

# Applying Technologies from the Gaia-X Infrastructure Model for Trustworthy EO Data Ecosystems.

## Lessons Learnt from Data Exchange Use Cases in the Automotive Network Catena-X

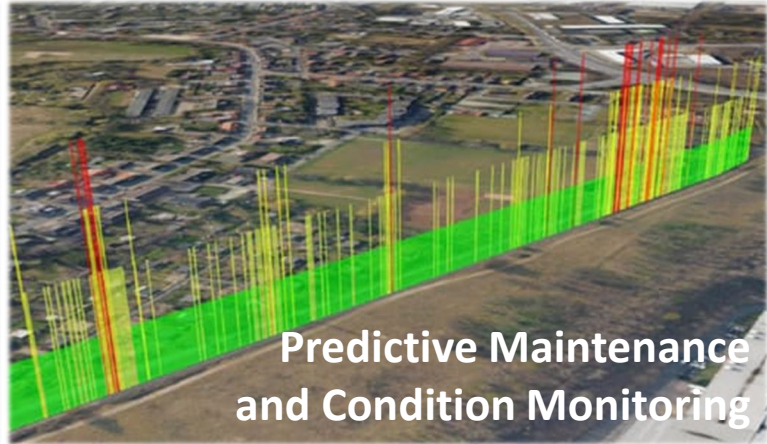

Arne Peter Raulf (DLR Institute for AI Safety & Security)

Knowledge for Tomorrow

# Research for AI Safety and Security – Motivation

Production

**AI**  
must be capable  
to meet the requirements  
of safety-critical applications  
and also secure against  
attacks and misuse.

Robotics

Personal Assistants and  
Expert Systems

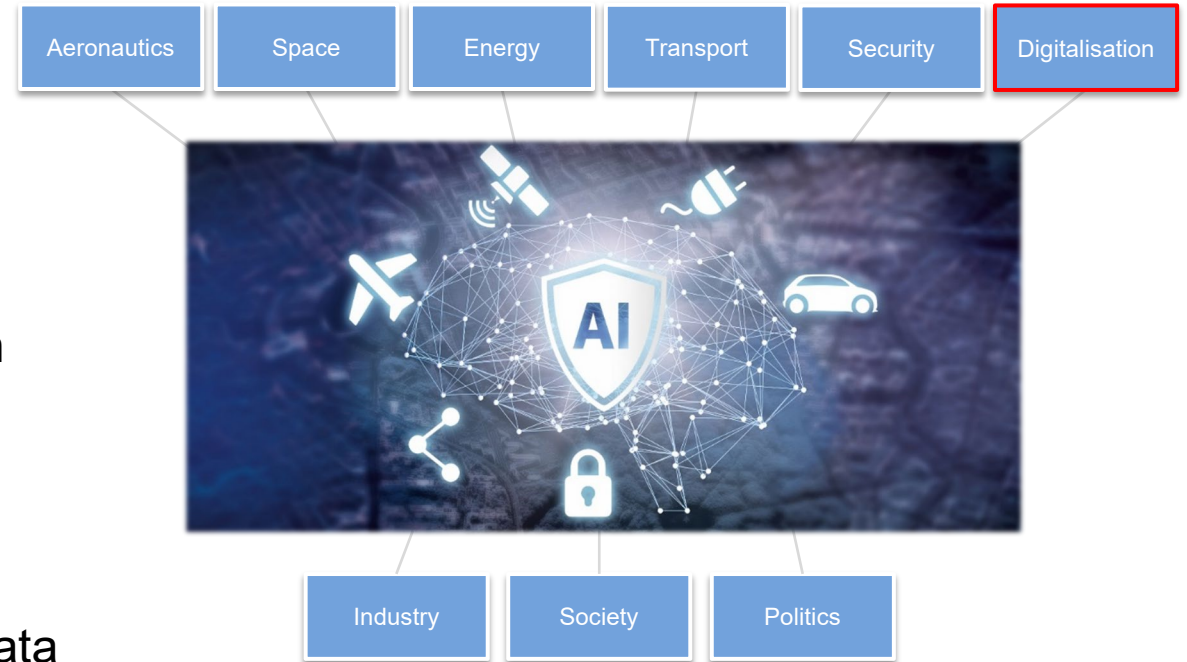

# Institute for AI Safety and Security

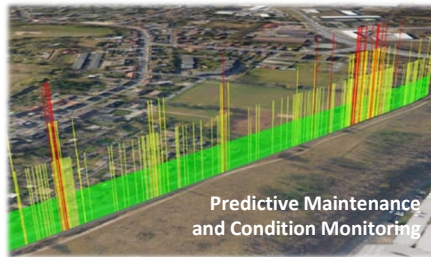

Sankt Augustin and Ulm – Germany – [www.dlr.de/ki](http://www.dlr.de/ki)

