

JAXA Level 2, Validation and Applications Preparation

Takuji Kubota

Earth Observation Research Center (EORC)

Japan Aerospace Exploration Agency (JAXA)

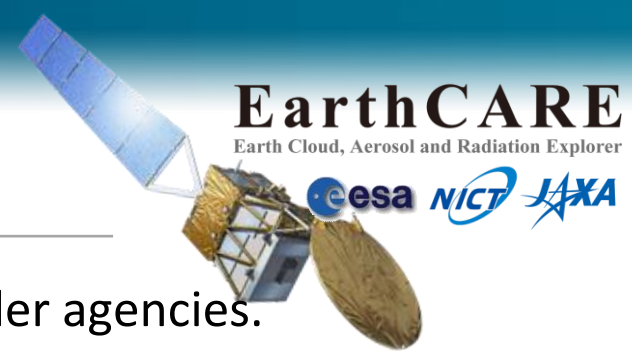

B2.06.1 EarthCARE Ready For Launch

2022 Living Planet Symposium

23-27 May 2022, World Conference Center Bonn

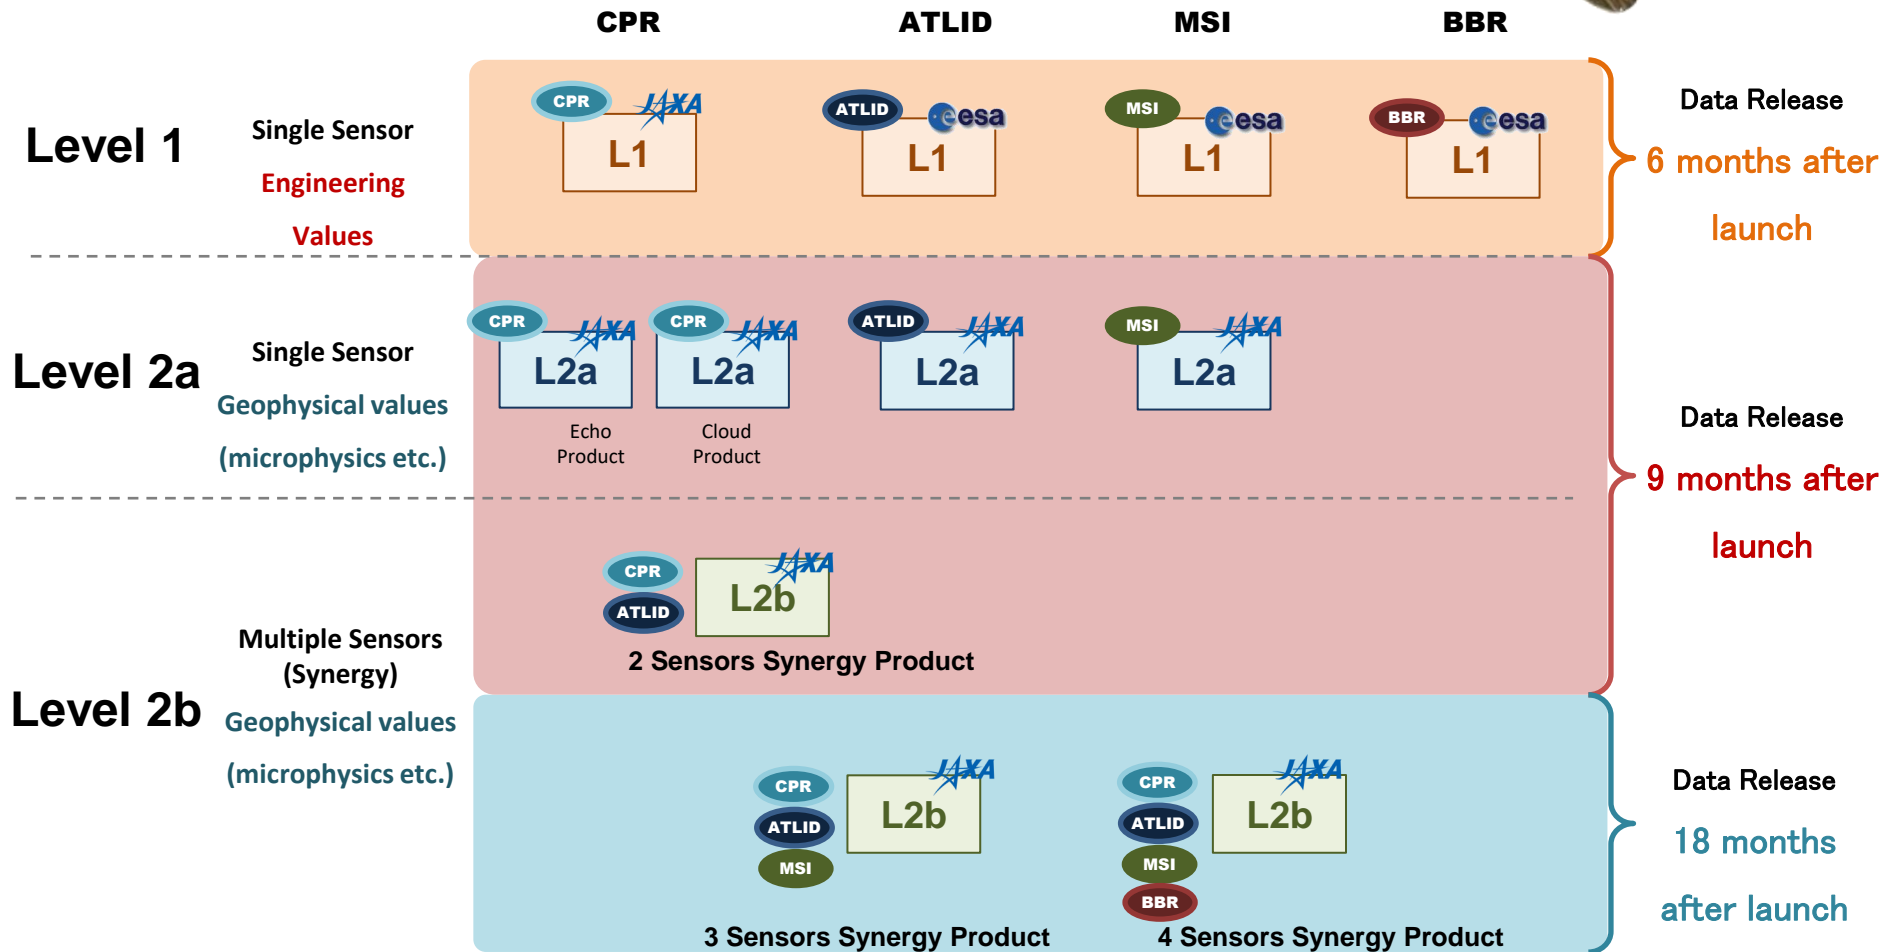

Bonn, Germany

EarthCARE JAXA Product

