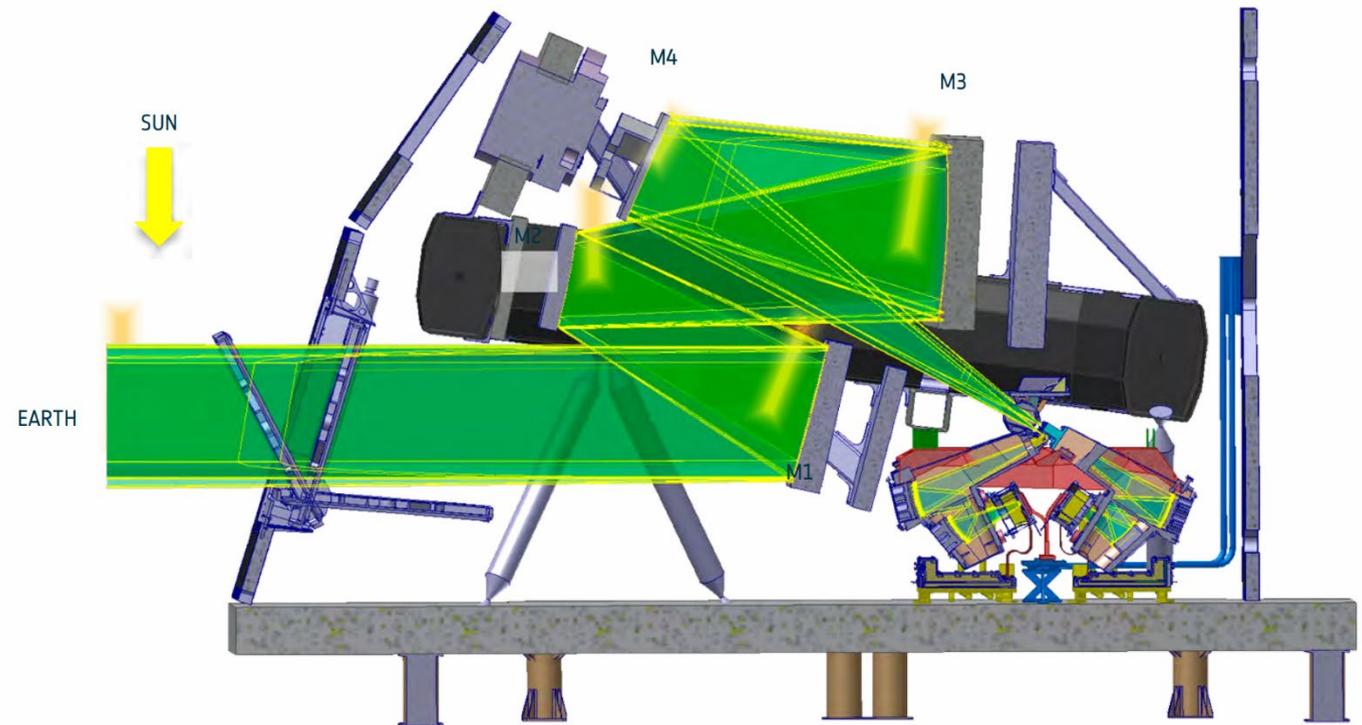

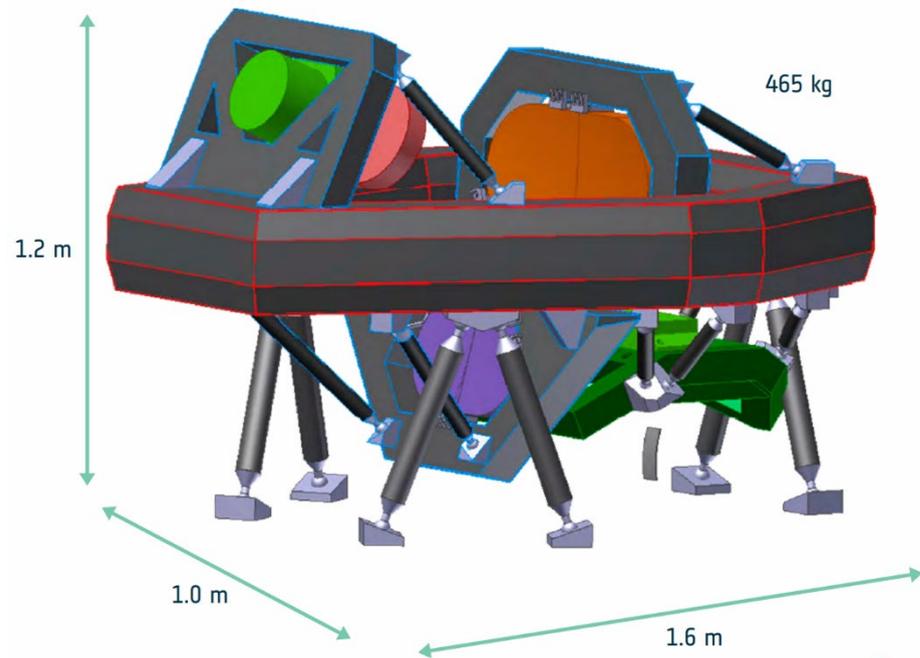

Full Consortium Established for Space segment Development B2/CD (for PFM + FM2)

- Prime Contractor: Thales Alenia Space France (TAS-F)
- Industrial Consortium: 44 Companies from 17 Countries

- Instrument Prime: OHB (DE) with
 - LEONARDO (IT) for Focal Planes & E2E Calibration
 - AMOS (BE) for 3 x spectrometer, gratings and slits
- SME share: 12.9%

- System PDR started 25th May 2022
- Instrument HSI PDR procedure finalized
- PDR Closeout expected in October 2022
- Start of Phase C/D expected in Q4 2022

Conceptual design for the optical accommodation of telescope and spectrometers for the staggered slit design

Agenzia Spaziale Italiana

PRISMA

- CHIME Campaign
- advancement of algorithm development
- new retrieval techniques such as AI and machine learning are examined

EnMAP and DESIS

- End to end simulator combined usage
- Exchange of ATBDs at different product levels
 - Cooperation on retrieval toolbox and operational processors

US decadal plan priority Mission SBG (Surface Biology Geology)

- established Joint Working Groups consolidating an End-Product harmonisation, Retrieval Simulations and Orbit definitions and CalVal