The AI Institute contributes to a unique constellation for ambitious interdisciplinary and transdisciplinary research at the DLR – research areas:

- processes and methods for safety-critical AI
- robust and reliable approaches to safeguard AI
- security in the context of AI and the use of sensitive data
- execution environments and innovative computation methods
- AI-related network activity on the subjects of ethics, law and society

Earth Observation

Predictive Maintenance and Condition Monitoring

Automated and Connected Transport Systems

Robotics

Personal Assistants and Expert Systems

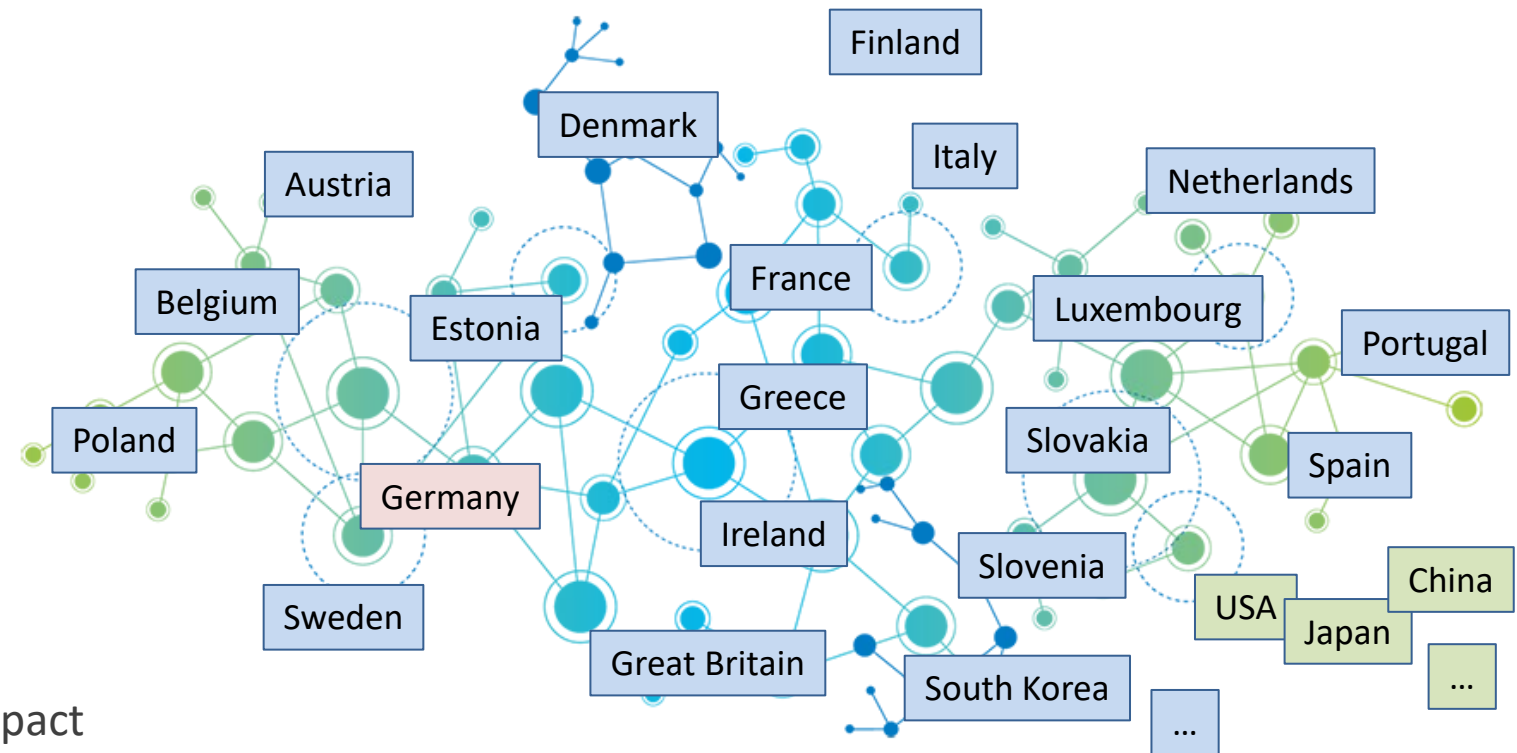

Production

# GAIA-X – Guiding Principles

- GAIA-X will be the basis for a digital ecosystem in which data and services can be made available, integrated/merged, shared and used securely and with an ultimate level of trust.
- Based on European values, GAIA-X implements the following guiding principles:
  - European data protection principles
  - authenticity and trust
  - openness and transparency
  - sovereignty and self-determination
  - free market access as well as European stability and growth
  - modularity and interoperability
  - usability
- European/international visibility and impact