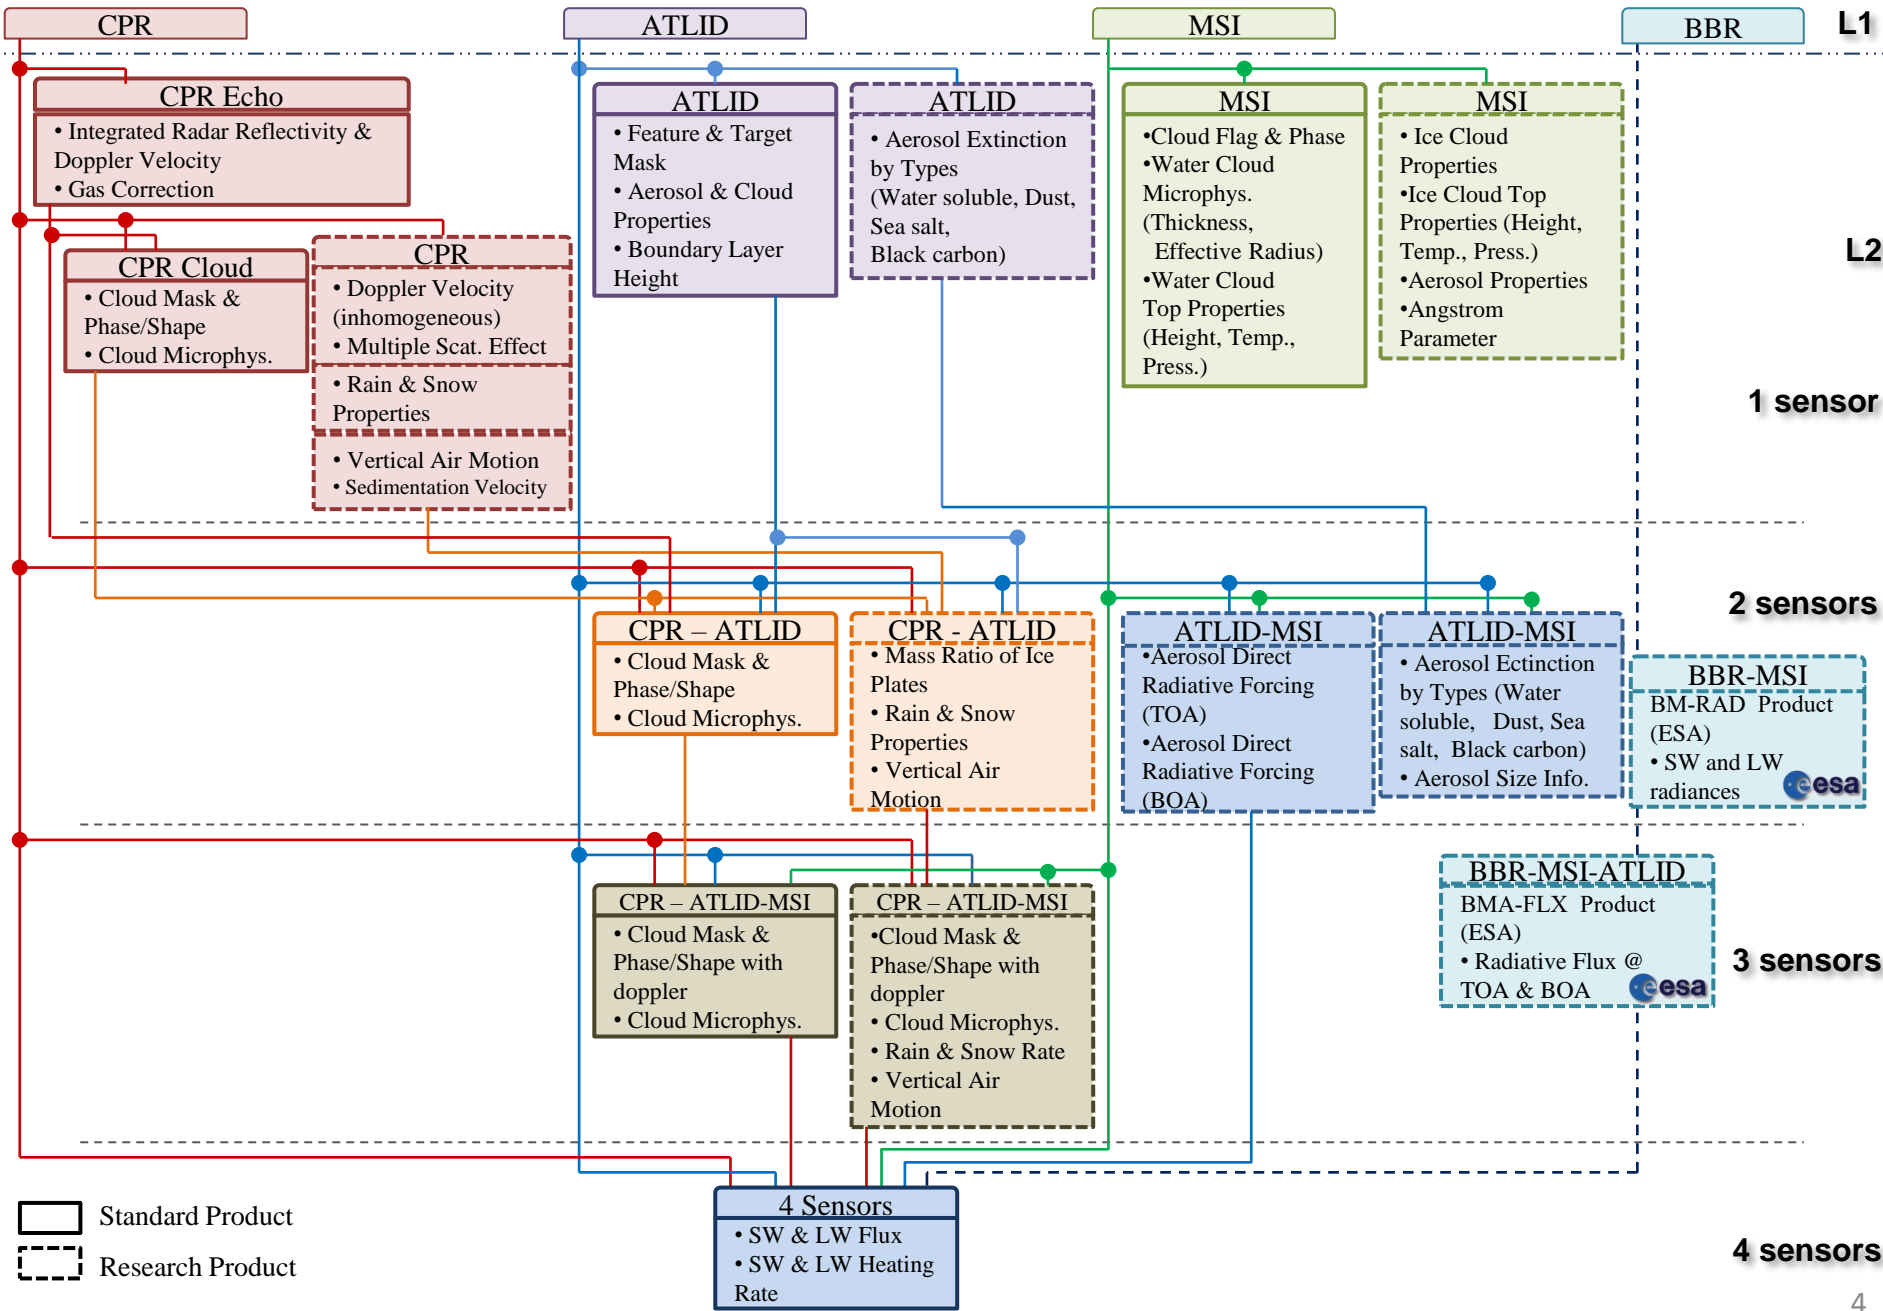

- Level 1 product will be developed by sensor provider agencies.
 - ✓ i.e. JAXA will provide CPR Level 1 product
- JAXA and ESA develop Level 2 geophysical products individually, under the Joint Algorithm Development Endeavour (JADE) in the framework of the Joint Mission Advisory Group (JMAG).
- **JAXA and ESA products will be distributed by both agencies.**
- For JAXA Level 2 Products, it is consisted by two categories;
 - **Standard Products**
 - strongly promoted to be developed and released
 - processed and released from **JAXA G-Portal**
 - all data will be able to be sent to ESA when produced
 - **Research Products**
 - promoted to be developed
 - released from **JAXA Earth Observation Research Center(EORC)**
 - some are planned to be upgraded to standard products

