# Global monitoring for a growing planet.

Dr. Lina Hollender | CCO | [lina@constellr.space](mailto:lina@constellr.space)

“In three years from now, water will be a bigger issue than carbon is today”

World-class partners

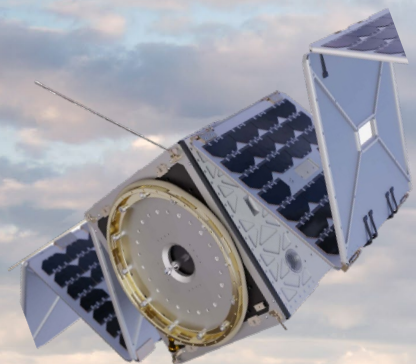

Helps outsource risk

Proprietary data

Accessed via SaaS platform

Scalable solutions

Tailored to the needs of Ag

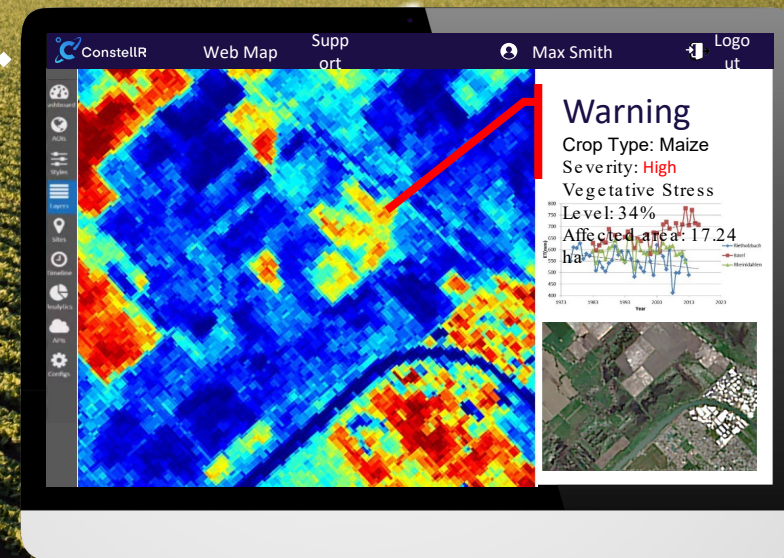

# Space Assets to Enable Smart Agriculture

Water cost in agriculture (2020)

**EUR 334 bn**

Cost of water wasted (2020)

**EUR 134 bn**

Detecting crop stress earlier than ever before, from space

“We enable smart farming globally by creating a biophysical atlas of our world.”

Anchored in Europe, serving the Globe

Data fusion for tailored solutions

Future-proof Market

Concerted efforts of Space, Ag, Investors

Strong demand / climate drivers

Enabling resource stewardship

# Paving the way towards a sustainable food system

Water savings

**5.2 Bt**

Potential: 180 Bt

CO<sub>2eq</sub> savings

**2.7 Mt**

Potential: 94 Mt

End-user benefit

**2.8 B€**

(12 M people fed)

Potential: 350 M people