# GAIA-X 4 Future Mobility & Catena-X

- **Mobility**
- Agriculture
- Energy
- Geographic Inform. Systems
- Health
- Finance
- Industry 4.0 / SMEs
- Public Sector
- Smart Living
- Smart City / Smart Region
- ...

- User-Oriented / -Friendly
- Systemically Approached
- Intermodal
- Coordinated | Cooperative
- Connected | Digitized
- Smart | Automated
- Robust | Available
- Safe and Secure
- Open | Flexible
- Service-Oriented
- Capable of Transformation
- Affordable | Sustainable

# GAIA-X – Guiding Principles & Ecosystem

## Advanced Smart Services

(Cross-) Sector Innovations /  
Market places / Applications

## Data Spaces

Interoperable & portable (Cross-) Sector data-sets and services

## Gaia-X Federation Services

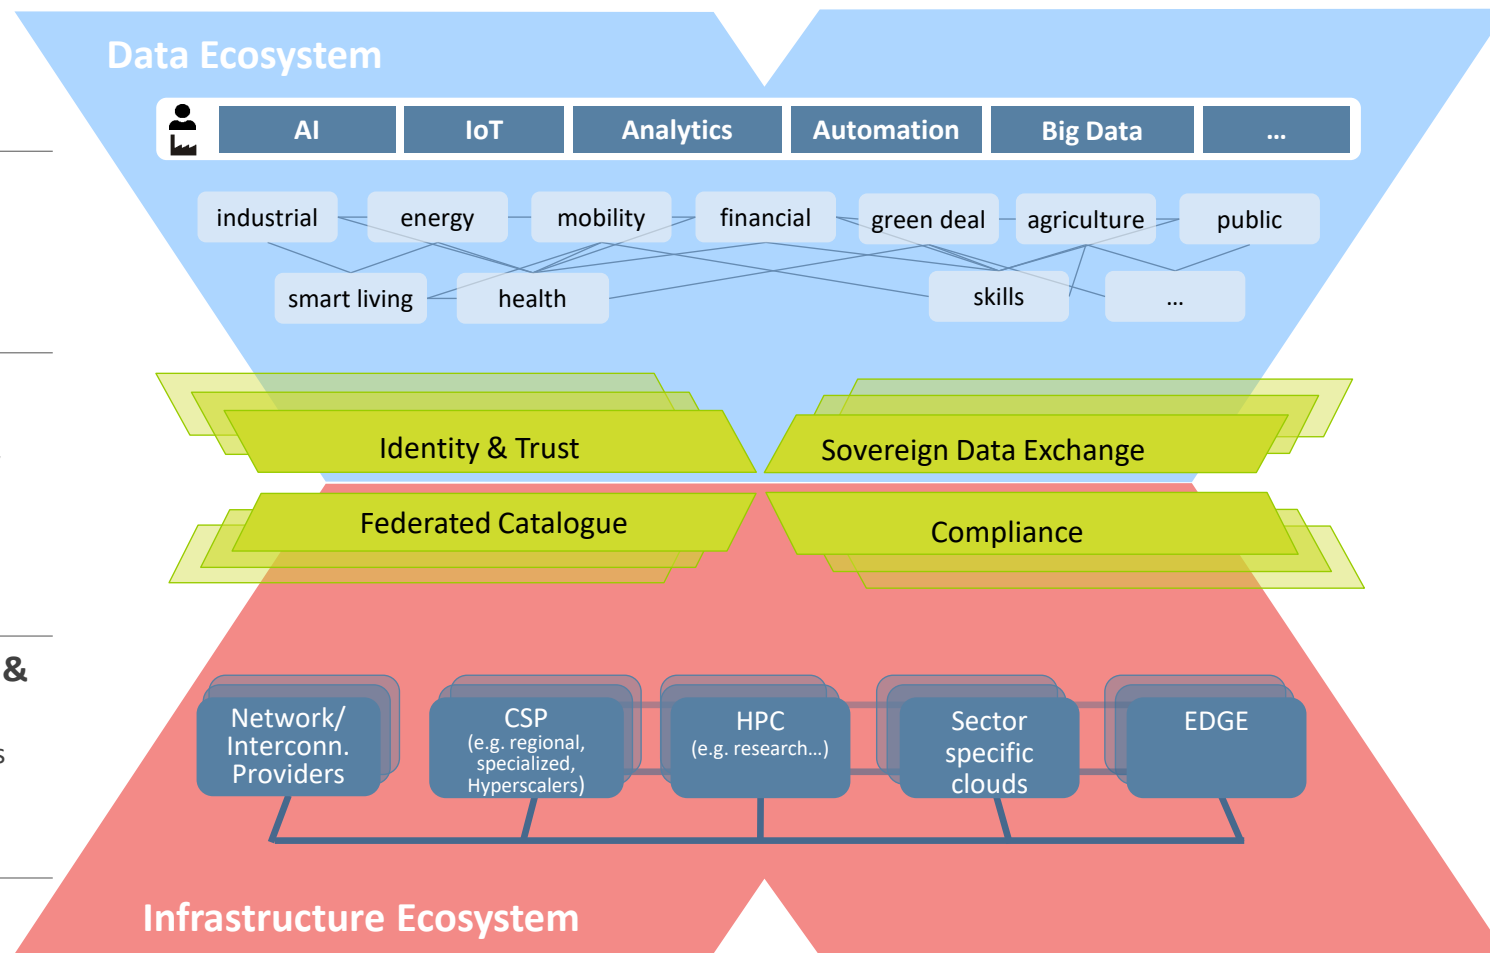

Federated & distributed for interoperability Trust & Sovereignty services