JAXA & ESA Level 1 Product & JAXA Standard Level 2 Product

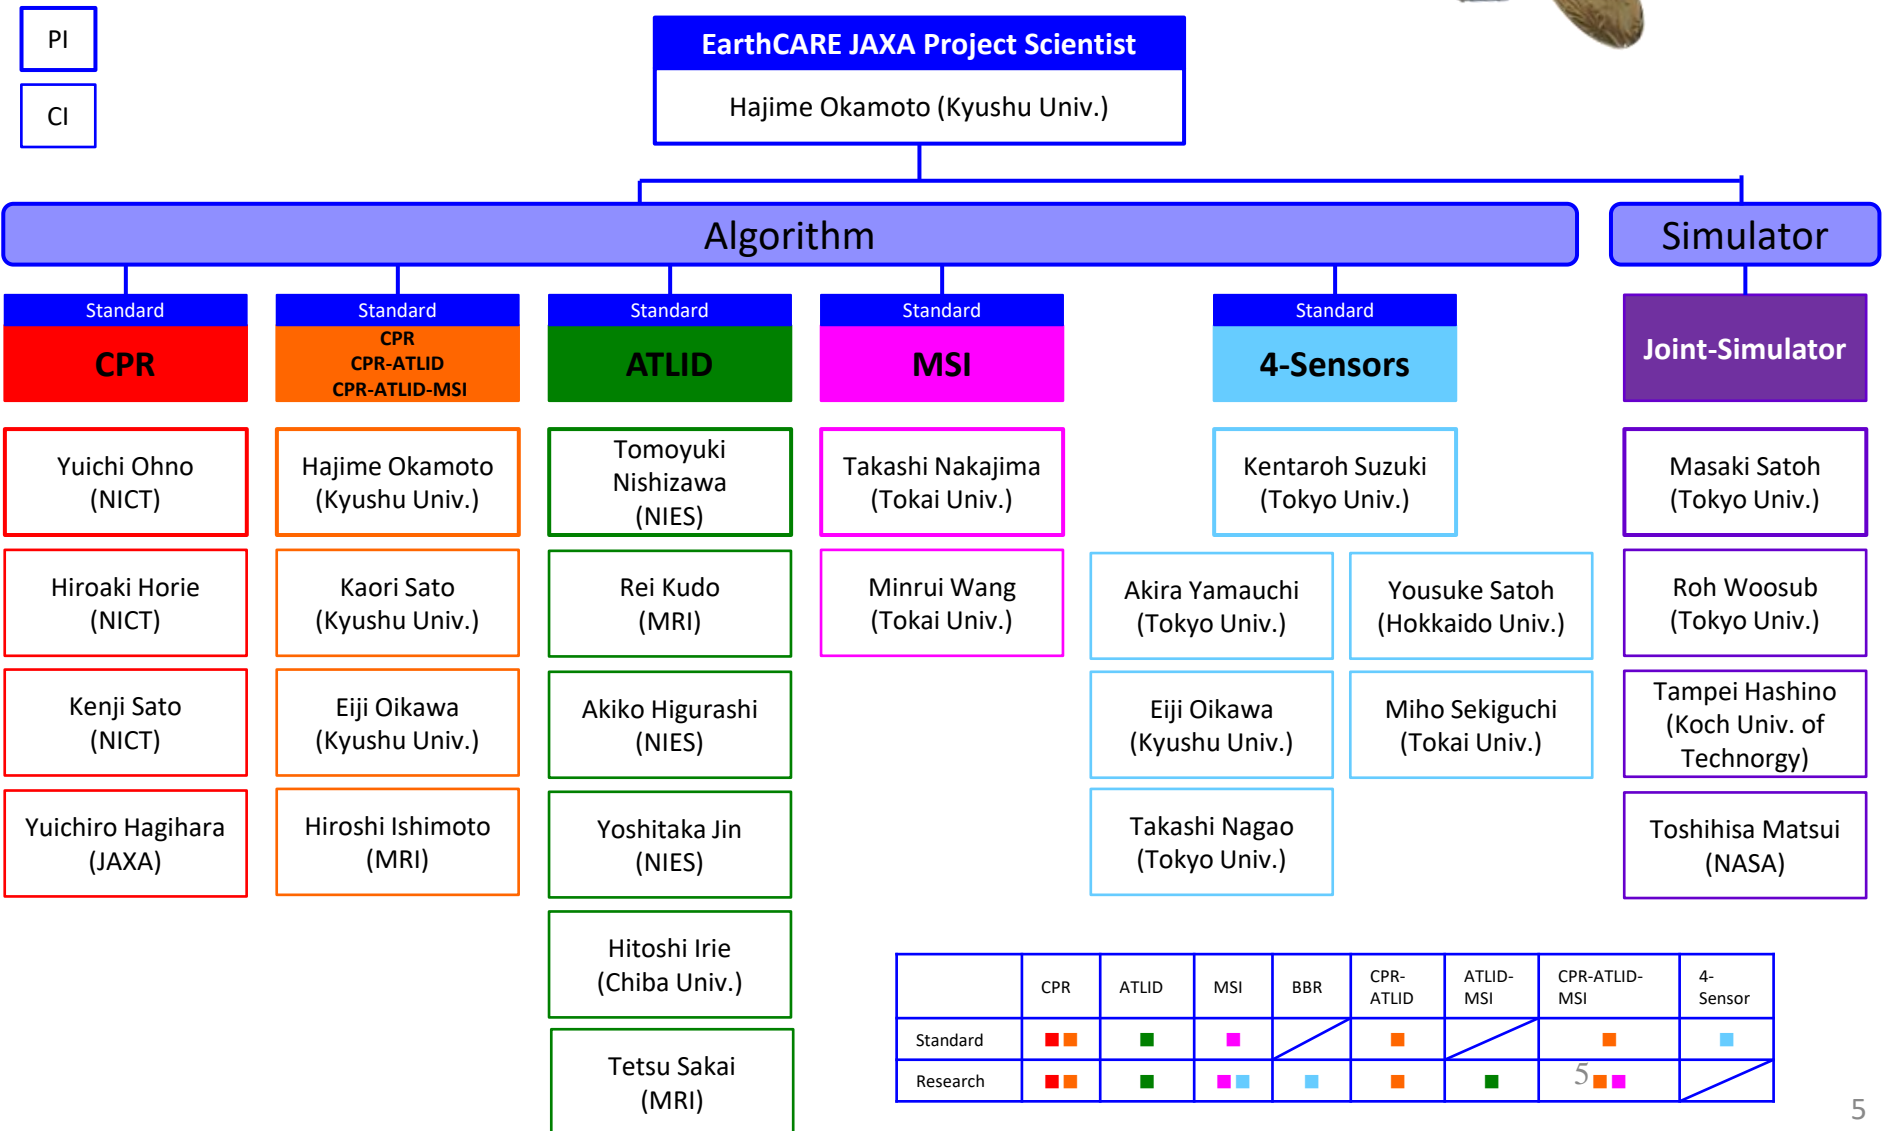

EarthCARE JAXA L2 Production Model

EarthCARE JAXA Science Team

Algorithm & Simulator (as of 2022)

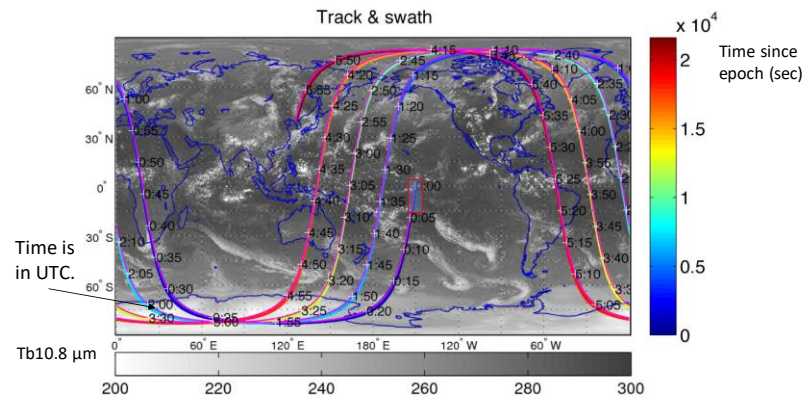

JAXA Algorithm development with the Joint-Simulator L1 synthetic data

- Level 2 algorithm development ongoing
 - Developments by 6 Algorithm PIs are ongoing.
 - Now All JAXA EarthCARE L2 algorithms can input synthetic data with the JAXA/ESA L1 formats from the Joint-Simulator and output physical variables in the JAXA L2 format.
- JAXA L2 ATBD is provided in the JAXA/EORC Website: <http://www.eorc.jaxa.jp/EARTHCARE/index.html>

EarthCARE L1 data construction in Japan

Algorithms have been developed using the synthetic data by the Joint-Simulator in the JAXA EarthCARE Science team.

EarthCARE L1 Simulation by the Joint-Simulator using NICAM-SPRINTARS data

Lidar Simulation from NICAM (Last version: only cloud signals simulated)

CPR Radar reflectivity Simulation from NICAM

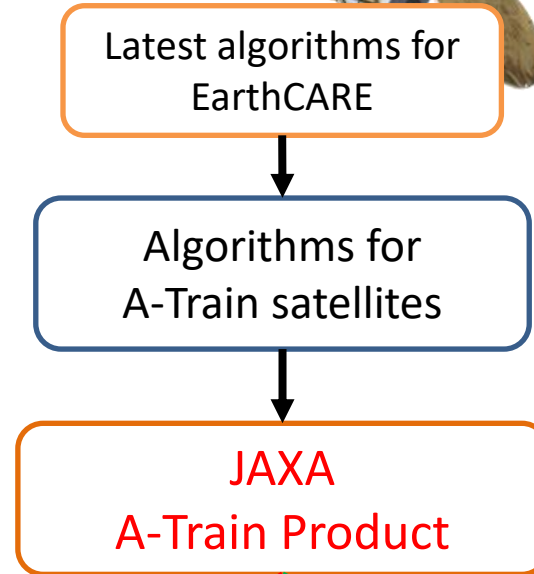

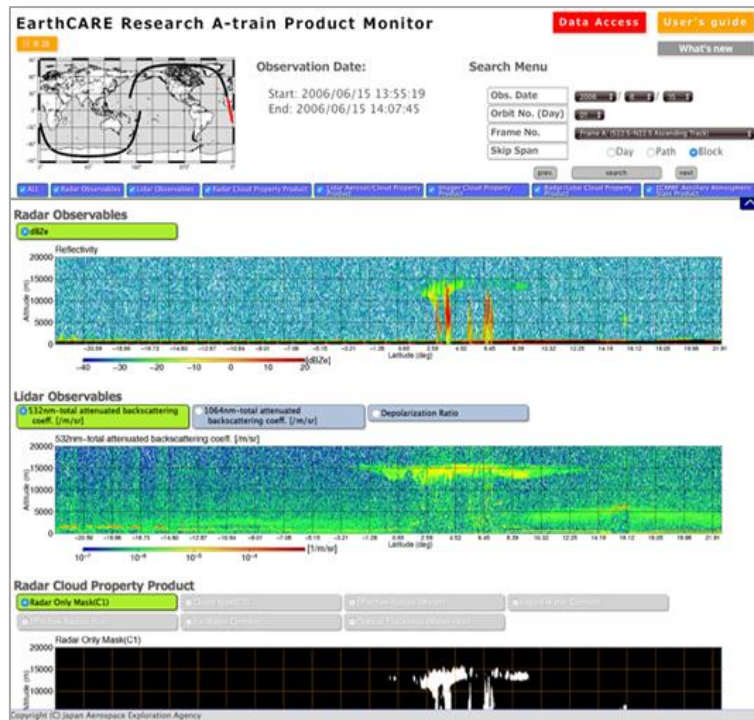

MSI simulation

- NICAM 3.5 km simulation, 2008 June 19th 00Z
- The data was interpolated based on the sampling procedure of each sensor.
- The orbit was simulated such a way that EarthCARE passes equator at 14:00 local time in the descending node.