## Portability, Interoperability & Interconnectivity

Technical: Architecture of Standards  
Commercial: Policies

## Compliance

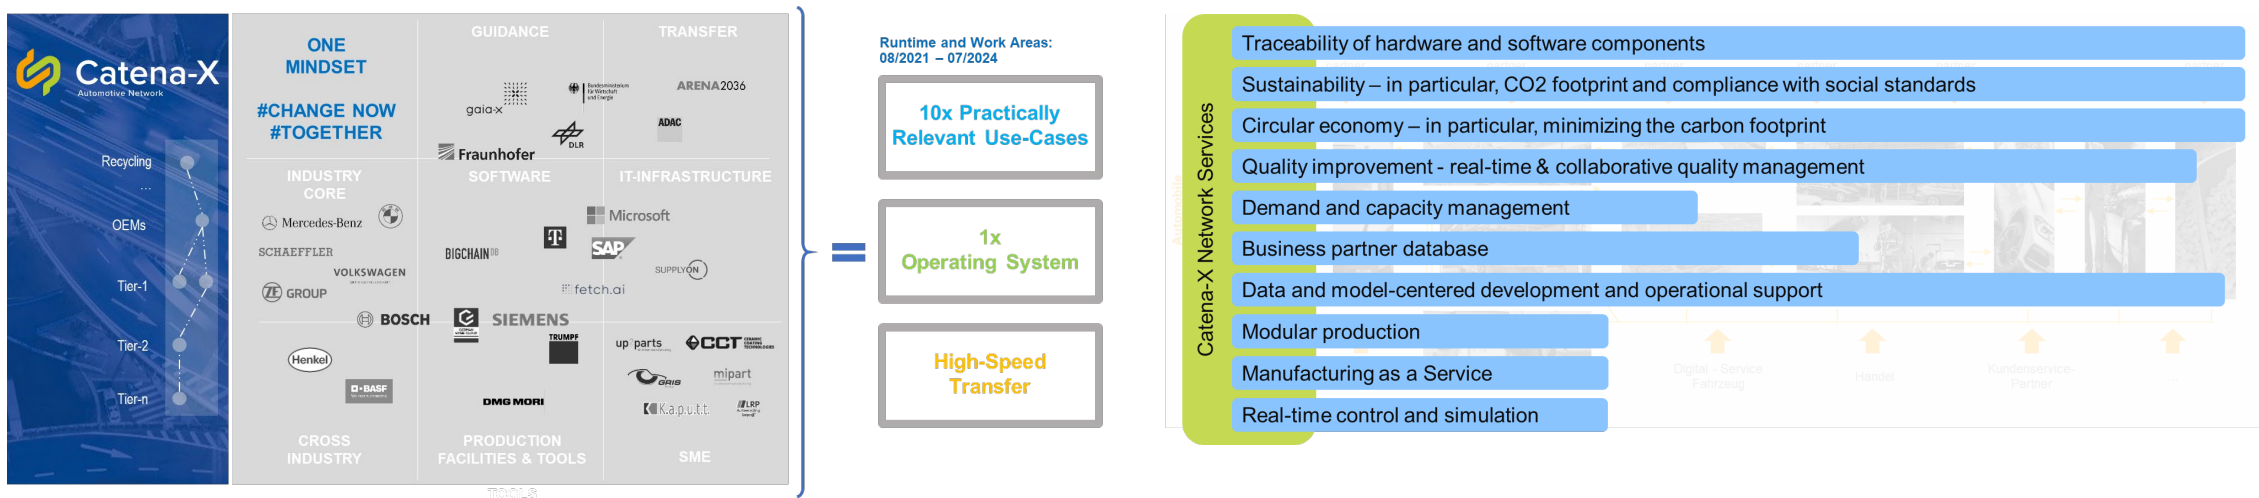

Legal: Regulation & Policies

# GAIA-X 4 Future Mobility & Catena-X

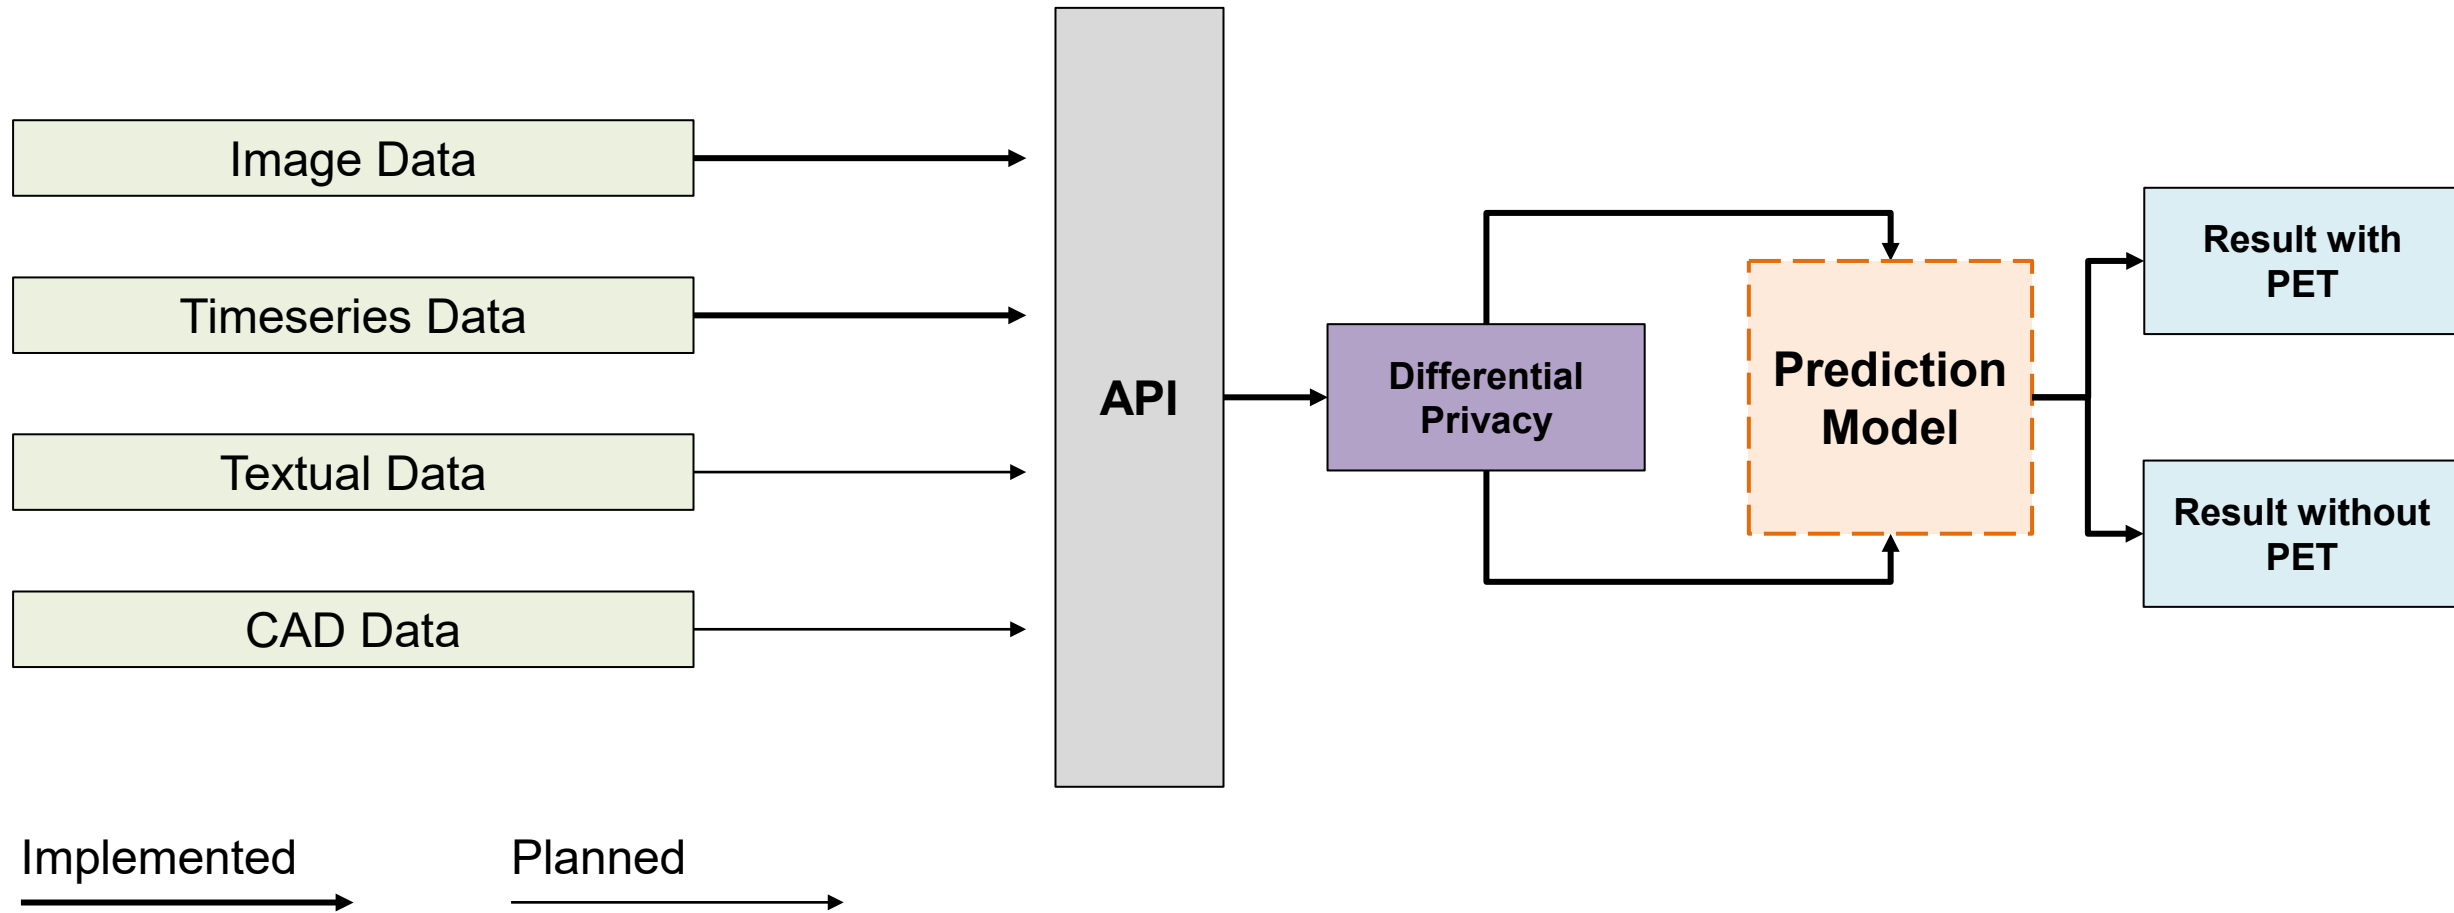

## - Catena-X – joint mission

- „We offer the **most user-friendly environment** for the construction, operation and collaborative use of **end-to-end data chains along the entire automotive value chain**.
- The resulting data ecosystem makes us unique and is an important factor for the **sustainable development of the industrial sector as well as the individual companies**.
- It **rewards all participants** with above-average resilience, innovative strength and profit opportunities.“