JAXA A-Train Product for EarthCARE

- JAXA has provided the "**EarthCARE Research A-Train Product**" since Oct. 2017.
 - http://www.eorc.jaxa.jp/EARTHCARE/research_product/ecare_monitor_e.html

Validation using heritages of the ground observations, "Japanese validation rehearsal"

Applications: Cloud/Aerosol/Radiation Process study, Model evaluations, ...etc.

Toward long-term dataset with the A-Train and the EarthCARE...

Overview of JAXA validation activities

Long-term observation network

- Ground-based doppler CPR at NICT
 - Multiple-field-of-view multiple-scattering polarization lidar (MFMSPL)
 - Lidar network (AD-Net) by the National Institute for Environmental Studies (NIES)
 - SKYNET observation stations
- etc.

Location of ground-based instruments described in Vol.3

→ which can provide detailed validations of the JAXA EarthCARE products

Comparison with other satellite data

(CloudSat, CALIPSO, GCOM-C/SGLI, MODIS, VIIRS, CERES, etc.)

→ which can provide global evaluations of the JAXA EarthCARE products

JAXA' GCOM-C satellite (carrying SGLI sensor)

Campaign observation

- Ground-based doppler CPR developed by the NICT is located in NICT Tokyo with other ground instruments.

Validation of the CPR with the NICT

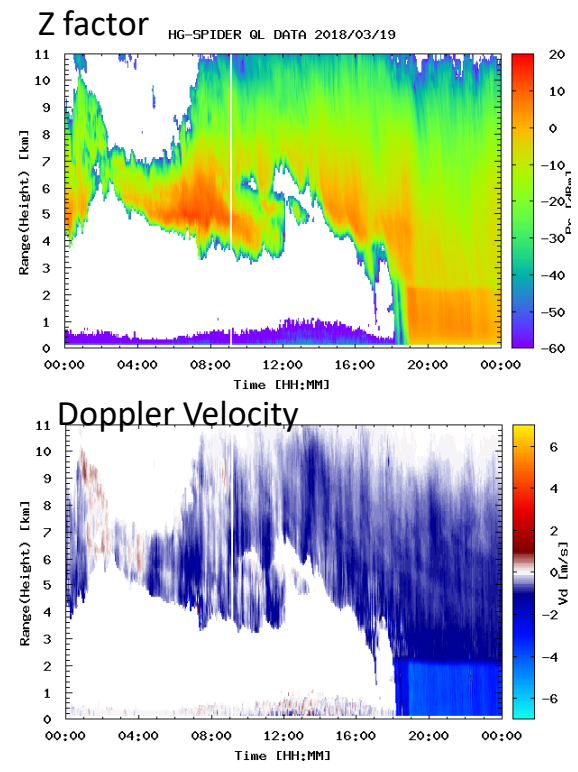

HG-SPIDER (NICT's Ground-based validation CPR)

HG-SPIDER: High sensitivity Ground-based SPIDER (CPR)

Item	Specification
Frequency	94.090GHz
Tx Power	1500W at EIK (peak)
Antenna Gain	55.9 dBi
Beam Width	0.3 degrees
Polarization	Linear Polarization
Pulse Width	0.5/1.0/2.0µs
PRF	3,000 - 10,000 Hz
Sensitivity	-40dBZ@15km (Integ. 1sec.)
Antenna Scanning	Fixed (zenith pointing)
Range	150m - 20km
Doppler Function	Pulse-Pair Processing

Better sensitivity than EarthCARE/CPR

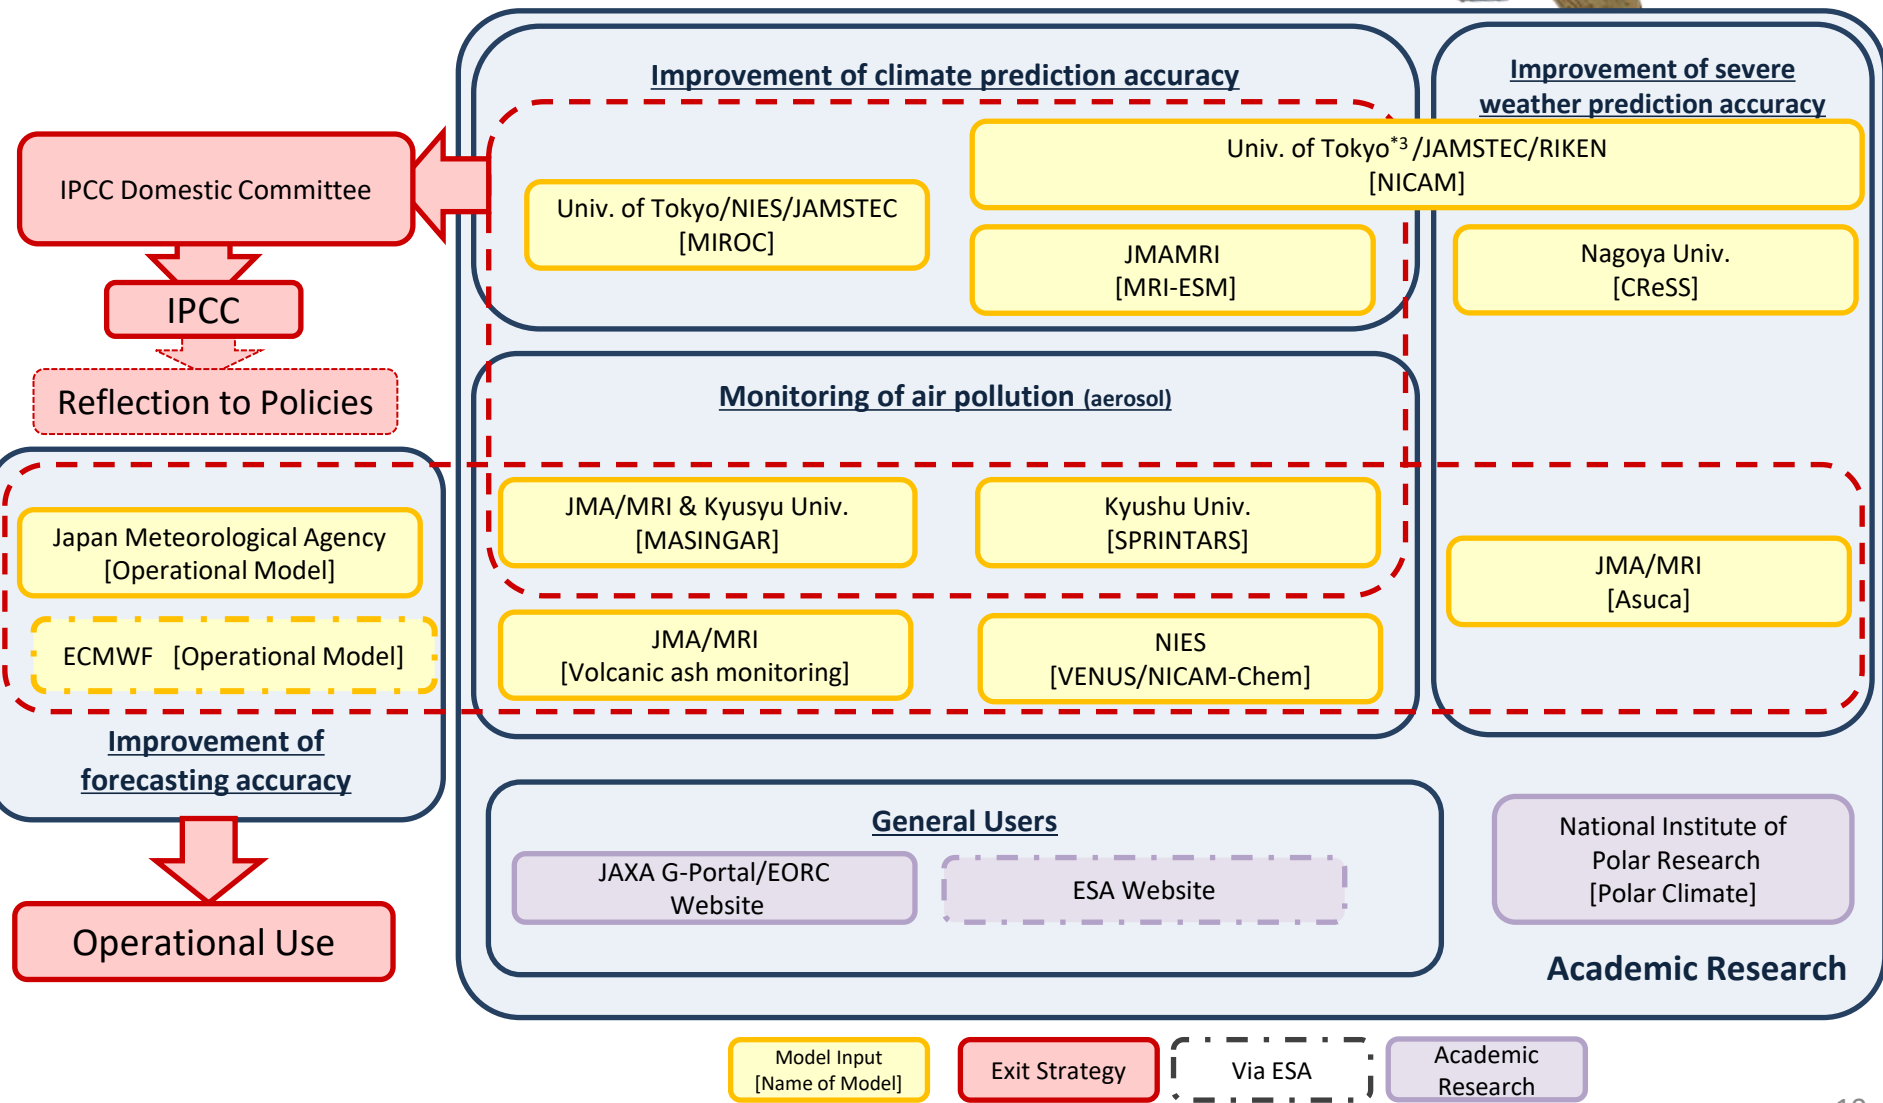

EarthCARE/CPR is under development by cooperation between JAXA and the National Institute of Information and Communications Technology (NICT), and JAXA will conduct CPR validation activities with the cooperation with the NICT.

NICT will operate several ground instruments including the ground cloud radar (HG-SPIDER).

- The HG-SPIDER is located in NICT Koganei (Validation Site) with other Instruments; lidar, wind profiler, microwave radiometer, all-sky camera, etc...

Promotion for weather/climate model communities

Joint works with cloud resolving model groups

JAXA is collaborating with the **Japanese global cloud resolving model (NICAM)** for the EarthCARE data utilization with the Joint-Simulator.

- Prof. Satoh (Univ. Tokyo) group
- Dr. Seiki (JAMSTEC) group
- Dr. Miyoshi (RIKEN) group

“Joint-Simulator” (Hashino et al. (2013, JGR) is helpful for evaluating cloud resolving models.

Source codes of the Joint-Simulator are open for science community with registration from

http://www.eorc.jaxa.jp/theme/Joint-Simulator/userform/js_userform.html

Team home page:

<https://sites.google.com/site/jointsimulator/>

NICAM has attended the DYAMOND activity.
DYAMOND: *The Dynamics of the Atmospheric general circulation Modeled On Non-hydrostatic Domains*
(Stevens et al. 2019)

Snapshot of high-resolution DYAMOND models

EarthCARE data simulation from NICAM (GCRM) + Joint-simulator

CPR & ATLID

EarthCARE Active Sensor simulator (EASE)

Okamoto et al., (2007, 2008);
Nishizawa et al., (2008)

Signals at 10km height

Joint works with climate model groups

JAXA is collaborating with Prof. Suzuki (Univ. Tokyo) group for developing the **Japanese climate model (MIROC)**, which is one of the **IPCC models**, for the EarthCARE data utilization.

Climate model improvement using A-train data

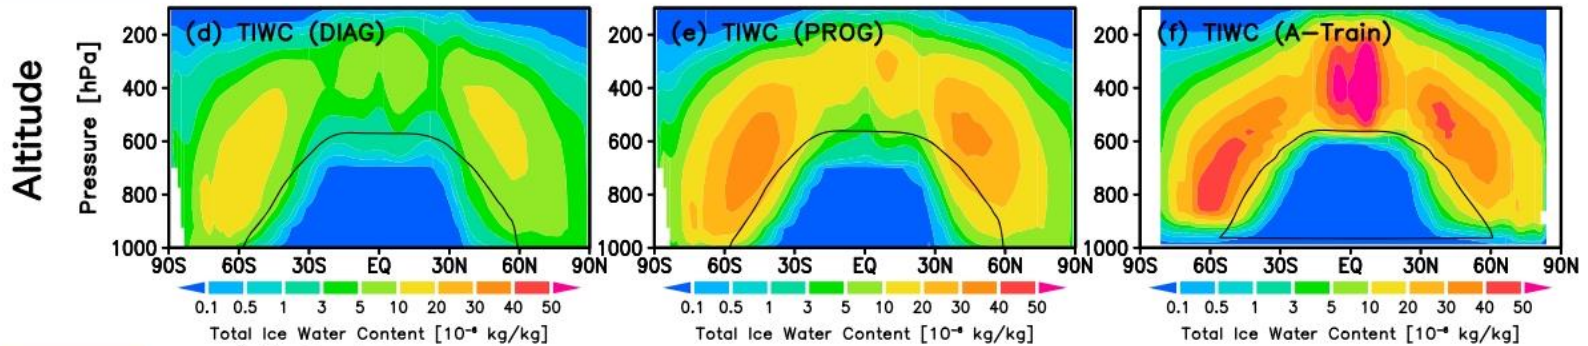

Michibata et al. (JAMES '19; ACP '20)
Michibata & Suzuki (GRL '20)

Cloud Ice

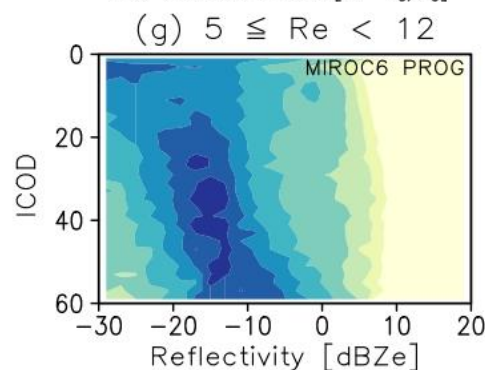

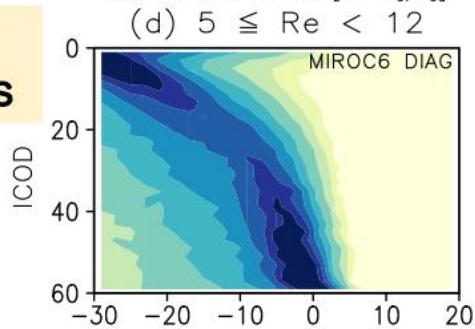

Old MIROC6

New MIROC6

Satellite Obs.

Rain process

Joint works with weather/aerosol model groups

JAXA started the following 4 joint works for Numerical Weather Prediction (NWP) and aerosol monitoring and prediction in April 2022.

- Joint research with the Japan Meteorological Agency (JMA) Meteorological Research Institute (MRI) for the NWP
 - We will evaluate and improve the cloud and precipitation processes of numerical models and develop assimilation techniques of EarthCARE data for the NWP systems.
 - PI: Dr. K. Okamoto (JMA/MRI) for global JMA model
 - PI: Dr. Y. Ikuta (JMA/MRI) for regional JMA model
- Aerosol monitoring and prediction
 - Volcanic ash monitoring
 - PI: Dr. H. Ishimoto (JMA/MRI)
 - Aeolian Dust (Kosa) Prediction
 - PI: Prof. K. Yumimoto (Kyusyu Univ.)
 - Air pollution prediction
 - PI: Dr. D. Goto (National Institute for Environmental Studies/ NIES)

Summary

- JAXA Product Overview
 - Developments by 6 Algorithm PIs are ongoing.
 - JAXA L2 ATBD is provided in the JAXA/EORC Website:
<http://www.eorc.jaxa.jp/EARTHCARE/index.html>
- JAXA A-Train Product for EarthCARE
 - http://www.eorc.jaxa.jp/EARTHCARE/research_product/ecare_monitor_e.html
- Validation status
 - Utilization of the existing observation network
 - Campaign observation (NICT Tokyo will be our super site.)
 - Cross comparison with other satellite data
- Applications with weather/climate models
 - Joint works with cloud resolving model groups
 - Joint works with climate model groups
 - Joint works with weather/aerosol model groups
